Implementation and Final Text versions and [here](#) for Public Comment versions.

## Foreword

30 This is a supplement to the IHE Quality, Research and Public Health Technical Framework V0.1. Each supplement undergoes a process of public comment and trial implementation before being incorporated into the volumes of the Technical Frameworks.

35 This supplement is published on September 5, 2014 for trial implementation and may be available for testing at subsequent IHE Connectathons. The supplement may be amended based on the results of testing. Following successful testing it will be incorporated into the Quality, Research and Public Health Technical Framework. Comments are invited and may be submitted at [http://www.ihe.net/QRPH\\_Public\\_Comments](http://www.ihe.net/QRPH_Public_Comments).

This supplement describes changes to the existing technical framework documents.

“Boxed” instructions like the sample below indicate to the Volume Editor how to integrate the relevant section(s) into the relevant Technical Framework volume.

40 **Amend section X.X by the following:**

Where the amendment adds text, make the added text **bold underline**. Where the amendment removes text, make the removed text **bold strikethrough**. When entire new sections are added, introduce with editor’s instructions to “add new text” or similar, which for readability are not bolded or underlined.

45

General information about IHE can be found at: <http://ihe.net>.

Information about the IHE IT Infrastructure domain can be found at:  
[http://ihe.net/IHE Domains](http://ihe.net/IHE_Domains).

50 Information about the organization of IHE Technical Frameworks and Supplements and the process used to create them can be found at: [http://ihe.net/IHE Process](http://ihe.net/IHE_Process) and <http://ihe.net/Profiles>.

The current version of the IHE IT Infrastructure Technical Framework can be found at:  
[http://ihe.net/Resources/Technical Frameworks](http://ihe.net/Resources/Technical_Frameworks).

## CONTENTS

	Introduction to this Supplement.....	23
	Open Issues and Questions .....	24
60	Closed Issues .....	27
	General Introduction .....	30
	Appendix A – Actor Summary Definitions .....	30
	Appendix B – Transaction Summary Definitions.....	30
	Glossary .....	30
65	<b>Volume 1 – Profiles .....</b>	<b>35</b>
	Copyright Licenses.....	35
	Domain-specific additions .....	35
	X Birth and Fetal Death Reporting-Enhanced (BFDR-E) Profile .....	36
	X.1 Actors, Transactions, and Content Modules .....	36
70	X.1.1 Actor Descriptions and Actor Profile Requirements.....	38
	X.1.1.1 Content Creator.....	38
	X.1.1.2 Content Consumer .....	38
	X.1.1.3 Form Filler .....	39
	X.1.1.4 Form Manager .....	39
75	X.1.1.5 Form Receiver .....	40
	X.1.1.6 Form Processor .....	40
	X.1.1.7 Form Receiver CDA Exporter .....	40
	X.1.1.8 Form Receiver Message Exporter .....	40
	X.1.1.9 Form Archiver .....	41
80	X.1.1.10 Information Source .....	41
	X.1.1.11 Information Recipient.....	41
	X.2 Actor Options .....	41
	X.2.1 Form Filler: Pre-Pop Option.....	42
	X.2.2 Form Filler: VR Pre-Pop Option .....	42
85	X.2.3 Form Filler: Archive Form Option .....	42
	X.2.4 Form Manager: Form Pre-Pop Option .....	42
	X.2.5 Form Processor: Form Pre-Pop Option .....	43
	X.3 BFDR-E Required Actor Groupings .....	43
	X.4 BFDR-E Overview .....	43
90	X.4.1 Concepts .....	43
	X.4.2 Use Cases .....	44
	X.4.2.1 Use Case #1: Forms Data Capture with Messaging .....	44
	X.4.2.1.1 Use Case Description.....	44
	X.4.2.1.2 Processing Steps .....	44
95	X.4.2.1.2.1 Pre-conditions .....	44
	X.4.2.1.2.2 Main Flow .....	45
	X.4.2.1.2.3 Post-conditions.....	45

	X.4.2.1.3 Process Flow .....	45
100	X.4.2.2 Use Case #2: Forms Data Capture with Document Submission .....	46
	X.4.2.2.1 Use Case Description .....	47
	X.4.2.2.2 Processing Steps .....	47
	X.4.2.2.2.1 Pre-conditions .....	47
	X.4.2.2.2.2 Main Flow .....	47
	X.4.2.2.2.3 Post-conditions .....	47
105	X.4.2.2.3 Process Flow .....	47
	X.4.2.3 Use Case #3: Native Forms Data Capture .....	48
	X.4.2.3.1 Use Case Description .....	49
	X.4.2.3.2 Processing Steps .....	49
	X.4.2.3.2.1 Pre-conditions .....	49
110	X.4.2.3.2.2 Main Flow .....	49
	X.4.2.3.2.3 Post-conditions .....	49
	X.4.2.3.3 Process Flow .....	49
	X.4.2.4 Use Case #4: EHR BFDR Messaging .....	50
	X.4.2.4.1 Use Case Description .....	51
115	X.4.2.4.2 Processing Steps .....	51
	X.4.2.4.2.1 Pre-conditions .....	51
	X.4.2.4.2.2 Main Flow .....	51
	X.4.2.4.2.3 Post-conditions .....	51
	X.4.2.4.3 Process Flow .....	51
120	X.4.2.5 Use Case #5: EHR BFDR Document Submission .....	51
	X.4.2.5.1 Use Case Description .....	52
	X.4.2.5.2 Processing Steps .....	52
	X.4.2.5.2.1 Pre-conditions .....	52
125	X.4.2.5.2.2 Main Flow .....	52
	X.4.2.5.2.3 Post-conditions .....	52
	X.4.2.5.3 Process Flow .....	52
	X.5 Security Considerations .....	52
	X.6 Cross Profile Considerations .....	53
130	X.6.1 XDS.b, XDM, or XDR XDS.b, XDM, or XDR – Cross Enterprise Document Sharing.b, Cross Enterprise Document Media Interchange, or Cross Enterprise Document Reliable Interchange .....	53
	X.6.2 Sharing Value Set (SVS) .....	54
	X.7 BFDR Data Elements .....	54
	Appendices .....	55
135	Appendix A – Sample Forms .....	55
	A.1 Sample Birth ReportingUS Facilities Worksheet .....	56
	A.2 Sample US Fetal Death Facilities Worksheet .....	58
	A.3 Form Data Element Key for Sample US Facilities Worksheet .....	60
	A.4 Form Data Element Key Sample US Fetal Death Facilities Worksheet .....	62
140	Appendix B – Data Element Definitions .....	64

	<b>Volume 2 – Transactions .....</b>	<b>83</b>
	3.37 BFDRFeed [QRPH-37] .....	83
	3.37.1 Scope .....	83
	3.37.2 Actor Roles.....	83
145	3.37.3 Referenced Standards .....	84
	3.37.4 Interaction Diagram.....	85
	3.37.4.1 BFDRFeed [QRPH-37] .....	85
	3.37.4.1.1 Trigger Events .....	85
	3.37.4.1.2 Message Semantics .....	86
150	3.37.4.1.2.1 MSH Segment.....	86
	3.37.4.1.2.2 SFT Segment.....	86
	3.37.4.1.2.3 EVN Segment .....	87
	3.37.4.1.2.4 PID Segment .....	87
	3.37.4.1.2.5 NK1 Segment.....	95
155	3.37.4.1.2.6 PV1 Segment .....	95
	3.37.4.1.2.7 ROL Segment.....	95
	3.37.4.1.2.8 OBX Segment .....	95
	3.37.4.1.3 Expected Actions .....	96
	3.37.4.1.3.1 ACK .....	96
160	3.37.5 Security Considerations.....	96
	3.37.5.1 Security Audit Considerations BFDRFeed [QRPH-37] (ADT) .....	96
	3.37.5.1.1 Information Source Actor audit message .....	96
	3.37.5.1.2 Information Recipient Actor audit message .....	98
165	3.Y.5.2 Security Audit Considerations – Retrieve Form [ITI-34] audit message .....	99
	3.Y.5.3 Security Audit Considerations – Submit Form ([ITI-35]) audit messages.....	99
	3.Y.5.4 Security Audit Considerations –Archive Form ([ITI-36]) audit messages audit messages .....	100
	Volume 2 Namespace Additions .....	101
	<b>Volume 3 – Content Modules .....</b>	<b>102</b>
170	5 Namespaces and Vocabularies.....	103
	6 CDA Content Modules .....	104
	6.3.1 CDA Document Templates .....	104
	6.3.1.D1 Birth Reporting (BFDR-Birth) Document (1.3.6.1.4.1.19376.1.7.3.1.1.19.2) .....	104
175	6.3.1.D1.1 Format Code .....	104
	6.3.1.D1.2 Parent Template(s) .....	104

875 **Introduction to this Supplement**

This supplement is written for Trial Implementation. It is written as an addition to the Trial Implementation version of the Quality, Research and Public Health Technical Framework.

This supplement also references the following documents<sup>1</sup>. The reader should review these documents as needed:

- 880
1. PCC Technical Framework, Volume 1
  2. PCC Technical Framework, Volume 2
  3. PCC Technical Framework Supplement: CDA Content Modules
  4. [IT Infrastructure Technical Framework Volume 1](#)
  5. [IT Infrastructure Technical Framework Volume 2](#)

885

  6. [IT Infrastructure Technical Framework Volume 3](#)
  7. HL7 and other standards documents referenced in Volume 1 and Volume 2
  8. Birth Edit Specifications for the 2003 Revision of the U.S. Standard Certificate of Live Birth (4/2004; 3/2005; Updated 7/2012)
  9. Natality 2003 Revision – File In-Processing Documentation (14 Dec 2010)

890

  10. Fetal Death Edit Specifications for the 2003 Revision of the U.S. Standard Report of Fetal Death Vital Records birth certificates and fetal death reports include important demographic, medical and key information about the antepartum period, the labor and delivery process and the newborn/fetal death<sup>2</sup>. Much of the medical and health information collected for the birth certificate and fetal death report can be pre-populated with information already available in the Electronic Health Record (EHR). A responsible Health Care Provider (HCP) or designated representative must review and complete the information to ensure data quality for vital registration purposes. These data may then be used by public health agencies to track maternal and infant health to target interventions for at risk populations.

895

900

---

<sup>1</sup> The first six documents can be located on the IHE Website at [http://www.ihe.net/Technical\\_Frameworks/](http://www.ihe.net/Technical_Frameworks/). The remaining documents can be obtained from their respective publishers.

<sup>2</sup> In some countries the birth certificate contains just the patient demographics and the medical information is recorded in separate early childhood health certificates produced at different times.

## Open Issues and Questions

### Open Issue List:

Item Count	Issue Description	Status
1	<p>HL7 Issue – OBX is optional in HL7 – we want it required.</p> <ul style="list-style-type: none"> <li>a. This will be brought through the formalization process in HL7</li> <li>b. Once HL7 formalizes the OBX R then statements leading in to the section requirements in Volume 2 should be updated to indicate NO FURTHER constraints</li> </ul>	<p>Review during Volume 2 development A DSTU Comment needs to be added against the VRBFDR DSTU 2013OCT</p> <ol style="list-style-type: none"> <li>1. Fix type-o in ADT^A04 and ADT^A08 OBX to [{OBX}]</li> <li>2. Fix cardinality to [1..*]</li> <li>3. All observation types in Table 53 SHALL be recorded</li> </ol> <p>Check with Mead on how to make this further constraint. These constraints will be added to the Volume 2 message for QRPH BFDR Message.</p>
2	LDS specification needs to be updated to allow for Intake and Output to represent coded observations	Review during Volume 3 development – check if this is still relevant. We may not need to address this. May be resolved by using ProblemObservation to gather breastfeeding observation. May be closed.
3	TEMPLATE OPEN ISSUE: The template does not really support the need to specify the mappings for the form receiver message exporter, form receiver CDA exporter, and the Pre-population requirements for the Form Manager. These have been reflected together as subsections to 6.3.1.D.4 Data Element Requirement Mappings.	This issue needs to be documented as an IHE TS template issue. Clear guidance doesn't exist within the template on where to add this type of mapping from a specific form to a standard input document or from a specific form to a standard output document.
4	Template Issue: Where should the list of data elements be specified in this new template? In the past, they were included in X.6 Content Module in some profiles. We have tentatively included a new Section X.7 Data Requirements until this issue has been resolved.	Pending addition to template
5	Should there be only one option, the LDS-VR Option' – this had been considered but we want to be able to offer a lower participation threshold where possible – the pre-pop Option may need to be renamed, but it supports the LDS or the LDS-VR document.	Use of LDS will continue to be permitted until more vendors can produce LDS-VR documents.
6	Do we need a new transaction for each new type of outbound message? Is there a more generalized way to do this (like PCD-01)?	This can be considered later by QRPH. For now, BFDR will define a new message.

IHE Quality, Research and Public Health Technical Framework Supplement – Birth and Fetal Death Reporting-Enhanced (BFDR-E)

---

Item Count	Issue Description	Status
7	The use of Null flavors for unknown is under review by HL7. This is slated for discussion in May HL7. This also impacts the output mapping to CDA documents as we are ‘silent’ on how to handle the ‘N’ status of each observation.	This document includes a link to the HL7 DSTU which will include the HL7 resolution on this matter in the published version. No profiling will be done at this time pending the outcome of the HL7 decision.
8	Child breastfed at discharge: may want to align the LDS-VR approach to use the LOINC question/answer observation as done in the BFDR CDA. This is also under consideration for nutrition and healthy weight.	For now, it should be represented differently in secondary use than in the primary clinical setting.
9	Infant living at time of report: approach to use the LOINC question/answer observation as done in the BFDR CDA	Deceased Indicator extension may be populated in the header, or newborn information section to be reviewed with PCC. Not critical as we still need to go deeper into the body of the newborn section to find time of death.
10	Date of Last Other Pregnancy Outcome: Not aligned with LDS-VR model which uses 68500-8 Date last other pregnancy outcome, but this modelling contains two concepts 1) number of other pregnancy outcomes that did not result in a live birth (uses the same code); 2) date that the last pregnancy that did not result in a live birth ended	
11	Date of First Prenatal Care visit: : Not aligned with LDS-VR model - code for whole act indicates "73776-7" No-prenatal care - seems it should be separate observation for first and last prenatal care visit. NOTE: Date of Last Prenatal Care Visit has been removed from data requirements.	
12	PNC – needs to be added from Spec to data dictionary and mapping tables 73776-7 No-prenatal care	
13	73773-4 Number of infants in this delivery born alive is different from LDS-VR mapping and HBS; which uses Births.live consistent with BFDR and HBS	
14	Review of Birth vs FDeath Forms to assess any impact on logic in using numbers as a reference. Some information is needed in one form vs the other, and there may be differences in the information captured on the form for similar concepts.	There are differences in the form numbers between the 2 documents, so any reference to the form numbers needs to be handled separately between birth and fetal death.
15	Failed External cephalic Version – mapping to CDA output is listed as ‘Pending’ due to underlying HL7 Specification – missing. Profiling deferred pending HL7 resolution of the modelling.	
16	HL7 CDA document is missing specification of UCUM units for some metrics. No profiling added pending HL7 resolution of this issue.	
17	PPO: DEPRECATED. Sample forms do not reflect that this is removed at this time	
18	International considerations for form options currently identified as US Form Option on form manager	

Item Count	Issue Description	Status
19	Apgar5 and Apgar10 need to be updated to reflect new PCC modeling for Apgar once PCC work is completed	Initial CP taken on by Lisa Nelson to clarify that Apgar is to be in Coded Detailed Physical Exam/General . Longer term effort may consider a more global concept for assessments.
20	Handling of these ‘Pending’ flag indicators from the Edit Specifications needs to be reviewed in the context of the workflow. This status flags may not be pertinent in the proposed profile use cases.	
21	model update under consideration for Autopsy and Hysterectomy/Hysterotomy in answer modelling: use current value set that indicates planned and unplanned or use Boolean with a second question to add a planned indicator which needs a new LOINC code	
22	Vocabulary – Unplanned Operation seems there should be a better code than selected ‘177217006’ Immediate repair of obstetric laceration (procedure)	
23	Need to post sample CDA documents for BFDR-Birth and BFDR-FD	
24	A01, A03 – appear to be missing - not in HL7	Review with HL7 to potentially add these
25	Header value sets: SHALL – may be better in the national extension – Structure and value set conformance discussion needed for international considerations in the longer term	
26	Fertility Enhancing Drugs Medications (NCHS) expected to be on the medications list– this is not the best place to document this as the drug would have been discontinued long before the delivery and may not be in the record.	Further discussion needed with clinical, vocabulary, EMR, and profiling stakeholders to review modeling and approach to capturing this more accurately in the EMR for use in LDS. Perhaps a new event code (e.g., LOINC code – where would this be found or SNOMED for problem finding)
27	Fever Greater Than 100.4 (NCHS) value set - This is not likely to be present on a problem list and instead will be represented in discrete data if the temperature was taken	Verify with DVS and clinical team that this is clinically equivalent to the Chorioamnionitis so that they can use instead
28	Unplanned Operation – There are several references in the documentation to Unplanned Operation, Unplanned Hysterectomy and Scheduled C Section. These time-related measurements need to be precise or we will not be able to send them. How do we determine that the operation is unplanned	Further discussion needed with clinical, vocabulary, EMR, and profiling stakeholders to review modeling and approach to capturing this more accurately in the EMR for use in LDS.

Item Count	Issue Description	Status
29	Schedule-CSection: More common measurements today would involve a Cesarean or an Emergent Cesarean instead of a Scheduled Cesarean. Clinician review needed for use of 'Elective' Cesarean codes in the value sets.	Further discussion needed with clinical, vocabulary, EMR, and profiling stakeholders to review modeling and approach to capturing this more accurately in the EMR for use in LDS. Consider renaming to Elective CSection to avoid confusion.
30	Timing and capture of chromosomal/congenital conditions is not necessarily conducive to clinical workflow (e.g., suspected is not usually documented in the record). Review of systems is probably correct, but missing symptoms or other observations that would specifically put this into a status of 'suspected'	Further discussion needed with clinical, vocabulary, EMR, and profiling stakeholders to review modeling and approach to capturing this more accurately in the EMR for use in LDS.
31	Direct submission from EMR considerations: Some jurisdictions may require human sign-off before submitting a message	
32	The finalized and published HL7 CDA DSTU documents are expected to be available to HL7 members early June 2014, and to non-members by early September 2014.	
33	The number of fetal deaths in the delivery (FDTH) is not currently mapped to the HL7 CDA Fetal Death Document. There is currently no attribute in the CDA given that there is no request for this information on the forms used as a basis for this work.	Further review is under way with NCHS and HL7. Until this is completed, the mapping will remain listed as PENDING.
34	Admission Source – need to consider use of the Transfer entry rather than the header information where it is now mapped. Consideration for the appropriate section to use to hold this entry is needed.	
35	May consider requesting specific SNOMED Codes to address External Cephalic Version successful/failed. If we have new SNOMED Codes, it will involve updates to the derivation rules and mapping for the Form manager and LDS-VR specifications for representing this information.	
36	Review in progress to use SNOMED vocabularies for International Applicability to replace current value set content for international codes (SNOMED). Updates should be to the value set rather than changes to the name/OID.	
37	No SNOMED codes are available to Hospital admission transfer from other facility rather than the UB04 codeset. May consider new code requests.	

## Closed Issues

Item	Issue Description	Status

IHE Quality, Research and Public Health Technical Framework Supplement – Birth and Fetal Death Reporting-Enhanced (BFDR-E)

---

Item	Issue Description	Status
1	Name of value sets implying domain ‘BFDR’ will be updated to generic naming. These references will be updated once the renaming is completed and published in PHIN-VADS.	Closed
2	PCC CP to LDS - Coded Vital Signs section needs to be pulled out to a separate section for Mother and Newborn	Closed
3	Do we continue to offer grouping guidance?	No required grouping
4	If MU requires Race/Ethnicity then we may require this. Resolved: The CMS Meaningful Use Objectives support recording race and ethnicity information in the EHR as stated in: §170.304 (c) Record demographics updated 8/13/2010 <a href="http://healthcare.nist.gov/docs/170.304">http://healthcare.nist.gov/docs/170.304</a> . c_RecordDemographicsAmb_v1.0.pdf Also Requires use of OMB Race & Ethnicity Codes available at: http://www.whitehouse.gov/omb/inforeg_statpolicy/#dr.	We will modify the description to indicate that race and ethnicity information will be reported by the funeral director or next of kin as the primary source of information. However, the EHR may also serve as a resource for documenting race and ethnicity information. - modifying from pre-populated to direct data entry. Added note: Pre-populateData Entry Required. Included NOTE: data elements would be reported by the funeral director or next of kin, and the EHR would not be the primary source. However, the EHR may also serve as a resource for documenting race and ethnicity information to inform the content of this attribute.
5	We will need to review whether both XPHR and MS are both appropriate for this profile or whether we need to limit to MS to capture the required attributes for the U.S. death certificate. Also the HL7 Continuity of Care Document (CCD).	Considerations deferred. Continue with LDS. Pre-population using currently CCDA will remain out of scope pending IHE harmonization efforts. CCDA Refactoring impact on XPHR, MS, CCD references.
6	We will need to review whether both XPHR and MS are both appropriate for this profile or whether we need to limit to MS to capture the required attributes for the U.S. death certificate. Also the HL7 Continuity of Care Document (CCD).	Considerations deferred. Continue with LDS. Pre-population using currently CCDA will remain out of scope pending IHE harmonization efforts. CCDA Refactoring impact on XPHR, MS, CCD references.
7	The ‘Save Form For Continued Editing’ Option on the Form Manager has no specific strategies identified.	George Cole confirmed this is intended and supported functionality for RFD.

Item	Issue Description	Status
8	Review representation of RFD pre-pop options with 2 CDA pre-pop documents (LDS and LDHP) and content constrained by this profile	Can be done, but committee selected to update LDS-VR rather than use 2 pre-pop documents based on implementer feedback

## General Introduction

*Update the following appendices to the General Introduction as indicated below. Note that these are not appendices to Volume 1.*

### 910 Appendix A – Actor Summary Definitions

*Add the following actors to the IHE Technical Frameworks General Introduction list of actors:*

Actor	Definition
Information Source	The Information Source Actor is responsible for creating and transmitting an HL7 V2.5.1 message to an Information Recipient. This actor was initially defined in the QRPH VRDR Technical Supplement.
Information Recipient	The Information Recipient Actor is responsible for receiving the HL7 V2.5.1 message from an Information Source or from a Form Receiver Message Exporter. This actor was initially defined in the QRPH VRDR Technical Supplement.
Form Receiver CDA Exporter	This Form Receiver CDA Exporter receives data submitted through the Submit Form Transaction (ITI-35), transforms that data to create a CDA document, and shares that newly created CDA document with a Content Consumer. This actor was initially defined in the QRPH VRDR Technical Supplement.
Form Receiver Message Exporter	This Form Receiver Message Exporter receives data submitted through the Submit Form Transaction (ITI-35), transforms that data to an HL7 message and sends that message to an Information Recipient. This actor was initially defined in the QRPH VRDR Technical Supplement.

### Appendix B – Transaction Summary Definitions

*915 Add the following transactions to the IHE Technical Frameworks General Introduction list of Transactions:*

Transaction	Definition
BFDRFeed [QRPH-37]	This transaction transmits the HL7 V2.5.1 formatted message containing the Birth and Fetal Death Reporting information

## Glossary

*Add the following glossary terms to the IHE Technical Frameworks General Introduction Glossary:*

920

<b>Glossary Term</b>	<b>Definition</b>
Apgar score	Apgar score is a systematic measure for evaluating the physical condition of the infant at specific intervals following birth. It is a score that assesses the general physical condition of a newborn or infant by assigning a value of 0, 1, or 2 to each of five criteria: heart rate, respiratory effort, muscle tone, skin color, and response to stimuli. The five scores are added together, with a perfect score being 10. Apgar scores are usually evaluated at one minute and five minutes after birth. If the 5 minute Apgar score is < 6 then additional Apgar scores at 10 minutes are required.
Antibiotic	Antibiotic is a chemotherapeutic agent that inhibits or abolishes the growth of micro-organisms, such as bacteria, fungi, or protozoans.
Anorexia	Anorexia nervosa is a psychiatric illness that describes an eating disorder characterized by extremely low body weight and body image distortion with an obsessive fear of gaining weight.
Asthma	Asthma is a chronic (long-lasting) inflammatory disease of the airways. In those susceptible to asthma, this inflammation causes the airways to narrow periodically; this, in turn, produces wheezing and breathlessness, sometimes to the point where the patient gasps for air.
Breech presentation	Breech presentation is a presentation of the fetal buttocks or feet in labor; the feet may be alongside the buttocks (complete breech presentation); the legs may be extended against the trunk and the feet lying against the face (frank breech presentation); or one or both feet or knees may be prolapsed into the maternal vagina (incomplete breech presentation).
Cesarean section	Cesarean section, or C-section, is an extraction of the fetus, placenta, and membranes through an incision in the maternal abdominal and uterine walls.
Cephalic presentation	Cephalic presentation is the presentation of part of the fetus, listed as vertex, occiput anterior (OA), occiput posterior (OP).
Cerebral palsy	Cerebral palsy describes a group of permanent disorders of the development of movement and posture, causing activity limitation, that are attributed to nonprogressive disturbances that occurred in the developing fetal or infant brain. The motor disorders of cerebral palsy are often accompanied by disturbances of sensation, perception, cognition, communication, and behavior, by epilepsy, and by secondary musculoskeletal problems.
Chromosome abnormalities	Chromosome abnormalities consist of any change occurring in the structure or number of any of the chromosomes of a given species. In humans, a number of physical disabilities and disorders are directly associated with aberrations of both the autosomes and the sex chromosomes, including Down, Turner's, and Klinefelter's syndromes.
Cleft lip	Cleft lip with or without cleft palate is the incomplete closure of the lip. It may be unilateral, bilateral, or median.
Cleft palate	Cleft palate is an incomplete fusion of the palatal shelves. It may be limited to the soft palate, or may extend into the hard palate.
Congenital heart defect	Congenital heart defect (CHD) is a defect in the structure of the heart and great vessels of a newborn. Obstruction defects. CHD can be classified as: Obstruction defects occur when heart valves, arteries, or veins are abnormally narrow or blocked. Septal defects, for defects concerning the separation between left heart and right heart Cyanotic defects, including persistent truncus arteriosus, total anomalous pulmonary venous connection, tetralogy of Fallot, transposition of the great vessels, and tricuspid atresia.

<b>Glossary Term</b>	<b>Definition</b>
Congenital hip dysplasia	Congenital hip dysplasia is a hip joint malformation present at birth, thought to have a genetic component Clinical Hip dislocation, asymmetry of legs and fat folds; congenital hip dislocation may be asymptomatic and must be diagnosed by physical examination.
Cystic fibrosis	Cystic fibrosis (CF) is an inherited disease that affects the lungs, digestive system, sweat glands, and male fertility. Its name derives from the fibrous scar tissue that develops in the pancreas, one of the principal organs affected by the disease.
Down syndrome	Down syndrome or trisomy 21 is a genetic disorder caused by the presence of all or part of an extra 21st chromosome.
Eczema	Eczema is an acute or chronic noncontagious inflammation of the skin, characterized chiefly by redness, itching, and the outbreak of lesions that may discharge serous matter and become encrusted and scaly.
Endocrine disorder	Endocrine system is an integrated system of small organs which involve the release of extracellular signaling molecules known as hormones. Hypofunction of endocrine glands can occur as result of loss of reserve, hyposecretion, agenesis, atrophy or active destruction. Hyperfunction can occur as result of hypersecretion, loss of suppression, hyperplastic or neoplastic change, or hyperstimulation.
Epidural anesthesia	Epidural anesthesia is a regional anesthetic that is administered to the mother to control the pain of labor. It includes delivery of the agent into a limited space with the distribution of the analgesic effect limited to the lower body.
Esophageal atresia	Congenital esophageal atresia (EA) represents a failure of the esophagus to develop as a continuous passage. Instead, it ends as a blind pouch.
Food allergies	Food allergies are the body's abnormal responses to harmless foods; the reactions are caused by the immune system's reaction to some food proteins.
Gastroesophageal reflux	Gastroesophageal reflux is the reflux of the stomach and duodenal contents into the esophagus.
Gastroschisis	Gastroschisis is an abnormality of the anterior abdominal wall, lateral to the umbilicus, resulting in herniation of the abdominal contents directly into the amniotic cavity. It is differentiated from omphalocele by the location of the defect and the absence of a protective membrane.
General anesthesia	General anesthesia is the induction of a state of unconsciousness with the absence of pain sensation over the entire body, through the administration of anesthetic drugs. It is used during certain medical and surgical procedures.
Genitourinary tract	Genitourinary tract is the organ system of all the reproductive organs and the urinary system. These are often considered together due to their common embryological origin.
Gestational age (weeks of amenorrhea)	One measure of gestational age is the number of completed weeks elapsed between the first day of the last normal menstrual period and the date of delivery. Gestational age can also be measured based on ultrasound early in pregnancy.
Gestational diabetes	Gestational diabetes – glucose intolerance requiring treatment - is a condition that occurs during pregnancy. Like other forms of diabetes, gestational diabetes involves a defect in the way the body processes and uses sugars (glucose) in the diet.
Heart malformation	Heart malformation or congenital heart defect (CHD) is a defect in the structure of the heart and great vessels of a newborn. Most heart defects either obstruct blood flow in the heart or vessels near it or cause blood to flow through the heart in an abnormal pattern, although other defects affecting heart rhythm can also occur.

<b>Glossary Term</b>	<b>Definition</b>
Hemoglobin disease	Hemoglobin is produced by genes that control the expression of the hemoglobin protein. Defects in these genes can produce abnormal hemoglobins and anemia, which are conditions termed "hemoglobinopathies". Abnormal hemoglobins appear in one of three basic circumstances: Structural defects in the hemoglobin molecule. Diminished production of one of the two subunits of the hemoglobin molecule. Abnormal associations of otherwise normal subunits.
Hydrocephalus	Hydrocephalus is the abnormal accumulation of cerebrospinal fluid (CSF) in the ventricles, or cavities, of the brain. This may cause increased intracranial pressure inside the skull and progressive enlargement of the head, convulsion, and mental disability.
Immunoglobulin	Immunoglobulin is a concentrated preparation of gamma globulins, predominantly IgG, from a large pool of human donors; used for passive immunization against measles, hepatitis A, and varicella and for replacement therapy in patients with immunoglobulin deficiencies.
Induction of labor	Induction of labor is the initiation of uterine contractions by medical and/or surgical means for the purpose of delivery before the spontaneous onset of labor (i.e., before labor has begun).
In-utero transfer	An in-utero transfer consists in transferring, while the fetus is still in-utero, of the high-risks pregnant mother to another specialized birthing facility. Conversely, post-natal transfers are transfers that occur after the delivery.
Intra-uterine growth retardation (IUGR)	Intrauterine growth retardation (IUGR) occurs when the unborn baby is at or below the 10th weight percentile for his or her age (in weeks).
Intubation	Tracheal intubation is the placement of a flexible plastic tube into the trachea to protect the patient's airway and provide a means of mechanical ventilation.
Meningomyelocele	Meningomyelocele is a herniation of the meninges and spinal cord tissue.
Neural tube defects	Neural tube defect will occur in human embryos if there is an interference with the closure of the neural tube.
Nuchal translucency scan	Nuchal translucency scan is an ultrasonographic prenatal screening scan to help identify higher risks of Down syndrome in a fetus. The scan is carried out at 11-13 weeks pregnancy and assesses the amount of fluid behind the neck of the fetus. Fetuses at risk of Down tend to have a higher amount of fluid around the neck.
Omphalocele	Omphalocele is a defect in the anterior abdominal wall, accompanied by herniation of some abdominal organs through a widened umbilical ring into the umbilical stalk
Pre-eclampsia	Pre-eclampsia is a disorder occurring during late pregnancy or immediately following parturition, characterized by hypertension, edema, and proteinuria. Also called toxemia of pregnancy.
Preterm birth	Preterm birth is a live birth of less than 37 completed weeks of gestation.
Premature labor	Premature labor describes the contractions of the uterus less than 37 weeks in a pregnancy.
Presentation	Presentation is the part of the fetus lying over the pelvic inlet; the presenting body part of the fetus.
Polymalformative syndrome	Polymalformative syndrome is set of non-random birth defects deriving from the same cause. It involves multiple systems of the organism (eyes, ears, central nervous system, heart, musculoskeletal...). Its screening, mostly by clinical examination means, is systematically made at birth.

<b>Glossary Term</b>	<b>Definition</b>
Spina bifida	Spina bifida is a herniation of the meninges and/or spinal cord tissue through a bony defect of spine closure.
Spinal anesthesia	Spinal anesthesia or sub-arachnoidal block is a form of regional anesthesia involving the injection of local anesthetic into the cerebrospinal fluid.
Fetal death	Fetal death is a death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy and which is not an induced termination of pregnancy. The death is indicated by the fact that after such expulsion or extraction, the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of the voluntary muscles. Heartbeats are to be distinguished from fleeting respiratory efforts or gasps.
Metabolism disorder	Metabolism disorders are disorders that affect chemical processes that take place in living organisms, resulting in growth, generation of energy, elimination of wastes, and other body functions as they relate to the distribution of nutrients in the blood after digestion.
Ultrasound	Ultrasound study is a radiologic study using sound waves used in the assessment of gestational age, size, growth, anatomy, and blood flow of a fetus or in the assessment of maternal anatomy and blood flow.
Vaginal birth/spontaneous	Vaginal birth/spontaneous birth is the delivery of the entire fetus through the vagina by the natural force of labor with or without manual assistance from the delivery attendant.
Vertex Presentation	Vertex presentation is the presentation of the upper or back part of the infant's head

## X Birth and Fetal Death Reporting-Enhanced (BFDR-E) Profile

The Birth and Fetal Death Reporting-Enhanced (BFDR-E) Profile provides a means to capture and communicate information needed to report births and fetal deaths for vital registration purposes. BFDR-E builds upon the earlier Birth and Fetal Death Reporting (BFDR) Profile that utilizes actors and transactions defined in the ITI Retrieve Form for Data Capture (RFD) Profile to capture structured data using digital forms.

BFDR-E defines a specialized Labor and Delivery Summary (LDS-VR) CDA document. The LDS-VR document is used to prepopulate an electronic form (worksheet) that collects the information needed for submission to vital records. BFDR-E supports pre-population of the worksheet form using either the specialized LDS-VR document or a more general Labor and Delivery Summary (LDS) document that does not conform to all the further constraints of an LDS-VR document. Use of the LDS-VR Pre-population Option optimizes the initial Birth and Fetal Death Report form data population.

BFDR-E further defines a mechanism to transform form submission data and record it in a CDA document designed to exchange the information in a standard format. BFDR-E defines a Form Receiver CDA Exporter Actor to perform the transform on the form submission data and share that document with a Content Consumer. BFDR-E defines the IHE BFDR Document Template which adapts the HL7 BFDR CDA document template to support standard interchange of the information gathered from the form.

BFDR-E also defines a mechanism to transform form submission data and transmit it as a standard HL7 v2 message. The IHE BFDR Message adapts the HL7 V2.5.1 BFDR Message for this purpose. BFDR-E defines the BFDRfeed transaction to transmit this message. The BFDRfeed transaction is just like the VRDRfeed [QRPH-38] transaction defined in the QRPH Vital Records Profile, but carries a different message payload.

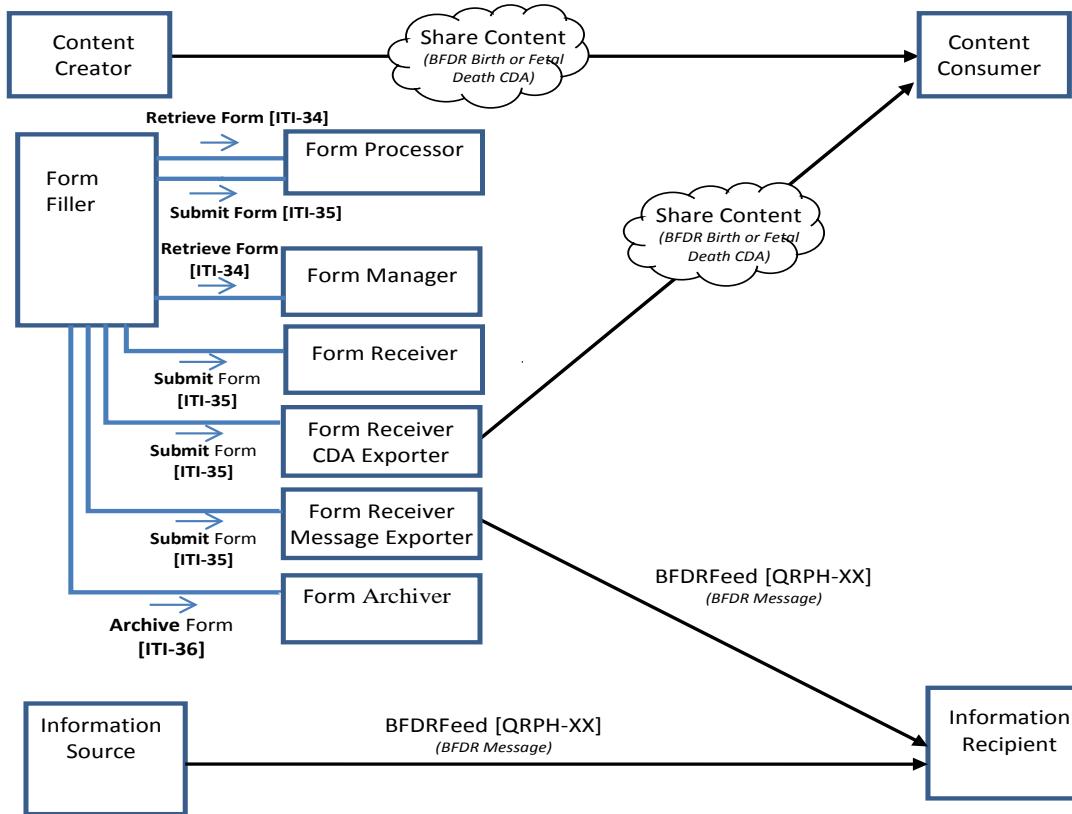

### X.1 Actors, Transactions, and Content Modules

This section defines the actors, transactions, and/or content modules in this profile. General definitions of actors are given in the Technical Frameworks General Introduction Appendix A at [http://www.ihe.net/Technical\\_Frameworks](http://www.ihe.net/Technical_Frameworks).

The BFDR-E Profile defines three ways to exchange data required for birth and fetal death reporting in an electronic form. First, creation of a BFDR Birth CDA Document Content and a BFDR Fetal Death CDA Document is supported. Second, communication of the BFDR content in an HL7 message is supported. Third, a form-based data collection method is supported using RFD transactions and pre-population mechanisms to supplement human data entry. A specialized LDS-VR document is specified to maximize the number of data elements that can be prepopulated in the form so as to minimize the amount of human data entry required. The form data may be used directly by a birth reporting system, or there may be further processing of the

form data to produce standard birth and fetal death content in the BFDR Birth CDA Document, the BFDR Fetal Death CDA Document, or the BFDR message format.

- 970 Figure X.1-1 shows the actors directly involved in the BFDR-E Profile and the relevant transactions between them.

- 975

**Figure X.1-1: BFDR-E Actor Diagram**

**Table X.1-1: BFDR Profile - Actors and Transactions**

Actors (see Note 1 and Note 2)	Transactions	Optionality	Section in Vol. 2
Form Filler	Retrieve Form [ITI-34]	R	ITI TF-2b: 3.34
	Submit Form [ITI-35]	R	ITI TF-2b: 3.35
	Archive Form [ITI-36]	O	ITI TF-2b: 3.36
Form Manager	Retrieve Form [ITI-34]	R	ITI TF-2b: 3.34
Form Processor	Retrieve Form [ITI-34]	R	ITI TF-2b: 3.34

<b>Actors (see Note 1 and Note 2)</b>	<b>Transactions</b>	<b>Optionality</b>	<b>Section in Vol. 2</b>
	Submit Form [ITI-35]	R	ITI TF-2b: 3.35
Form Receiver	Submit Form [ITI-35]	R	ITI TF-2b: 3.35
Form Receiver CDA Exporter	Submit Form [ITI-35]	R	ITI TF-2b: 3.35
Form Receiver Message Exporter	Submit Form [ITI-35]	R	ITI TF-2b: 3.35
	BFDR Feed [QRPH-37]	R	QRPH TF 2: 3.xx
Form Archiver	Archive Form [ITI-36]	R	ITI TF-2b: 3.36
Information Source	BFDRFeed [QRPH-37]	R	QRPH TF 2: 3.xx
Information Recipient	BFDRFeed [QRPH-37]	R	QRPH TF 2: 3.xx
Content Creator	NA	O	NA
Content Consumer	NA	O	NA

980 Note 1: Systems initiating communications of Birth and Fetal Death Reporting information SHALL implement either Content Creator (QRPH BFDR Document) or Information Source (QRPH BFDR Message), or Form Filler (with LDS or LDS-VR Option)

Note 2: Systems receiving/consuming communications of Birth and Fetal Death Reporting information SHALL implement either Content Consumer (QRPH BFDR Document), Information Recipient (QRPH BFDR Message), or one of the four Form Receiver Actors (Form Receiver, Form Receiver CDA Exporter, Form Receiver Message Exporter, or Form Processor).

985

## X.1.1 Actor Descriptions and Actor Profile Requirements

### X.1.1.1 Content Creator

990 The Content Creator SHALL be able to create both a valid CDA document which conforms to the IHE BFDR Birth Document template and a valid CDA document which conforms to the IHE BFDR Fetal Death Document template. These BFDR documents are defined in section QRPH 3:6.3.1.D1.5 (IHE BFDR Birth Document) for live births and in section QRPH 3:6.3.1.D2.5 (IHE BFDR Fetal Death Document) for fetal deaths.

The Content Creator SHALL conform to all requirements specified for the Content Creator Actor in the QRPH IHE Birth and Fetal Death Reporting (IHE BFDR) Integration Profile.

995

### X.1.1.2 Content Consumer

The Content Consumer SHALL consume both a valid CDA document which conforms to the IHE BFDR Birth Document template and a valid CDA document which conforms to the IHE BFDR Fetal Death Document template.

1000 The Content Consumer SHALL implement the Discrete Data Import Option when consuming a QRPH IHE BFDR Birth Document or IHE BFDR Fetal Death Document.

### X.1.1.3 Form Filler

The Form Filler Actor SHALL support requirements defined for the Form Filler in the ITI RFD Profile with the following qualifications:

- 1005 The Form Filler SHALL support XHTML and SHALL NOT support the XFORMS Option of the Retrieve Form [ITI-34] transaction.
- The Form Filler SHALL include functionality to initiate a Retrieve Form (ITI-34) transaction when a certifier is ready to enter birth or fetal death information for the purpose of completing the vital records information.
- 1010 The Form Filler SHALL support one of two possible pre-population options: The LDS Pre-pop Option or the LDS-VR Pre-pop Option.
- A Form Filler implementing the Pre-Pop Option SHALL supply a valid LDS Documents (1.3.6.1.4.1.19376.1.5.3.1.1.21.1.2 ) as the pre-prop document for the Retrieve Form (ITI-34) transaction.
  - A Form Filler implementing the LDS-VR Pre-pop Option SHALL supply a valid LDS-VR Document (1.3.6.1.4.1.19376.1.7.3.1.1.19.1.1) as the pre-prop document for the Retrieve Form (ITI-34) transaction.
- 1015 The Form Filler SHALL encode the prepData parameter of the Retrieve Form [ITI-34] transaction using the XML content of the pre-pop document.
- 1020 The Form Filler MAY support the Archive Form Option to support recording of the form submission data at an alternate actor identified by the Form Filler.
- In order to support the need to save a form for editing at a later time, the Form Filler SHALL be able to request a form for the same patient multiple times. (Further guidance on the workflow requirements to support this capability is outside the scope of this profile.)
- 1025 The Form Manager SHALL support all the requirements defined for the Form Manager in the ITI RFD Profile with the following qualifications:
- The Form Manager SHALL support XHTML and SHALL NOT support XFORMS of the Retrieve Form [ITI-34] transaction.
- 1030 The system fulfilling the Form Manager Actor in the BFDR-E Profile SHALL accept pre-pop data in the form of content defined by the IHE PCC LDS document template (Template id 1.3.6.1.4.1.19376.1.5.3.1.1.21.1.2) or the IHE QRPH LDS-VR document template (Template id 1.3.6.1.4.1.19376.1.7.3.1.1.19.1.1), and return a form that has been appropriately pre-populated based on the pre-population rules specified in 6.3.1.D3.4 Data Element Requirement Mappings for Form Pre-Population.
- 1035 If a form is requested for the same patient then the form manager shall supply the previously populated and saved form.

### **X.1.1.5 Form Receiver**

The Form Receiver is defined in the ITI RFD Profile.

- 1040 The Form Receiver SHALL receive the populated form from the Form Filler when the form is submitted. No further requirements are placed on the Form Receiver within the scope of this profile.

### **X.1.1.6 Form Processor**

The Form Processor is defined in the ITI RFD Profile.

- 1045 The Form Processor SHALL support XHTML and SHALL NOT support XFORMS of the Retrieve Form transaction.

The system fulfilling this role in the BFDR Profile SHALL accept pre-pop data in the form of content defined by the IHE PCC LDS Profile (1.3.6.1.4.1.19376.1.5.3.1.1.21.1.2 or the IHE QRPH (LDS-VR) (1.3.6.1.4.1.19376.1.7.3.1.1.19.1.1) and return a form that has been appropriately pre-populated based on the mapping rules specified in 6.3.1.D2.4 Data Element Requirement Mappings for Form Pre-Population.

1050 If the same request is submitted for the same patient then the form shall supply the partially filled and saved form.

1055 The Form Processor SHALL receive the populated form from the Form Filler when the form is submitted. No further requirements are placed on the Form Processor within the scope of this profile.

### **X.1.1.7 Form Receiver CDA Exporter**

The Form Receiver CDA Exporter receives data submitted through the Submit Form Transaction (ITI-35), transforms that data to create a CDA document, and shares that newly created CDA document with a Content Consumer. For BFDR, this transforms that data to create the BFDR Birth CDA Document Content (1.3.6.1.4.1.19376.1.7.3.1.1.19.2) defined in QRPH 3:6.3.1.D1 or the BFDR Fetal Death CDA Document Content (1.3.6.1.4.1.19376.1.7.3.1.1.19.3) defined in QRPH 3:6.3.1.D2, and shares that newly created BFDR content document with a Content Consumer. Detailed rules for the BFDR Birth CDA Document Content are fully defined in QRPH 3:6.3.1.D1. Detailed rules for the BFDR Fetal Death CDA Document Content are fully defined in QRPH 3:6.3.1.D2. Specification of the transformation rules from the US BFDR Form to the CDA content is defined in the BFDR-E Profile, volume 4 US Realm, Section 6.6.2 Form Data Element Mappings to Output Content Document.

### **X.1.1.8 Form Receiver Message Exporter**

1070 The Form Receiver Message Exporter receives data submitted through the Submit Form Transaction (ITI-35), transforms that data to an HL7 message and sends that message to an Information Recipient. For BFDR, this transforms that data to be in compliance with the requirements of the HL7 V.2.5.1 BFDRFeed transaction (QRPH-37) and sends that data to an

1075 Information Recipient using QRPH-37. Detailed rules for the BFDRFeed transaction are fully defined in QRPH 2:3.XX.4.1 BFDRFeed [QRPH-37]. Transformation rules from the form to the message content are fully specified in BFDR-E Profile Volume 4 US Realm, Section 6.6.3 Form Data Element Mappings to Output HL7 Message .

### **X.1.1.9 Form Archiver**

The actions of the Form Archiver are defined in the ITI RFD Profile.

1080 The Form Archiver MAY be leveraged to support traceability of the form data used to create submitted documents. No further refinements of that document are stated by this profile.

### **X.1.1.10 Information Source**

1085 The Information Source Actor is responsible for the creation of a BFDRFeed Message (QRPH-37) containing the Birth and Fetal Death Reporting attributes and transmitting this message to an Information Recipient. The Information Source SHALL transmit content as specified by in QRPH BFDR-E Volume 2.

### **X.1.1.11 Information Recipient**

The Information Recipient Actor is responsible for receiving the BFDRFeed Message (QRPH-37) containing the Birth and Fetal Death Reporting attributes from the Information Source.

## **X.2 Actor Options**

1090

**Table X.2-1: BFDR-E - Actors and Options**

<b>Actor</b>	<b>Option Name</b>	<b>Reference</b>
Content Creator	None	--
Content Consumer	View	PCC TF V1:3.4.1.1
	Document Import	PCC TF V1:3.4.1.2
	Discrete Data Import	PCC TF V1:3.4.1.4
Form Filler	Pre-Pop	QRPH: X.2.1
	VR Pre-Pop	QRPH: X.2.2
	Archive Form	QRPH: X.2.3
Form Manager	Form Pre-pop Option	QRPH TF-1: X.2.4
Form Processor	Form Pre-pop Option	QRPH TF-1: X.2.5
Form Receiver	None	--
Form Receiver CDA Exporter	None	--
Form Receiver Message Exporter	None	--
Form Archiver	None	--

Actor	Option Name	Reference
Information Source	None	--
Information Recipient	None	--

### X.2.1 Form Filler: Pre-Pop Option

1095 This option defines the document submission requirements placed on Form Fillers for providing pre-pop data to the Form Manager. The Form Filler's support for the Pre-Pop Option determines how pre-population data is handled when the Form Filler retrieves the form using ITI-34:

- If the Form Filler supports the Pre-Pop Option, the value of the pre-pop Data parameter in the Retrieve Form Request (see RFD Profile, ITI TF 2b:3.34.4.1.2) shall be a well-formed xml document as defined in the PCC Labor and Delivery Summary (LDS) Content Profile (1.3.6.1.4.1.19376.1.5.3.1.1.21.1.2, see Labor and Delivery Profiles Trial Implementation Supplement, Section Y.7). See QRPH 1: Appendix X for the specification of the desired pre-pop data.

### X.2.2 Form Filler: VR Pre-Pop Option

1105 This option defines the document submission requirements placed on Form Fillers for providing pre-pop data to the Form Manager, describing specific content and vocabulary constraints to the PCC LDS that will optimize the ability to process the clinical content to fill in the BFDR Form. The Form Filler's support for the VR Pre-Pop Option determines how pre-population data is handled when the Form Filler retrieves the form using ITI-34.

1110 If the Form Filler supports the VR Pre-Pop Option, the value of the pre-pop Data parameter in the Retrieve Form Request (see RFD Profile, ITI TF 2b:3.34.4.1.2) shall be a well-formed xml document as defined in the PCC Labor and Delivery Summary (LDS) Content Profile (see Labor and Delivery Profiles Trial Implementation Supplement, Section Y.7) as constrained by QRPH 3: 6.3.1.A for the specification of the LDS content required as and LDS-VR Document (1.3.6.1.4.1.19376.1.7.3.1.1.19.1.1).

### X.2.3 Form Filler: Archive Form Option

1115 If the Form Filler supports the Archive Form Option, it shall implement the Archive Form transaction ITI-36.

### X.2.4 Form Manager: Form Pre-Pop Option

1120 This option defines the pre-population rules and requirements placed on Form Managers for parsing and assigning pre-pop data attributes for the pre-populated form returned to the Form Filler in the ITI-34. Detailed prepopulation rules for the pre-pop attributes are fully defined in 6.6.1 Form Data Element Mappings from Pre-Pop Document.

### X.2.5 Form Processor: Form Pre-Pop Option

- 1125 This option defines the pre-population rules and requirements placed on Form Processors for parsing and assigning pre-pop data attributes for the pre-populated form returned to the Form Filler in the ITI-34. Detailed prepopulation rules for the pre-pop attributes are fully defined in 6.6.1 Form Data Element Mappings from Pre-Pop Document.

## X.3 BFDR-E Required Actor Groupings

This profile does not include any required groupings.

## X.4 BFDR-E Overview

- 1130 The National Vital Statistics System has a long and enduring history that serves to provide essential data on births and deaths within the United States and is the oldest and most successful example of inter-governmental data sharing in Public Health. Currently, these data typically are gathered by hospital personnel from the hospital's medical records using paper worksheets. The process of capturing Vital Records information manually is duplicative, labor-intensive, costly and can be error prone. As a result, the timeliness and quality of these data are adversely affected.
- 1135

### X.4.1 Concepts

- 1140 Sets of detailed specifications have been developed for collecting and reporting the items on the U.S. Standard Certificate of Live Birth and the U.S. Standard Report of Fetal Death. It is critical that all U.S. vital registration areas follow these standards to promote uniformity in data collection across registration areas. The best sources for specific data items are identified in the Birth and Fetal Death Edit Specifications for the 2003 Revisions of the U.S. Standard Certificate of Live Birth and the U.S. Standard Report of Fetal Death.

- 1145 Additionally, standard worksheets are used to enhance the collection of quality, reliable data. A common, standard form, entitled "Mother's Worksheet for Child's Birth Certificate", has been established to identify information to be collected directly from the mother. The "Facility Worksheet for the Live Birth Certificate" was developed to identify information for which the best sources are the mother's and infant's medical records. The use of separate worksheets promotes a standardized collection across states. The "Patient's Worksheet for the Report of Fetal Death" and the "Facility Worksheet for the Report of Fetal Death" have also been established for the purpose of reporting fetal death information.
- 1150

- 1155 The hospital is responsible for completing the Record of Live Birth in the jurisdiction's Electronic Birth Registration System (EBRS). Information collected from the mother on the Mother's Worksheet must be data entered into the EBRS. Facility Worksheet data transmitted electronically into the EBRS from the EHR must be reviewed for completeness and accuracy. The birth records specialist plays an essential role in gathering the information and ensuring that all information is complete before transmission to the vital registration system at the

states/jurisdictional vital record offices. Select birth data may be transmitted later to public health authorities as allowed by individual state statute and other vital records stakeholders.

1160 Example Forms:

- [Facility Worksheet \(<http://www.cdc.gov/nchs/data/dvs/facwksBF04.pdf>\)](http://www.cdc.gov/nchs/data/dvs/facwksBF04.pdf)
- [U.S. Standard Certificate of Live Birth \(<http://www.cdc.gov/nchs/data/dvs/birth11-03final-ACC.pdf>\)](http://www.cdc.gov/nchs/data/dvs/birth11-03final-ACC.pdf)

1165 [Note: The Mother's Worksheet includes legal and other attributes that are required to be obtained through direct data entry and are not specified by this profile](#)

In the following use cases, the birth information specialist (BIS) will review and complete the Facilities Worksheet using information that has already been prepopulated by the EHR system. The BIS verifies the accuracy of the information and submits the form. This may be constrained in the US Extension to support only the forms for data submission for specific jurisdictional implementations. The form is received by a system that is configured to transform the facilities worksheet information into a standard CDA document or HL7 message, depending upon the input format preferred by the vital registration system of the jurisdiction. The information is communicated to the vital registration system where further vital registration functions are addressed to formalize the birth certificate or fetal death report. The use case will also support the option for the CDA document or HL7 message to be generated directly by a system, without using form-based collection.

## X.4.2 Use Cases

### X.4.2.1 Use Case #1: Forms Data Capture with Messaging

1180 The Forms Data Capture with Messaging use case uses Retrieve Form for Data Capture (RFD) to present Facilities Worksheet for pre-population, and the Form Receiver system transforms the information into a BFDRFeed (QRPH-37) message to transmit the information to Public Health EBRS.

#### X.4.2.1.1 Use Case Description

1185 When the delivery has been documented in the system, a Labor and Delivery Summary document (LDS, LDS-VR) is created with Vital Record Birth and Fetal Death Reporting Content requirements. This summary document is provided as pre-population data to a public health IHE ITI Retrieve Form for Data Capture (RFD) Forms Manager. The RFD Form Receiver provides the content to the EBRS by way of a transform to the corresponding BFDRFeed (QRPH-37) message.

#### X.4.2.1.2 Processing Steps

##### X.4.2.1.2.1 Pre-conditions

A delivery has been documented in the EHR system.

#### **X.4.2.1.2.2 Main Flow**

1195 This flow captures the EBRS information using forms provided by public health and transmits the data that is captured to public health using HL7 Messaging (BFDRFeed).

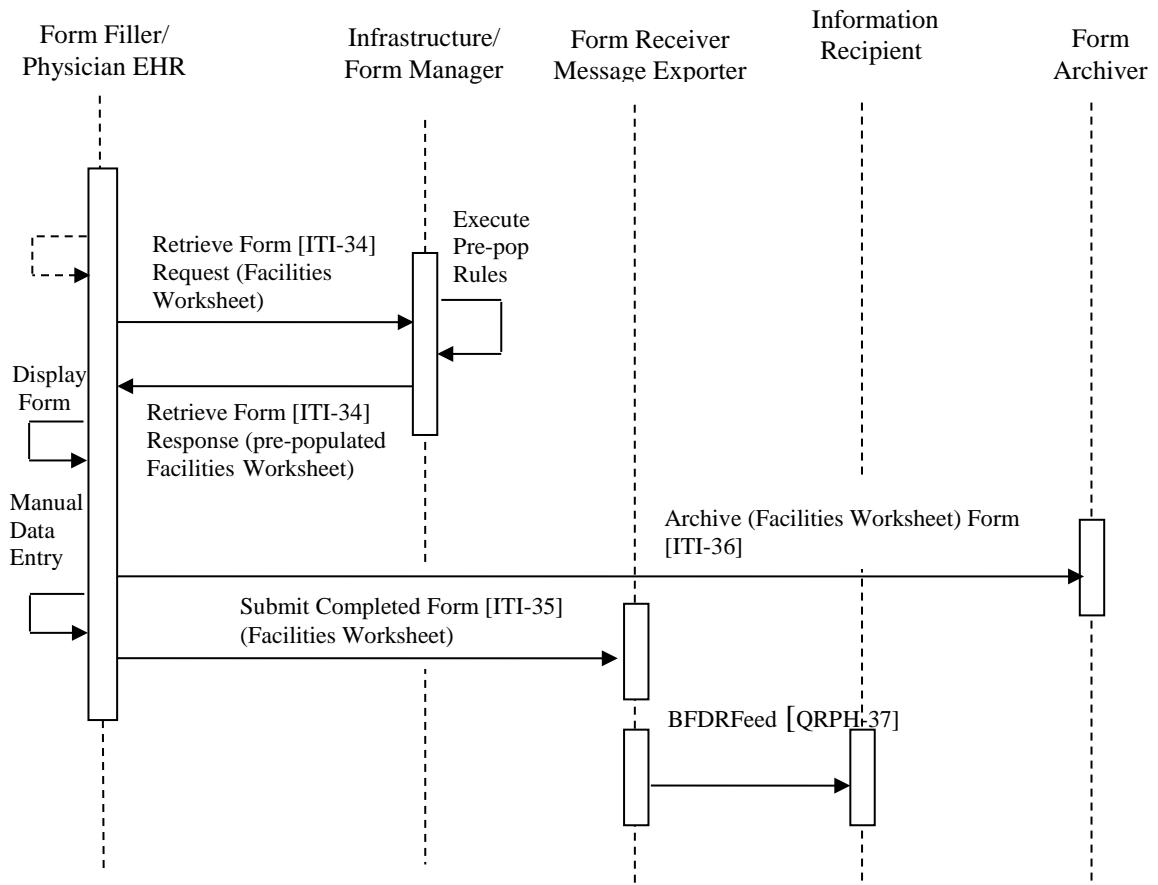

#### **X.4.2.1.2.3 Post-conditions**

The EBRS has received the data.

#### **X.4.2.1.3 Process Flow**

1200 The process flow of this profile is defined by the ITI RFD Profile. Please refer to ITI TF-1:17 for a description of the process flow for RFD. The Form Filler may be implemented by the birthing facility or by the child's clinician in instances of home birth etc. The process flow for the BFDR-E is described below.

1205 The provider EHR presents the Facilities Worksheet providing a LDS or LDS-VR document for Pre-population by the Form Manager. The birth information specialist completes the form, verifies the accuracy of all information, and submits the form. The Form Receiver transforms the information from the form into a HL7 BFDR message and transmits that message to the EBRS system using the Send BFDR Message (QRPH-37).

1210

**Figure X.4.2.1.3-1: Use Case 1 - Forms Data Capture with Messaging**

#### X.4.2.2 Use Case #2: Forms Data Capture with Document Submission

1215 The Forms Data Capture with Document Submission use case uses Retrieve Form for Data Capture (RFD) to present the Facilities Worksheet for pre-population, and the Form Receiver system transforms the information into a BFDR Birth CDA Document or a BFDR Fetal Death CDA Document to transmit the information to Public Health.

#### **X.4.2.2.1 Use Case Description**

When the delivery has been documented in the system, a Labor and Delivery Summary document (LDS, LDS-VR) is created with Vital Record Birth and Fetal Death Reporting Content requirements. This summary document is provided as pre-population data to a public health IHE ITI Retrieve Form for Data Capture (RFD) Forms Manager. The RFD Form Receiver provides the content to the EBRS by way of a transform to the corresponding BFDR Birth CDA Document or the BFDR Fetal Death CDA Document.

1225    **X.4.2.2 Processing Steps**

##### **X.4.2.2.2.1 Pre-conditions**

A delivery has been documented in the EHR system.

##### **X.4.2.2.2.2 Main Flow**

This flow captures the EBRS information using forms provided by public health and transmits the data that is captured to public health using the BFDR Birth CDA Document or the BFDR Fetal Death CDA Document.

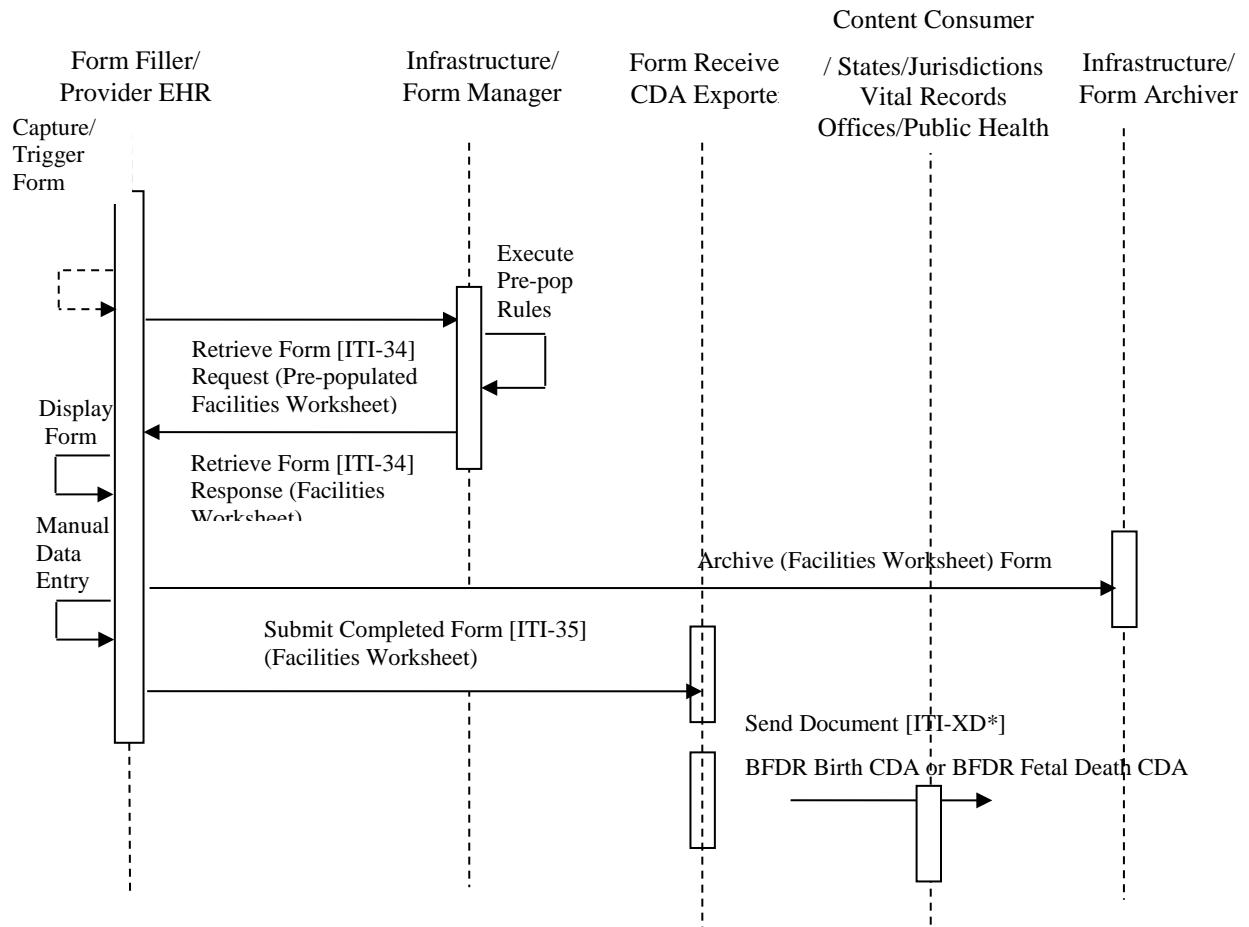

##### **X.4.2.2.2.3 Post-conditions**

The EBRS has received the data.

#### **X.4.2.2.3 Process Flow**

1235    The process flow of this profile is defined by the ITI RFD Profile. Please refer to ITI TF-1:17 for a description of the process flow for RFD. The Form Filler may be implemented by the birthing facility or by the child's clinician in instances of home birth etc. The process flow for the BFDR-E is described below.

1240    The provider EHR presents the Facilities Worksheet providing a LDS or LDS-VR document for Pre-population by the Form Manager. The birth information specialist completes the form, verifies the accuracy of all information, and submits the form. The RFD Form Receiver provides the content to the EBRS by way of a transform to the corresponding BFDR Birth CDA Document or the BFDR Fetal Death CDA Document.

1245

**Figure X.4.2.2.3-1: Use Case 2- Forms Data Capture with Document Submission**

#### X.4.2.3 Use Case #3: Native Forms Data Capture

The birth information specialist logs into the EHR and accesses the record of a newborn patient to begin the process of completing information required for birth and fetal death reporting. The EHR presents a form to the BIS that contains some data that has been pre-populated. She reviews the form, completes the remaining items, and verifies that the record is complete and accurate before submitting to transmit the data electronically into the EBRSS. The EBRSS record is saved, additional EBRSS processing completed, and the record is filed electronically by the EBRSS with the state vital statistics office.

1250

1255 **X.4.2.3.1 Use Case Description**

When the delivery has been documented in the system, a Labor and Delivery Summary document (LDS, LDS-VR) is created with Vital Record Birth and Fetal Death Reporting Content requirements. This document is provided as pre-population data to a public health IHE ITI Retrieve Form for Data Capture Forms Manager. The RFD Form Receiver information is consumed directly by the EBRS.

1260

**X.4.2.3.2 Processing Steps**

**X.4.2.3.2.1 Pre-conditions**

A delivery has been documented in the EHR system.

**X.4.2.3.2.2 Main Flow**

1265 This flow captures the EBRS information using forms provided by public health and incorporates the data that is captured using product defined methods.

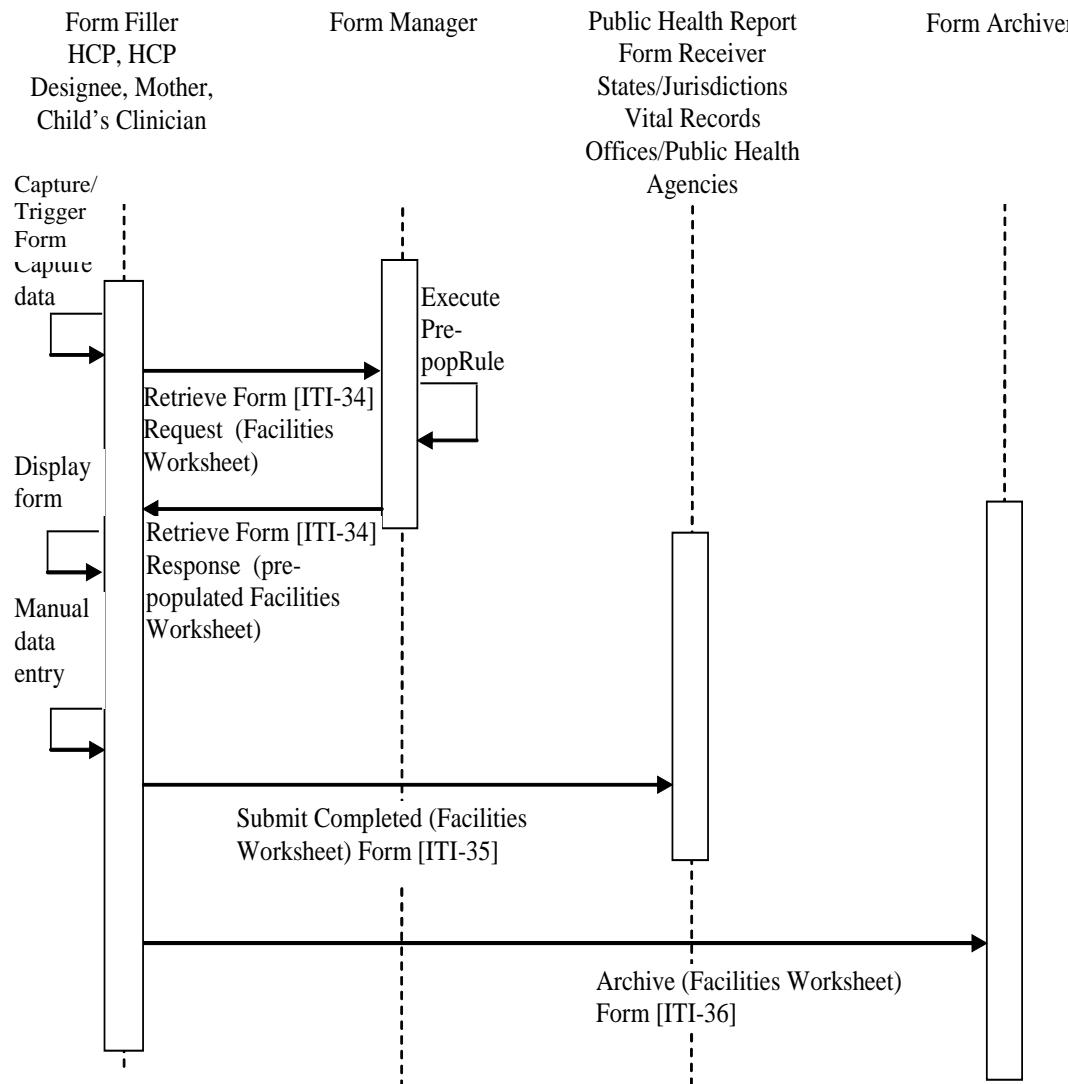

**X.4.2.3.2.3 Post-conditions**

The EBRS has received the data.

**X.4.2.3.3 Process Flow**

1270 The provider EHR presents the Facilities Worksheet providing a LDS or LDS-VR document for Pre-population by the Form Manager. The birth information specialist completes the form, verifies the accuracy of all information, and submits the form. The RFD Form Receiver information is consumed directly by the EBRS.

1275

**Figure X.4.2.3.3-1: Use Case 3 - Native Forms Data Capture**

1280

#### X.4.2.4 Use Case #4: EHR BFDR Messaging

The EHR BFDR Messaging use case creates the HL7 BFDR message directly and transmits the information to the EBRS.

#### X.4.2.4.1 Use Case Description

- 1285 When the delivery has been documented in the system, the EHR system creates an HL7 BFDR message and sends the message to the EBRS directly.

#### X.4.2.4.2 Processing Steps

##### X.4.2.4.2.1 Pre-conditions

A delivery has been documented in the EHR system.

- 1290 **X.4.2.4.2.2 Main Flow**

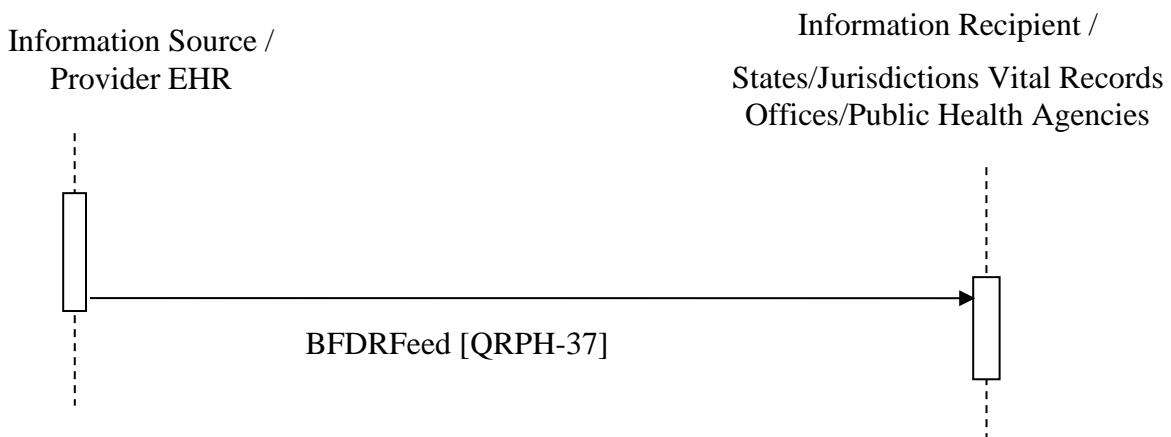

This flow sends the birth registration information to the EBRS using the BFDRFeed [QRPH-37].

##### X.4.2.4.2.3 Post-conditions

The EBRS has received the data.

#### X.4.2.4.3 Process Flow

- 1295 The provider EHR sends the HL7 BFDR message to the EBRS.

**Figure X.4.2.4.3-1: Use Case 4-EHR BFDR Messaging**

- 1300

#### X.4.2.5 Use Case #5: EHR BFDR Document Submission

The EHR BFDR Messaging use case creates the HL7 BFDR message directly and transmits the information to the EBRS.

#### X.4.2.5.1 Use Case Description

- 1305 When the delivery has been documented in the system,, the EHR system creates an HL7 BFDR message and sends the message to the EBRS directly.

#### X.4.2.5.2 Processing Steps

##### X.4.2.5.2.1 Pre-conditions

A delivery has been documented in the EHR system.

1310 **X.4.2.5.2.2 Main Flow**

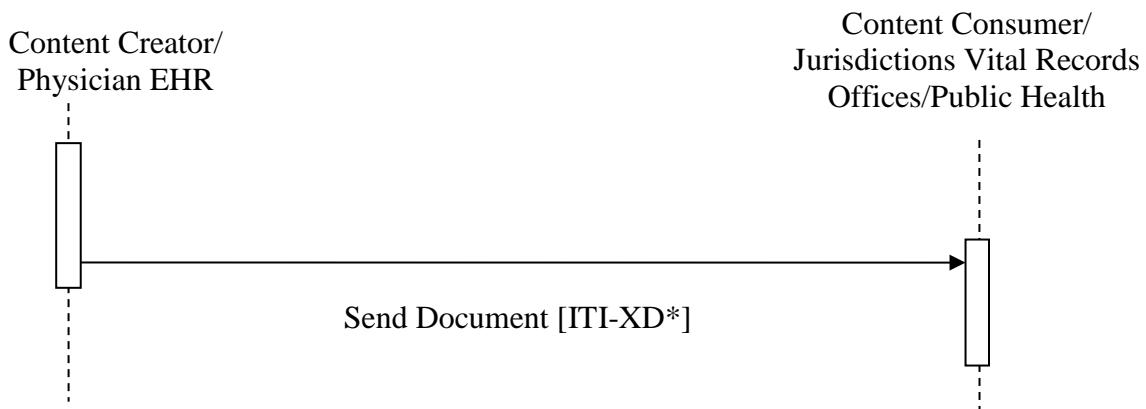

This flow sends the birth registration information to the EBRS using the BFDR Document (CDA).

##### X.4.2.5.2.3 Post-conditions

The EBRS has received the data.

1315 **X.4.2.5.3 Process Flow**

The provider EHR sends the HL7 BFDR message to the EBRS.

**Figure X.4.2.5.3-1: Use Case 5- EHR BFDR Document Submission**

1320

#### X.5 Security Considerations

BFDR includes clinical content related to the information subject. As such, it is anticipated that the transfers of Personal Health Information (PHI) will be protected. The IHE ITI ATNA Integration Profile SHOULD be implemented by all of the actors involved in the IHE

1325 transactions specified in this profile to protect node-to-node communication and to produce an audit trail of the PHI related actions when they exchange messages, though other private security mechanisms MAY be used to secure content within enterprise managed systems. Details regarding ATNA logging will be further described in Volume 2.

1330 The content of the form also results in a legal document, and the Form Manager MAY include a digital signature using ITI DSG to assure that the form content submitted cannot be changed.

For security purposes, when sending information specifically to vital records Electronic Registration Systems, systems will also need to know the identity of the user and the location to identify the data source. In this case, XUA MAY be utilized to support this implementation.

## X.6 Cross Profile Considerations

1335 The following informative narrative is offered as implementation guidance.

### **X.6.1 XDS.b, XDM, or XDR XDS.b, XDM, or XDR – Cross Enterprise Document Sharing.b, Cross Enterprise Document Media Interchange, or Cross Enterprise Document Reliable Interchange**

1340 The use of the IHE XD\* family of transactions is encouraged to support standards-based interoperability between systems acting as Content Creator and Content Consumer. The grouping of Content Creator and Content Consumer Actors with ITI XD\* Actors is defined in the PCC Technical Framework (PCC TF 1:3.7.1). Below is a summary of recommended IHE transport transactions that MAY be utilized by systems playing the roles of Content Creator or Content Consumer to support the use cases defined in this profile:

1345 • A Document Source in XDS.b, a Portable Media Creator in XDM, or a Document Source in XDR might be grouped with the BFDR Content Creator. A Document Consumer in XDS.b, a Portable Media Importer in XDM, or a Document Recipient in XDR might be grouped with the BFDR Content Consumer. A registry/repository-based infrastructure is defined by the IHE Cross Enterprise Document Sharing (XDS.b) that includes profile support that can be leveraged to facilitate retrieval of public health related information from a document sharing infrastructure: Multi-Patient Query (MPQ), Document Metadata Subscription (DSUB) and notification of availability of documents (NAV),

1350 • A media-based infrastructure is defined by the IHE Cross Enterprise Document Media Interchange (XDM) Profile. A Portable Media Creator in XDM might be grouped with the BFDR Content Creator. A Portable Media Importer in XDM might be grouped with the BFDR Content Consumer,

1355 • A reliable messaging-based infrastructure is defined by the IHE Cross Enterprise Document Reliable Interchange (XDR) Profile. A Document Source in XDR might be grouped with the BFDR Content Creator. A Document Recipient in XDR might be grouped with the BFDR Content Consumer,

- 1365
- All of these infrastructures support Security and privacy through the use of the Consistent Time (CT) and Audit Trail and Node Authentication (ATNA) Profiles. A Time Client in CT might be grouped with the BFDR Content Creator and the BFDR Content Consumer. A Secure Node and/or a Secure Application in ATNA might be grouped with the BFDR Content Creator and the BFDR Content Consumer.

Detailed description of these transactions can be found in the IHE IT Infrastructure Technical Framework.

### **X.6.2 Sharing Value Set (SVS)**

1370 Actors in the BFDR Profile may support the Sharing Value Set (SVS) Integration Profile in order to use a common uniform managed vocabulary for dynamic management of form mapping rules.

## **X.7 BFDR Data Elements**

This profile defines specific data element content. These data elements are used to create the BFDR Birth CDA Document or the BFDR Fetal Death CDA Document, generate the HL7 BFDR Message, or populate a form defined to gather the required structured data, such as the US BFDR Form. That set of data elements in the form are identified and defined in Appendix B.  
1375

# Appendices

## Appendix A – Sample Forms

## A.1 Sample Birth ReportingUS Facilities Worksheet

1380 The sample Birth Reporting Facilities Worksheet form included in this content profile reflects the U.S. Standard Certificate of Live Birth reporting requirements from the birthing facility. However, the BFDR Content Profile may be modified to include and accommodate international birth reporting requirements. Red-lined items in this sample form have been deprecated and are no longer collected.

Mother's medical record # \_\_\_\_\_  
Mother's name \_\_\_\_\_

**FINAL (2/5/04)**

### FACILITY WORKSHEET FOR THE LIVE BIRTH CERTIFICATE

*For pregnancies resulting in the births of two or more live-born infants, this worksheet should be completed for the 1st live born infant in the delivery. For each subsequent live-born infant, complete the "Attachment for Multiple Births." For any fetal loss in the pregnancy reportable under State reporting requirements, complete the "Facility Worksheet for the Fetal Death Report." For detailed definitions, instructions, information on sources, and common key words and abbreviations please see "The Guide to Completing Facility Worksheets for the Certificate of Live Birth."*

1. Facility name:<sup>\*</sup> \_\_\_\_\_  
(If not institution, give street and number)

2. Facility I.D. (National Provider Identifier): \_\_\_\_\_

3. City, Town or Location of birth: \_\_\_\_\_

4. County of birth: \_\_\_\_\_

5. Place of birth:

- Hospital
- Freestanding birthing center (Freestanding birthing center is defined as one which has no direct physical connection with an operative delivery center.)
- Home birth   
Planned to deliver at home     Yes                   No
- Clinic/Doctor's Office
- Other (specify, e.g., taxi cab, train, plane, etc.) \_\_\_\_\_

\*Facilities may wish to have pre-set responses (hard-copy and/or electronic) to questions 1-5 for births which occur at their institutions.

#### Prenatal

Sources: Prenatal care records, mother's medical records, labor and delivery records

Information for the following items should come from the mother's prenatal care records and from other medical reports in the mother's chart, as well as the infant's medical record. If the mother's prenatal care record is not in her hospital chart, please contact her prenatal care provider to obtain the record, or a copy of the prenatal care information. Preferred and acceptable sources are given before each section. Please do not provide information from sources other than those listed.

1385

## A.2 Sample US Fetal Death Facilities Worksheet

The sample Fetal Death Reporting Facilities Worksheet form included in this content profile reflects the U.S. Standard Report of Fetal Death reporting requirements from the birthing facility. However, the BFDR Content Profile may be modified to include and accommodate international fetal death reporting requirements.

1390

**6(a). Date of first prenatal care visit** (Prenatal care begins when a physician or other health professional first examines and/or counsels the pregnant woman as part of an ongoing program of care for the pregnancy):

M M   D D   Y Y Y Y

**No prenatal care** (The mother did not receive prenatal care at any time during the pregnancy. If this box is checked skip 6(b))

**6(b). Date of last prenatal care visit** (Enter the date of the last visit recorded in the mother's prenatal records):

M M   D D   Y Y Y Y

**7. Total number of prenatal care visits for this pregnancy** (Count only those visits recorded in the record.  
If none enter "0"): \_\_\_\_\_

**8. Date last normal menses began:**

M M   D D   Y Y Y Y

**9. Number of previous live births now living** (For multiple deliveries, includes live born infants born before this fetus in the multiple set):

\_\_\_\_\_ Number       None

**10. Number of previous live births now dead** (For multiple deliveries, includes live born infants born before this fetus in the multiple set who subsequently died):

\_\_\_\_\_ Number       None

**11. Date of last live birth:**

M M   D D   Y Y Y Y

**12. Total number of other pregnancy outcomes** (Include fetal losses of any gestational age- spontaneous losses, induced losses, and/or ectopic pregnancies. If this was a multiple delivery, include all fetal losses delivered before this fetus in the pregnancy):

\_\_\_\_\_ Number       None

**13. Date of last other pregnancy outcome** (Date when last pregnancy which did not result in a live birth ended):

M M   Y Y Y Y

**14. Risk factors in this pregnancy** (Check all that apply):

Diabetes - (Glucose intolerance requiring treatment)

- Prepregnancy** - (Diagnosis prior to this pregnancy)
- Gestational** - (Diagnosis in this pregnancy)

Hypertension - (Elevation of blood pressure above normal for age, gender, and physiological condition.)

**Prepregnancy** - (Chronic) (Elevation of blood pressure above normal for age, gender, and physiological condition diagnosed prior to the onset of this pregnancy)

**Gestational** - (PIH, preeclampsia) (Elevation of blood pressure above normal for age, gender, and physiological condition diagnosed during this pregnancy. May include proteinuria (protein in the urine) without seizures or coma and pathologic edema (generalized swelling, including swelling of the hands, legs and face).)

**Eclampsia** - (Pregnancy induced hypertension with proteinuria with generalized seizures or coma. May include pathologic edema)

**Previous preterm births** - (History of pregnancy(ies) terminating in a live birth of less than 37 completed weeks of gestation)

**Other previous poor pregnancy outcome** - (Includes perinatal death, small for gestational age/intrauterine growth restricted birth) - (History of pregnancies continuing into the 20th week of gestation and resulting in any of the listed outcomes. Perinatal death includes fetal and neonatal deaths.)

### A.3 Form Data Element Key for Sample US Facilities Worksheet

The following table reflects the mapping between the form elements in the sample Fetal Death Reporting Facilities Worksheet form above and the data elements described in Appendix B.

Data Element #	BFDR Data Element Code	Data Element Name
1	FNAME	<!-- 1. Facility name: Include the name of Facility where birth occurred-->
2	FNPI	<!-- 2. Facility I.D. (National Provider Identifier)-->
3	ADDRESS_D	<!-- 3. Facility: City, Town or Location of birth-->
4	CNAME	<!-- 4. Facility: County of birth -->
5	BPLACE	<!-- 5. Type of Place of birth
6	DOFP_YR, DOFP_MO, DOFP_DY	<!-- #6.(a) Date of first prenatal care visit -->
7	NPREV	<!-- #7. Total number of prenatal care visits for this pregnancy -->
8	DLMP_YR, DLMP_MO, DLMP_DY	<!-- #8. Date last normal menses began -->
9	PLBL	<!-- #9. Number of previous live births now living -->
10	PLBD	<!-- #10. Number of previous live births now dead -->
11	YLLB, MLLB	<!-- #11. Date of last live birth -->
12	POPO	<!-- #12. Total number of other pregnancy outcomes -->
13	YOPO, MOPO	<!-- #13. Date of last other pregnancy outcome-->
14	GDIAB, PHYPE, GHYPE, PPB, PPO, VB, INFT, PCES, NPCES	<!-- #14. Risk factors in this pregnancy -->
15	GON, SYPH, CHAM, HEPB, HEPC	<!-- 15. Infections present and/or treated during this pregnancy.
16	CERV, TOC, ECVS, ECVF	<!-- 16. Obstetric procedures-->
17	PROM, PRIC, PROL	<!-- 17. Onset of Labor -->
18	IDOB_YR, IDOB_MO, IDOB_DY	<!-- 18. Date of birth: -->
19	TB	<!-- 19. Time of birth -->
20		<!-- 20. Certifier's name and title: OMIT-->
21		<!-- 21. Date certified: OMIT-->
22	PAY	<!-- 22. Principal source of payment for this delivery-->
23	IRECNUM	<!-- 23. Infant's medical record number-->

IHE Quality, Research and Public Health Technical Framework Supplement – Birth and Fetal Death Reporting-Enhanced (BFDR-E)

37		<!-- 37. Were autopsy or histological placental examination results used in determining the cause of fetal death? OMIT -->
38	ETIME	<!-- 38. Estimated time of fetal death -->

## 1405 Appendix B – Data Element Definitions

The following data elements are used in Vital Records Birth and Fetal Death Reporting:

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
ANTI	Y	N	Abnormal conditions of the newborn: Antibiotics [received by the newborn for suspected neonatal sepsis]	Any antibacterial drug given systemically (intravenous or intramuscular.) For example, penicillin, ampicillin, gentamicin, cefotoxine, etc.)
AVEN1	Y	N	Abnormal conditions of the newborn: Assisted ventilation [required immediately following delivery]	Infant given manual breaths with bag and mask or bag and endotracheal tube within the first several minutes from birth for any duration. Excludes oxygen only and laryngoscopy for aspiration of meconium.
AVEN6	Y	N	Abnormal conditions of the newborn: Assisted ventilation for 6 or more hours	Infant given mechanical ventilation (breathing assistance) by any method for more than 6 hours. Includes conventional, high frequency and/or continuous positive pressure (CPAP).
BINJ	Y	N	Abnormal conditions of the newborn: Significant birth injury [ (skeletal fracture(s), peripheral nerve injury, and/or soft tissue/solid organ hemorrhage which requires intervention)]	Significant birth injury: (skeletal fracture(s), peripheral nerve injury and/or soft tissue/solid organ hemorrhage which requires intervention). Defined as present immediately following delivery or manifesting following delivery. Includes any bony fracture or weakness or loss of sensation, but excludes fractured clavicles and transient facial nerve palsy. Soft tissue hemorrhage requiring evaluation and/or treatment includes sub-galeal (progressive extravasation within the scalp) hemorrhage, giant cephalohematoma, extensive truncal, facial and /or extremity ecchymosis accompanied by evidence of anemia and/or hypovolemia and or hypotension. Solid organ hemorrhage includes subcapsular hematoma of the liver, fractures of the spleen, or adrenal hematoma. All require confirmation by diagnostic imaging or exploratory laparotomy.
NICU	Y	N	Abnormal conditions of the newborn: Admission to NICU	Admission into a facility or unit staffed and equipped to provide continuous mechanical ventilatory support for the newborn.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
SEIZ	Y	N	Abnormal conditions of the newborn: Seizure or serious neurologic dysfunction	Seizure defined as any involuntary repetitive, convulsive movement or behavior. Serious neurologic dysfunction defined as severe alteration of alertness such as obtundation, stupor, or coma, i.e., hypoxicischemic encephalopathy. Excludes lethargy or hypotonia in the absence of other neurologic findings. Exclude symptoms associated with CNS congenital anomalies.
SURF	Y	N	Abnormal conditions of the newborn:[Newborn given] Surfactant replacement therapy	Newborn given surfactant replacement therapy: Endotracheal instillation of a surface active suspension for the treatment of surfactant deficiency either due to preterm birth or pulmonary injury resulting in decreased lung compliance (respiratory distress). Includes both artificial and extracted natural surfactant.
NOA54	Y	N	Abnormal conditions of the newborn: None of the above	None of the listed abnormal conditions of the newborn.
DNA54	Y	N	Abnormal conditions of the newborn: Pending	If the data are not available when the abnormal conditions of the newborn are provided, the pending flag is set. The item will appear on the final review screen for entry before information is sent to vital records.
APGAR5	Y	N	Apgar Score: 5 Minute	A systematic measure for evaluating the physical condition of the infant at specific intervals following birth. Enter the infant's Apgar score at 5 minutes.
APGAR10	Y	N	Apgar Score: 10 Minute	A systematic measure for evaluating the physical condition of the infant at specific intervals following birth. If the score at 5 minutes is less than 6, enter the infant's Apgar score at 10 minutes.
ATTENDN	Y	Y	Attendant's name	The name of the attendant (the person responsible for delivering the child), their title, and their National Provider Identification (NPI) Number.
ATTEND	Y	Y	Attendant's title:	The title of the person (attendant) responsible for delivering the child. The attendant at birth is defined as the individual physically present at the delivery who is responsible for the delivery. Titles include: M.D. (doctor of medicine); D.O. (doctor of osteopathy); CNM/CM (certified nurse midwife/certified midwife); Other midwife (midwife other than a CNM/CM); and Other (specify)

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
ATTENDS	Y	Y	Attendant: Other specified	The specific title of the person (attendant) responsible for delivering the child if not included in the list of provided titles. Examples include nurse, father, police officer, and EMS technician. The attendant at birth is defined as the individual physically present at the delivery who is responsible for the delivery.
NPI	Y	Y	Attendant's NPI	The National Provider Identification Number (NPI) of the person (attendant) responsible for delivering the child.
BWG	Y	N	Birth weight (Infant's)	Infant's birthweight in grams.
BWO	Y	N	Birth weight (Infant's)	Infant's birthweight in ounces.
BWP	Y	N	Birth weight (Infant's)	Infant's birthweight in pounds.
ANTB	Y	N	Characteristics of labor and delivery: Antibiotics[received by the mother during labor]	Antibiotics received by the mother during labor. Includes antibacterial medications given systemically (intravenous or intramuscular) to the mother in the interval between the onset of labor and the actual delivery. Includes: Ampicillin, Penicillin, Clindamycin, Erythromycin, Gentamicin, Cefotaxime, and Ceftriaxone. Information about the course of labor and delivery.
AUGL	Y	N	Characteristics of labor and delivery: Augmentation of labor	Augmentation of labor: Stimulation of uterine contractions by drug or manipulative technique with the intent to reduce the time of delivery (i.e., after labor has begun). Information about the course of labor and delivery.
CHOR	Y	N	Characteristics of labor and delivery: [Clinical] Chorioamnionitis [diagnosed during labor or maternal temperature >=38 degrees (100.4F)]	Any recorded maternal temperature at or above 38oC (100.4oF) or clinical diagnosis of chorioamnionitis during labor made by the delivery attendant (usually includes more than one of the following: fever, uterine tenderness and/or irritability, leukocytosis, or fetal tachycardia). Information about the course of labor and delivery.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
ESAN	Y	N	Characteristics of labor and delivery: [Epidural or spinal]Anesthesia[during labor]	Administration to the mother of a regional anesthetic to control the pain of labor. Delivery of the agent into a limited space with the distribution of the analgesic effect limited to the lower body. Information about the course of labor and delivery.
INDL	Y	N	Characteristics of labor and delivery: Induction of labor	Induction of labor: Initiation of uterine contractions by medical and/or surgical means for the purpose of delivery before the spontaneous onset of labor (i.e., before labor has begun). Information about the course of labor and delivery.
STER	Y	N	Characteristics of labor and delivery: Steroids [(glucocorticoids) for fetal lung maturation received by the mother prior to delivery]	Steroids (glucocorticoids): For fetal lung maturation received by the mother before delivery. Includes: Betamethasone dexamethasone, or hydrocortisone specifically given to accelerate fetal lung maturation in anticipation of preterm delivery. Does not include: Steroid medication given to the mother as an anti- inflammatory treatment before or after delivery. Information about the course of labor and delivery.
NOA04	Y	N	Characteristics of labor and delivery: None of the above	None of the listed characteristics of labor and delivery that provide information about the course of labor and delivery.
DNA04	Y	N	Characteristics of labor and delivery: Pending	If the data are not available when the characteristics of labor and delivery are provided, the pending flag is set. The item will appear on the final review screen for entry before information is sent to vital records.
IDOB_YR	Y	N	Child: Date of Birth: Year	The infant's date (year) of birth.
IDOB_MO	Y	N	Child: Date of Birth: Month	The infant's date (month) of birth.
IDOB_DY	Y	N	Child: Date of Birth: Day	The infant's date (day) of birth.
KIDFNAME	Y	Y	Child's First Name/ Name of Fetus(optional at the discretion of the parents)	The legal name (first) of the child as provided by the parents.
KIDMNAME	Y	Y	Child's Middle Name / Name of Fetus(optional at the discretion of the parents)	The legal name (middle) of the child as provided by the parents.
KIDLNAME	Y	Y	Child's Last Name / Name of Fetus(optional at the discretion of the parents)	The legal name (last) of the child as provided by the parents.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
KIDSUFFIX	Y	Y	Child's Last Name Suffix:	The legal name (suffix) of the child as provided by the parents.
BFED	Y	N	Child: Infant being breastfed?	Information on whether the infant was being breast-fed during the period between birth and discharge from the hospital.
ILIV	Y	N	Child: Infant living at time of report?	Information on the infant's survival. Check "Yes" if the infant is living. Check "Yes" if the infant has already been discharged to home care. Check "No" if it is known that the infant has died. If the infant was transferred but the status is known, indicate the known status.
IRECNUM	Y	N	Child: Newborn Medical Record Number	The medical record number assigned to the newborn.
ISEX	Y	N	Child: (infant) Sex -	The sex of the infant.
ITRAN	Y	N	Child: Infant transferred within 24 hours of delivery/name the facility FTRAN	Transfer status of the infant within 24 hours after delivery.
FTRAN	Y	N	Child: Infant transferred within 24 hours of delivery/name the facility	
TB	Y	N	Child: Time of Birth	The infant's time of birth.
ANEN	Y	Y	Congenital anomalies of the Newborn: Anencephaly	Partial or complete absence of the brain and skull. Also called anencephalus, acrania, or absent brain .Also includes infants with craniorachischisis (anencephaly with a contiguous spine defect).
CCHD	Y	Y	Congenital anomalies of the Newborn: Cyanotic congenital heart disease	Congenital heart defects that cause cyanosis.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
CDH	Y	Y	Congenital anomalies of the Newborn:- Congenital diaphragmatic hernia	Defect in the formation of the diaphragm allowing herniation of abdominal organs into the thoracic cavity.
CDIC	Y	Y	Congenital anomalies of the Newborn: Suspected chromosomal disorder karyotype confirmed	Suspected chromosomal disorder karyotype confirmed
CDIS	Y	Y	Congenital anomalies of the Newborn: Suspected chromosomal Disorder	Suspected chromosomal disorder: Includes any constellation of congenital malformations resulting from or compatible with known syndromes caused by detectable defects in chromosome structure.
CDIP	Y	Y	Congenital anomalies of the Newborn: Suspected chromosomal disorder karyotype pending	Suspected chromosomal disorder karyotype pending.
CL	Y	Y	Congenital anomalies of the Newborn: Cleft Lip with or without Cleft Palate	Cleft lip with or without cleft palate refers to incomplete closure of the lip. Cleft lip may be unilateral, bilateral or median; all should be included in this category.
CP	Y	Y	Congenital anomalies of the Newborn: Cleft Palate alone	Cleft palate refers to incomplete fusion of the palatal shelves. This may be limited to the soft palate or may also extend into the hard palate. Cleft palate in the presence of cleft lip should be included in the “Cleft Lip with or without cleft Palate” category, rather than here.
DOWC	Y	Y	Congenital anomalies of the Newborn: Down Karyotype Confirmed	Down Karyotype confirmed
DOWN	Y	Y	Congenital anomalies of the Newborn: Down Syndrome	Down Syndrome: Trisomy 21
DOWP	Y	Y	Congenital anomalies of the Newborn: Down Karyotype Pending	Down Karyotype pending

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
GAST	Y	Y	Congenital anomalies of the Newborn: Gastroschisis	An abnormality of the anterior abdominal wall, lateral to the umbilicus, resulting in herniation of the abdominal contents directly into the amniotic cavity. Differentiated from omphalocele by the location of the defect and absence of a protective membrane.
HYPO	Y	Y	Congenital anomalies of the Newborn: Hypospadias	Hypospadias: Incomplete closure of the male urethra resulting in the urethral meatus opening on the ventral surface of the penis. Includes first degree – on the glans ventral to the tip, second degree – in the coronal sulcus, and third degree – on the penile shaft.
LIMB	Y	Y	Congenital anomalies of the Newborn: Limb reduction defect	Limb reduction defect: (excluding congenital amputation and dwarfing syndromes) Complete or partial absence of a portion of an extremity secondary to failure to develop.
MNSB	Y	Y	Congenital anomalies of the Newborn: Meningomyelocele/ Spina Bifida	Spina bifida is herniation of the meninges and/or spinal cord tissue through a bony defect of spine closure. Meningomyelocele is herniation of meninges and spinal cord tissue. Meningocele (herniation of meninges without spinal cord tissue) should also be included in this category. Both open and closed (covered with skin) lesions should be included. Do not include Spina bifida occulta (a midline bony spinal defect without protrusion of the spinal cord or meninges).
OMPH	Y	Y	Congenital anomalies of the Newborn: Omphalocele	A defect in the anterior abdominal wall, accompanied by herniation of some abdominal organs through a widened umbilical ring into the umbilical stalk. The defect is covered by a membrane, (different from gastroschisis, see below), although this sac may rupture. Also called exomphalos. Umbilical hernia (completely covered by skin) should not be included in this category.
NOA55	Y	Y	Congenital anomalies of the Newborn: None of the anomalies listed above	None of the listed congenital anomalies of the newborn or fetus.
DNA55	Y	Y	Congenital anomalies of the Newborn: Pending	If the data are not available when the abnormal conditions of the newborn are provided, the pending flag is set. The item will appear on the final review screen for entry before information is sent to vital records.
YLLB	Y	Y	Date of last live birth:	The year of birth of the last live-born infant.
MLLB	Y	Y	Date of last live birth:	The month of birth of the last live-born infant.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
DLMP_DY	Y	Y	Date last Normal Menses began:	The date the mother's last normal menstrual period began.
DLMP_MO	Y	Y	Date last Normal Menses began:	The date the mother's last normal menstrual period began.
DLMP_YR	Y	Y	Date last Normal Menses began:	The date the mother's last normal menstrual period began.
YOPO	Y	Y	Date of Last Other Pregnancy Outcome: Year	The date (year) that the last pregnancy that did not result in a live birth ended. Includes pregnancy losses at any gestation age. Examples: spontaneous or induced losses or ectopic pregnancy.
MOPO	Y	Y	Date of Last Other Pregnancy Outcome: Month	The date (month) that the last pregnancy that did not result in a live birth ended. Includes pregnancy losses at any gestation age. Examples: spontaneous or induced losses or ectopic pregnancy.
ADDRESS_D	Y	Y	Facility Address	
FNAME	Y	Y	Facility Name (if Not institution, give street and number)	The name of the facility where the delivery took place.
FNPI	Y	Y	Facility National Provider Identifier	National Provider Identifier.
CHAM	Y	Y	Infections present and treated during this pregnancy: Chlamydia	Chlamydia: A positive test for Chlamydia trachomatis. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.
GON	Y	Y	Infections present and treated during this pregnancy: Gonorrhea	Gonorrhea: A positive test/culture for Neisseria gonorrhoea. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
HEPB	Y	YN	Infections present and treated during this pregnancy: Hepatitis B	Hepatitis B (HBV, serum hepatitis): A positive test for the hepatitis B virus. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.
HEPC	Y	YN	Infections present and treated during this pregnancy: Hepatitis C	Hepatitis C (non-A, non-B hepatitis (HCV)): A positive test for the hepatitis C virus. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.
SYPH	Y	Y	Infections present and treated during this pregnancy: Syphilis	Syphilis (also called lues) A positive test for Treponema pallidum. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.
NOA02	Y	Y	Infections present and treated during this pregnancy: None of the above	None of the listed infections were present and treated during this pregnancy.
AINT	Y	Y	Maternal Morbidity: - Admission to Intensive care [unit]	Admission to intensive care unit: Any admission, planned or unplanned, of the mother to a facility/unit designated as providing intensive care. Serious complications experienced by the mother associated with labor and delivery.
MTR	Y	Y	Maternal Morbidity: Maternal Transfusion	Maternal transfusion: Includes infusion of whole blood or packed red blood cells within the period specified. Serious complications experienced by the mother associated with labor and delivery.
PLAC	Y	Y	Maternal Morbidity: [Third or fourth degree] perineal laceration	Third or fourth degree perineal laceration: 3rd degree laceration extends completely through the perineal skin, vaginal mucosa, perineal body and anal sphincter. 4th degree laceration is all of the above with extension through the rectal mucosa. Serious complications experienced by the mother associated with labor and delivery.
RUT	Y	Y	Maternal Morbidity: Ruptured Uterus	Ruptured Uterus: Tearing of the uterine wall. Serious complications experienced by the mother associated with labor and delivery.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
UHYS	Y	Y	Maternal Morbidity: Unplanned hysterectomy	Unplanned hysterectomy: Surgical removal of the uterus that was not planned prior to admission for delivery. Includes an anticipated or possible but not definitively planned procedure. Serious complications experienced by the mother associated with labor and delivery.
UOPR	Y	Y	Maternal Morbidity: Unplanned operat[ing]ion [room procedure following delivery]	Unplanned operating room procedure following delivery: Any transfer of the mother back to a surgical area for an operative procedure that was not planned prior to the admission for delivery. Excludes postpartum tubal ligations. Serious complications experienced by the mother associated with labor and delivery.
NOA05	Y	Y	Maternal Morbidity:None of the above  NOTE: NOA05 is also used for onset of labor	None of the listed serious complications experienced by the mother associated with labor and delivery.
PRES	Y	Y	Method of Delivery: Fetal presentation [at birth]: Cephalic	The physical process by which the complete delivery of the fetus was affected. Fetal presentation at birth - Cephalic: Presenting part of the fetus listed as vertex, occiput anterior (OA), occiput posterior (OP); Breech: Presenting part of the fetus listed as breech, complete breech, frank breech, footling breech; Other: Any other presentation not listed above.
ROUT	Y	Y	Method of Delivery: [Final]Route and method of delivery	The physical process by which the complete delivery of the fetus was affected. Includes: Vaginal/spontaneous: delivery of the entire fetus through the vagina by the nature force of labor with or without manual assistance from the delivery attendant; Cesarean: Extraction of the fetus, placenta, and membranes through an incision in the maternal abdominal and uterine walls.
TLAB	Y	Y	Method of Delivery: Trial of labor attempted	If cesarean, indicate if a trial of labor was attempted (labor was allowed, augmented, or induced with plans for a vaginal delivery).
MFNAME	Y	Y	Mother's Current Legal Name: First Name	The current legal first name of the mother.
MMNAME	Y	Y	Mother's Current Legal Name: Middle Name	The current legal middle name of the mother.
MLNAME	Y	Y	Mother's Current Legal Name: Last Name	The current legal last name of the mother.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
MSUFF	Y	Y	Mother's Current Legal Name: suffix	The current legal name suffix of the mother.
HFT	Y	Y	Mother's Height: Feet	Mother's height feet
HIN	Y	Y	Mother's Height: Inches	Mother's height inches
MRECNUM	Y	Y	Mother's medical record number	The mother's medical record number for this facility admission
PWGT	Y	Y	Mother's pre-pregnancy weight	The mother's prepregnancy weight
NFACL	Y	Y	Mother: If Mother transferred for maternal medical or fetal indications for delivery, enter name of facility mother transferred from.	Indicates the name of the facility the mother was transferred from if the mother was transferred from another facility. Transfers include hospital to hospital, birth facility to hospital, etc. Does not include home to hospital.
TRAN	Y	Y	Mother transferred for maternal medical or fetal indications for delivery?	Indicates if the mother was transferred from another facility. Transfers include hospital to hospital, birth facility to hospital, etc. Does not include home to hospital.
DWGT	Y	Y	Mother's weight at delivery	The mother's weight at the time of delivery.
POPO	Y	Y	Number of other pregnancy outcomes	Total number of other pregnancy outcomes that did not result in a live birth. Includes pregnancy losses of any gestation age. Examples: spontaneous or induced losses or ectopic pregnancy.
PLBD	Y	Y	Number of previous live births now dead (do not include this child)	The total number of previous live-born infants now dead.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
PLBL	Y	Y	Number of previous live births now living (do not include this child)	The total number of previous live-born infants now living.
OWGEST	Y	Y	Obstetric Estimate of Gestation	The best obstetric estimate of the infant's gestation in completed weeks based on the birth attendant's final estimate of <b>gestation</b> . This estimate of gestation should be determined by all perinatal factors and assessments such as ultrasound, but not the neonatal exam. Ultrasound taken early in pregnancy is preferred.
CERV	Y	N	Obstetric procedures: Cervical cerclage	Cervical cerclage: Circumferential banding or suture of the cervix to prevent or treat dilation. Includes: MacDonald's suture; Shirodkar procedure; and Abdominal cerclage via laparotomy. Obstetric procedures: Medical treatment or invasive/manipulative procedure performed during this pregnancy to treat the pregnancy or to manage labor and/or delivery.
ECVF	Y	N	Obstetric procedures: Failed External cephalic Version	Failed External cephalic version: Failed attempt to convert a fetus from a nonvertex to a vertex presentation by external manipulation. Obstetric procedures: Medical treatment or invasive/manipulative procedure performed during this pregnancy to treat the pregnancy or to manage labor and/or delivery.
ECVS	Y	N	Obstetric procedures: Successful External cephalic version	Successful External cephalic version: Successful conversion of a fetus from a nonvertex to a vertex presentation by external manipulation. Obstetric procedures: Medical treatment or invasive/manipulative procedure performed during this pregnancy to treat the pregnancy or to manage labor and/or delivery.
TOC	Y	N	Obstetric procedures: Tocolysis	Tocolysis: Administration of any agent with the intent to inhibit preterm uterine contractions to extend the length of the pregnancy. Medications: Magnesium sulfate (for preterm labor); Terbutaline; Indocin (for preterm labor). Obstetric procedures: Medical treatment or invasive/manipulative procedure performed during this pregnancy to treat the pregnancy or to manage labor and/or delivery.
NOA03	Y	N	Obstetric procedures: None of the above	None of the listed obstetric procedures were performed for medical treatment or invasive/manipulative procedures during this pregnancy to treat the pregnancy or to manage labor and/or delivery.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
PROM	Y	N	Onset of labor: Premature Rupture	Premature Rupture of the Membranes (prolonged $\geq 12$ hours): Spontaneous tearing of the amniotic sac, (natural breaking of the “bag of waters”), 12 hours or more before labor begins. Serious complications experienced by the mother associated with labor and delivery.
PRIC	Y	N	Onset of labor: Precipitous Labor	Precipitous labor (<3hours): Labor that progresses rapidly and lasts for less than 3 hours. Serious complications experienced by the mother associated with labor and delivery.
PROL	Y	N	Onset of labor: Prolonged Labor	Prolonged labor ( $\geq 20$ hours): Labor that progresses slowly and lasts for 20 hours or more. Serious complications experienced by the mother associated with labor and delivery.
NOA05	Y	N	Onset of labor: None of the above NOTE: NOA05 is also used for Maternal Morbidity	None of the listed serious complications experienced by the mother associated with labor and delivery.
SFN	Y	Y	Place where birth occurred: State Facility Number	
FLOC	Y	Y	Place where birth occurred: Facility City/Town	
CNAME	Y	Y	Place where birth occurred: County Name	
CNTYO	Y	Y	Place where birth occurred: County Code	
BPLACE	Y	N	Place where birth occurred: Birth Place	
PLUR	Y	Y	Plurality	The number of fetuses delivered live or dead at any time in the pregnancy regardless of gestational age or if the fetuses were delivered at different dates in the pregnancy. (“Reabsorbed” fetuses, those which are not “delivered” (expulsed or extracted from the mother) should not be counted.)
DOFP_MO	Y	Y	Prenatal care visits: Date of first prenatal care visit: Month	The month a physician or other health care professional first examined and/or counseled the pregnant woman for the pregnancy.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
DOFP_DY	Y	Y	Date of first prenatal care visit: Day	The day a physician or other health care professional first examined and/or counseled the pregnant woman for the pregnancy.
DOFP_YR	Y	Y	Date of first prenatal care visit: Year	The year a physician or other health care professional first examined and/or counseled the pregnant woman for the pregnancy.
NPREV	Y	Y	Prenatal care visits: Total number of prenatal visits for this pregnancy	The total number of visits recorded in the record.
PAY	Y	N	Principal source of payment for this delivery	The principal source of payment at the time of delivery: Includes: Private insurance (Blue Cross/Blue Shield, Aetna, etc.); Medicaid (or a comparable State program); Self-pay (no third party identified); Other (Indian Health Service, CHAMPUS/ TRICARE, other government [Federal, State, local]); Unknown
PDIAB	Y	Y	Risk factors in this pregnancy: Prepregnancy Diabetes	Prepregnancy Diabetes (diagnosis of glucose intolerance requiring treatment before this pregnancy).
GDIAB	Y	Y	Risk factors in this pregnancy: Gestational Diabetes	Gestational Diabetes (diagnosis of glucose intolerance requiring treatment during this pregnancy).
PHYPE	Y	Y	Risk factors in this pregnancy: Prepregnancy Hypertension	Prepregnancy (Chronic) Hypertension (Elevation of blood pressure above normal for age, gender, and physiological condition with diagnosis prior to the onset of this pregnancy. Does not include gestational (pregnancy induced) hypertension (PIH).)
GHYPE	Y	Y	Risk factors in this pregnancy: Gestational Hypertension	Gestational Hypertension (Elevation of blood pressure above normal for age, gender, and physiological condition with diagnosis in this pregnancy (pregnancy-induced hypertension or preeclampsia).
EHYPE	Y	Y	Risk factors in this pregnancy: Eclampsia	Eclampsia Hypertension (Elevation of blood pressure above normal for age, gender, and physiological condition with proteinuria with generalized seizures or coma. May include pathologic edema.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
PPB	Y	Y	Risk factors in this pregnancy: Previous preterm births	History of pregnancy(ies) terminating in a live birth of less than 37 completed weeks of gestation.
INFT	Y	Y	Risk factors in this pregnancy: Infertility treatment	Any assisted reproductive treatment used to initiate the pregnancy. Includes: Drugs (such as Clomid, Pergonal); Artificial insemination; Technical procedures (such as in-vitro fertilization).
INFT_DRG	Y	Y	Risk factors in this pregnancy: Infertility: Fertility Enhancing Drugs, AI	Fertility-enhancing drugs, artificial insemination or intrauterine insemination Any fertility enhancing drugs (e.g., Clomid, Pergonal), artificial insemination or intrauterine insemination used to initiate the pregnancy.
INFT_ART	Y	Y	Risk factors in this pregnancy: Infertility: Asst. Rep. Technology	Assisted reproductive technology (e.g., in vitro fertilization (IVF), gamete intrafallopian transfer GIFT)) Any assisted reproductive technology (ART/technical procedures (e.g., IVF, GIFT, ZIFT)) used to initiate the pregnancy.
PCES	Y	Y	Risk factors in this pregnancy: Previous cesarean	Previous delivery by extracting the fetus, placenta, and membranes through an incision in the mother's abdominal and uterine walls.
NPCES	Y	Y	Risk factors in this pregnancy: Number of previous cesareans	Number of previous deliveries extracting the fetus, placenta, and membranes through an incision in the mother's abdominal and uterine walls.
NOA01	Y	Y	Risk factors in this pregnancy: None of the above	The patient had none of the listed risk factors in this pregnancy.
SORD	Y	Y	Set Order	Order this infant was delivered in the set.
FSEX	Y	N	Child: (infant) Sex -	The sex of the infant.
FDOD_YR	N	Y		Date of Delivery (Fetus) Year
FDOD_MO	N	Y		Date of Delivery (Fetus) Month

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
FDOD_DY	N	Y		Date of Delivery (Fetus) Day
ETIME	N	Y	Estimated Time of Fetal Death	Item to indicate when the fetus died with respect to labor and assessment.
LIVEB	Y	N	Not single birth - specify number of infants in this delivery born alive.	Specify the number of infants in this delivery born alive
FDTH	N	Y	Number of fetal deaths	Specify the number of fetal deaths in this delivery
HYST	N	Y	Method of Delivery: Hysterotomy/Hysterectomy?	Hysterotomy/Hysterectomy was the physical process by which the complete delivery of the fetus was affected.  Hysterotomy: Incision into the uterus extending into the uterine cavity. May be performed vaginally or transabdominally. Hysterectomy: Surgical removal of the uterus. May be performed abdominally or vaginally.
TD	N	Y	Time of delivery	Hour and minute fetus was delivered.
AUTOP	N	Y	Was an autopsy performed?	Information on whether or not an autopsy was performed
FWO	N	Y	Weight of Fetus (in ounces)	Fetus' weight in ounces.
FWG	N	Y	Weight of Fetus (grams preferred, specify unit)	Fetus' weight in grams.
FWP	N	Y	Weight of Fetus (in pounds)	Fetus' weight in pounds.
LM	N	Y	Infections present and treated during this pregnancy: Listeria	Listeria: A diagnosis of or positive test for Listeria monocytogenes. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.
GBS	N	Y	Infections present and treated during this pregnancy: Group B Streptococcus	Group B Streptococcus: A diagnosis of or positive test for Streptococcus agalactiae or group B streptococcus. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>
CMV	N	Y	Infections present and treated during this pregnancy: Cytomeglovirus	Cytomegalovirus (CMV): A diagnosis of or positive test for Cytomegalovirus. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.
B19	N	Y	Infections present and treated during this pregnancy: Parvovirus	Parvovirus: A diagnosis of or positive test for Parvovirus B19. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record
HISTOP	N	Y	Was a Histological Placental Examination performed?	Information on whether or not a histological placental examination was performed
TOXO	N	Y	Infections present and treated during this pregnancy: Toxoplasmosis	Toxoplasmosis: A diagnosis of or positive test for Toxoplasma gondii.
COD18a1	N	Y	Initiating Cause/Condition - Rupture of membranes prior to onset of labor	NA
COD18a2	N	Y	Initiating Cause/Condition - Abruptio placenta	NA
COD18a3	N	Y	Initiating Cause/Condition - Placental insufficiency	NA
COD18a4	N	Y	Initiating Cause/Condition - Prolapsed cord	NA
COD18a5	N	Y	Initiating Cause/Condition - Chorioamnionitis	NA
COD18a6	N	Y	Initiating Cause/Condition - Other complications of placenta, cord, or membranes	NA
COD18a7	N	Y	Initiating Cause/Condition - Unknown	NA

<b>Attribute Name</b>	<b>Used in Birth</b>	<b>Used in Fetal Death</b>	<b>Birth and Fetal Death Report Data Element</b>	<b>Description</b>

## Volume 2 – Transactions

1410

*Add Section 3.37*

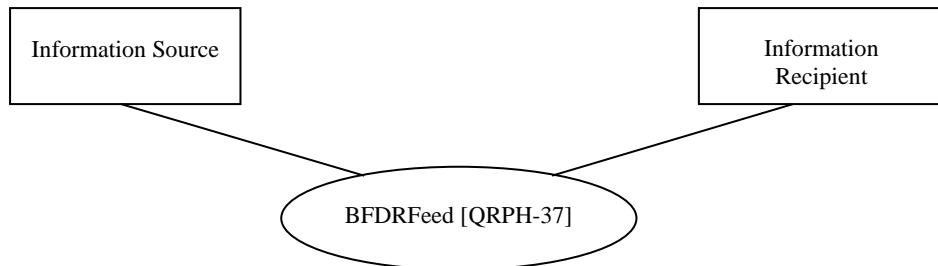

### 3.37 BFDRFeed [QRPH-37]

#### 3.37.1 Scope

1415

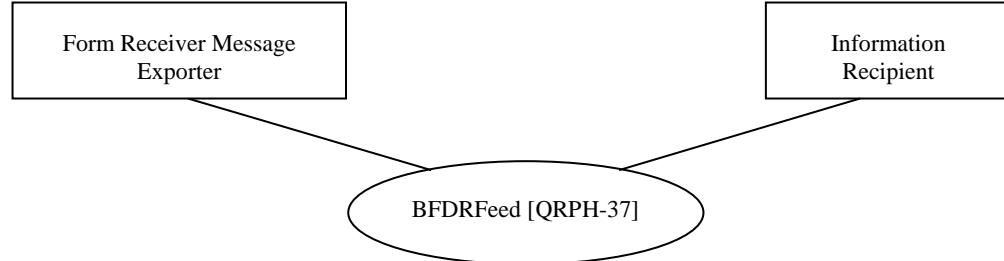

This transaction is used to communicate clinician-sourced birth and fetal death information from the Information Source to the Information Recipient. This transaction may alternatively be initiated by a Form Receiver Message Exporter and communicated to the Information Recipient. This transaction uses the Health Level Seven International (HL7) Version 2.5.1 Implementation Guide (IG): Reporting Birth and Fetal Death information From the EHR to Vital Records Draft Standard for Trial Use (DSTU).

#### 3.37.2 Actor Roles

1420

**Figure 3.37.2-1: Use Case Diagram between Information Source and Information Recipient**

1425

**Figure 3.37.2-2: Use Case Diagram between Form Receiver Message Exporter and Information Recipient**

The Roles in this transaction are defined in the following table and may be played by the actors shown here:

1430

**Table 3.37.2-1: Actor Roles**

<b>Actor:</b>	Information Source
<b>Role:</b>	The Information Source Actor is responsible for creating and transmitting an HL7 V2.5.1 message to an Information Recipient.
<b>Actor:</b>	Information Recipient
<b>Role:</b>	The Information Recipient Actor is responsible for receiving the HL7 V2.5.1 message from an Information Source or from a Form Receiver Message Exporter.
<b>Actor:</b>	Form Receiver Message Exporter
<b>Role:</b>	The Form Receiver Message Exporter receives data submitted through the Submit Form Transaction (ITI-35), transforms that data to be in compliance with the requirements of the HL7 V.2.5.1 BFDR transaction (QRPH-37) and sends that data to an Information Recipient using QRPH-37.

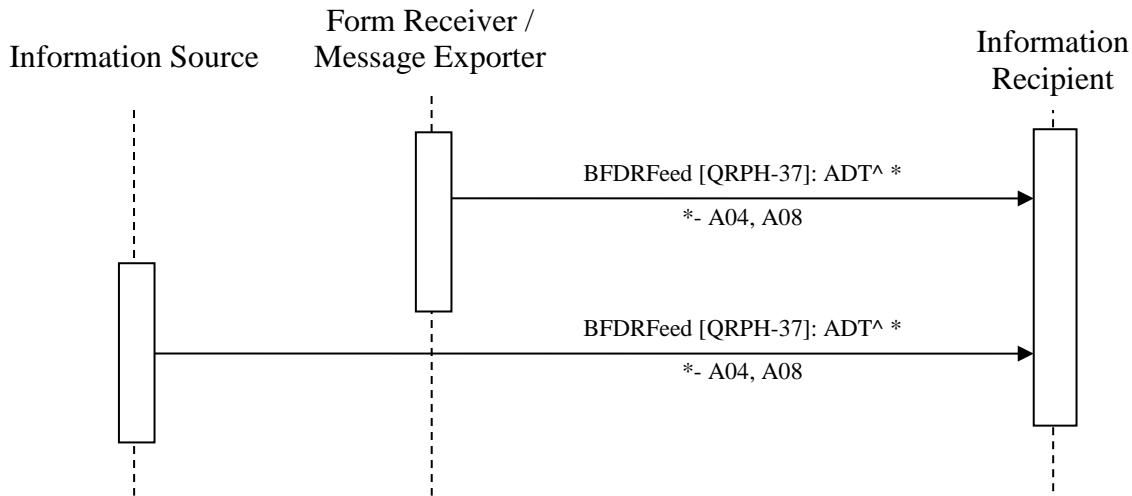

### 3.37.3 Referenced Standards

1. Health Level Seven International (HL7) Version 2.5.1 Implementation Guide (IG): Reporting Birth and Fetal Death information From the EHR to Vital Records Draft Standard for Trial Use (DSTU)

1435

2. Birth Edit Specifications for the 2003 Revision of the U.S. Standard Certificate of Live Birth
3. Fetal Death Edit Specifications for the 2003 Revision of the U.S. Standard Report of Fetal Death

1440 **3.37.4 Interaction Diagram**

**3.37.4.1 BFDRFeed [QRPH-37]**

1445 This transaction transmits the HL7 V2.5.1 formatted message containing the clinician-sourced birth and fetal death information from **Information Source** or the **Form Receiver / Message Exporter** to the **Information Recipient**. A given **Information Recipient** implemented at a public health jurisdiction may receive this transaction from multiple sources.

**3.37.4.1.1 Trigger Events**

1450 When a delivery has been documented in the system, an **Information Source Actor** will trigger one of the Admit/Register or Update messages:

- A04 – Report Birth Information Record
- A04 - Report Fetal Death Information Record (NOTE: there may not be a patient chart for a fetal death, but this is not an issue for surfacing the form)

1455 Changes to patient demographics (e.g., change in patient name, patient address, etc.) or updating previously transmitted information about a live birth or fetal death to Vital Records shall trigger the following Admit/Register or Update message:

- A08 – Revise Birth Information Record
- A08 - Revise Fetal Death Information Record

### **3.37.4.1.2 Message Semantics**

1460 The segments of the message listed below are required, and their detailed descriptions are provided in the following subsections.

Required segments for the BFDRFeed [QRPH-37] are defined below. Other segments are optional. This transaction requires Information Source Actors to include some attributes not already required by the corresponding HL7 message. This transaction does not require

1465 Information Recipient Actors to attributes beyond what is required by the corresponding HL7 message.

**Table 3.37.4.1.2-1: BFDRFeed [QRPH-37]**

<b>ADT</b>	<b>Patient Administration Message</b>	<b>Optionality</b>	<b>Chapter in HL7 BFDR V2.5.1 IG</b>
MSH	Message Header	R	5.1
SFT	Software Segment	R	5.2
EVN	Event Type	R	5.5
PID	Patient Identification	R	5.6
NK1	Next of Kin/Associated Parties	R	5.7
PV1	Patient Visit Information	R	5.8
ROL	Role	R	5.9
OBX	Observation/Result	R	5.10
MSA	Acknowledgement	R	5.3
ERR	Error	R	5.4

1470 **3.37.4.1.2.1 MSH Segment**

The Information Source SHALL populate MSH segment. The Information Recipient SHALL have the ability to accept and process this segment.

MSH segment shall be constructed as defined in ITI TF-2x: C.2.2 “Message Control”.

### **3.37.4.1.2.2 SFT Segment**

1475 The Information Source SHALL populate SFT segment. The Information Recipient SHALL have the ability to accept and process this segment.

No further constraints are required of the SFT segment from the corresponding HL7 message (Health Level Seven International (HL7) Version 2.5.1 Implementation Guide (IG): Reporting Birth and Fetal Death information From the EHR to Vital Records Draft Standard for Trial Use (DSTU)).

#### **3.37.4.1.2.3 EVN Segment**

The Information Source SHALL populate EVN segment. The Information Recipient SHALL have the ability to accept and process this segment.

See ITI TF-2x: C.2.4 for the list of all required and optional fields within the optional EVN segment.

#### **3.37.4.1.2.4 PID Segment**

The Information Source SHALL populate the PID segment. The Information Recipient SHALL have the ability to accept and process this segment.

In order to allow for consistency with environments that support IHE ITI PIX or IHE ITI PDQ, the PID segment shall be constructed to be consistent with ITI TF-2a: 3.8.4.1.2.3 as described below.

Bolded text in the table below highlights areas in this profile that are different from the underlying HL7 message (Health Level Seven International (HL7) Version 2.5.1 Implementation Guide (IG): Reporting Birth and Fetal Death information From the EHR to Vital Records Draft Standard for Trial Use (DSTU)).

**Table 3.37.4.1.2.4-1: IHE Profile - PID segment**

<b>SEQ</b>	<b>LEN</b>	<b>DT</b>	<b>OPT</b>	<b>TBL#</b>	<b>ITEM #</b>	<b>ELEMENT NAME</b>	<b>Description/Comments</b>
1	4	SI	R		00104	Set ID - Patient ID	Literal Value: ‘1’.
2	20	CX	X		00105	Patient ID	Deprecated as of HL7 Version 2.3.1. See PID-3 Patient Identifier List.
3	250	CX	R		00106	Patient Identifier List	Field used to convey all types of patient/person identifiers. Use of the Medical Record Number is expected if the birth or fetal death takes place in a hospital, or the baby is admitted to one.
4	20	CX	X		00107	Alternate Patient ID	Deprecated as of HL7 Version 2.3.1. See PID-3.

IHE Quality, Research and Public Health Technical Framework Supplement – Birth and Fetal Death Reporting-Enhanced (BFDR-E)

<b>SEQ</b>	<b>LEN</b>	<b>DT</b>	<b>OPT</b>	<b>TBL#</b>	<b>ITEM #</b>	<b>ELEMENT NAME</b>	<b>Description/Comments</b>
5	250	XPN	R		00108	Patient Name	New born name. In the case of fetal death reporting, a name may be provided at the discretion of the parents. When the name is not provided, a value must still be placed in this field since the field is required. In that case, HL7 recommends the following:  ~^^^^^U . The "U" for the name type code in the second name indicates that it is unspecified. Since there may be no name components populated, this means there is no legal name, nor is there an alias. This guide will interpret this sequence to mean there is no newborn or fetus name.
6	250	XPN	R2		00109	Mother's Maiden Name	<b>Not supported in IG, but Optional in PIX</b> <b>When the attribute is populated, the Information receiver shall either accept this information or ignore the attribute, but SHALL NOT raise an application error</b>
7	26	TS	R2		00110	Date/Time of Birth	Newborn's date and time of birth, or (for fetal death reporting) the delivery date and time of delivery of the fetus. Format: YYYY[MM[DD[HH[MM[SS[.S[S[S]]]]]]]]][+/-ZZZZ]
8	1	IS	R2	0001	00111	Administrative Sex	Sex of the newborn or of the fetus.
9	250	XPN	X		00112	Patient Alias	Deprecated as of HL7 Version 2.4. See PID-5 Patient Name.

Adapted from the HL7 standard, Version 2.5.1

- 1500 This message shall use the field PID-3 Patient Identifier List to convey the Patient ID uniquely identifying the patient within a given Patient Identification Domain.  
The Information Source Actor shall provide the patient identifier in the ID component (first component) of the PID-3 field (PID-3.1). The Information Source Actor shall use component PID-3.4 to convey the assigning authority (Patient Identification Domain) of the patient

1505 identifier. Either the first subcomponent (namespace ID) or the second and third subcomponents (universal ID and universal ID type) shall be populated. If all three subcomponents are populated, the first subcomponent shall reference the same entity as is referenced by the second and third components.

#### **3.37.4.1.2.5 NK1 Segment**

1510 The Information Source SHALL populate NK1 segment. The Information Recipient SHALL have the ability to accept and process this segment.

No further constraints are required of the NK1 segment from the corresponding HL7 message (Health Level Seven International (HL7) Version 2.5.1 Implementation Guide (IG): Reporting Birth and Fetal Death information From the EHR to Vital Records Draft Standard for Trial Use (DSTU)).

1515

#### **3.37.4.1.2.6 PV1 Segment**

The Information Source SHALL populate PV1 segment. The Information Recipient SHALL have the ability to accept and process this segment.

1520

No further constraints are required of the PV1 segment from the corresponding HL7 message (Health Level Seven International (HL7) Version 2.5.1 Implementation Guide (IG): Reporting Birth and Fetal Death information From the EHR to Vital Records Draft Standard for Trial Use (DSTU)).

#### **3.37.4.1.2.7 ROL Segment**

1525

The Information Source SHALL populate ROL segment. The Information Recipient SHALL have the ability to accept and process this segment.

No further constraints are required of the ROL segment from the corresponding HL7 message (Health Level Seven International (HL7) Version 2.5.1 Implementation Guide (IG): Reporting Birth and Fetal Death information From the EHR to Vital Records Draft Standard for Trial Use (DSTU)).

1530

#### **3.37.4.1.2.8 OBX Segment**

The Information Source SHALL populate OBX segment. All OBX observations SHALL be included. If there are no observations available (e.g., injury information, cause of death), then the appropriate flavor of NULL SHALL be communicated. The Information Recipient SHALL have the ability to accept and process this segment.

1535

No further constraints are required of the OBX segment from the corresponding HL7 message (Health Level Seven International (HL7) Version 2.5.1 Implementation Guide (IG): Reporting Birth and Fetal Death information From the EHR to Vital Records Draft Standard for Trial Use (DSTU)).

### 3.37.4.1.3 Expected Actions

1540

#### 3.37.4.1.3.1 ACK

Having received the ADT message from the Information Source, the Information Recipient SHALL parse this message and integrate its content, and then an applicative acknowledgement message is sent back to the Information Source. This General Acknowledgement Message ACK SHALL be built according to the HL7 V2.5.1 standard, following the acknowledgement rules described in IHE ITI TF-2:C.2.3 (IHE ITI TF-2: Appendix C.2.3).

1545

### 3.37.5 Security Considerations

#### 3.37.5.1 Security Audit Considerations BFDRFeed [QRPH-37] (ADT)

1550

The QRPH-37 (ADT) transactions are to be audited as “PHI Export” events, as defined in ITI TF-2a: Table 3.20.6-1. The actors involved in the transaction shall create audit data in conformance with DICOM (Supp 95) “Export”. The following tables show items that are required to be part of the audit record for these specific BFDRFeed transactions.

##### 3.37.5.1.1 Information Source Actor audit message

	Field Name	Opt	Value Constraints
<b>Event AuditMessage / EventIdentification</b>	EventID	M	EV(110106, DCM, “Export”)
	EventActionCode	M	“C” (create)
	EventDateTime	M	not specialized
	EventOutcomeIndicator	M	not specialized
	EventTypeCode	M	EV(“QRPH-37”, “IHE Transactions”, “BFDRFeed”)
Source (Information Source Actor) (1)			
Human Requestor (0..n)			
Destination (Information Recipient Actor) (1)			
Audit Source (Information Source Actor) (1)			
Patient (1)			

1555

Where:

<b>Source AuditMessage/ ActiveParticipant</b>	<i>UserID</i>	M	The identity of the Information Source Actor facility and sending application from the HL7 message; concatenated together, separated by the   character.
	<i>AlternativeUserID</i>	M	The process ID as used within the local operating system in the local system logs.
	<i>UserName</i>	U	<i>not specialized</i>
	<i>UserIsRequestor</i>	M	<i>not specialized</i>
	<i>RoleIDCode</i>	M	EV(110153, DCM, “Source”)
	<i>NetworkAccessPointTypeCode</i>	M	“1” for machine (DNS) name, “2” for IP address
	<i>NetworkAccessPointID</i>	M	The machine name or IP address, as specified in RFC 3881.

<b>Human Requestor (if known) AuditMessage/ ActiveParticipant</b>	<i>UserID</i>	M	Identity of the human that initiated the transaction.
	<i>AlternativeUserID</i>	U	<i>not specialized</i>
	<i>UserName</i>	U	<i>not specialized</i>
	<i>UserIsRequestor</i>	M	<i>not specialized</i>
	<i>RoleIDCode</i>	U	Access Control role(s) the user holds that allows this transaction.
	<i>NetworkAccessPointTypeCode</i>	NA	
	<i>NetworkAccessPointID</i>	NA	

<b>Destination AuditMessage/ ActiveParticipant</b>	<i>UserID</i>	M	The identity of the Information Recipient Public Health Organization and receiving application from the HL7 message; concatenated together, separated by the   character.
	<i>AlternativeUserID</i>	M	<i>not specialized</i>
	<i>UserName</i>	U	<i>not specialized</i>
	<i>UserIsRequestor</i>	M	<i>not specialized</i>
	<i>RoleIDCode</i>	M	EV(110152, DCM, “Destination”)
	<i>NetworkAccessPointTypeCode</i>	M	“1” for machine (DNS) name, “2” for IP address
	<i>NetworkAccessPointID</i>	M	The machine name or IP address, as specified in RFC 3881.

<b>Audit Source AuditMessage/ AuditSourceIdentification</b>	<i>AuditSourceID</i>	U	<i>not specialized</i>
	<i>AuditEnterpriseSiteID</i>	U	<i>not specialized</i>
	<i>AuditSourceTypeCode</i>	U	<i>not specialized</i>

1560

<b>Patient</b>	ParticipantObjectTypeCode	M	“1” (person)
----------------	---------------------------	---	--------------

	<i>ParticipantObjectIDTypeCode</i>	M	EV(2, RFC-3881, “Patient Number”)
	<i>ParticipantObjectSensitivity</i>	U	<i>not specialized</i>
	<i>ParticipantObjectID</i>	M	The patient ID in HL7 CX format.
	<i>ParticipantObjectName</i>	U	<i>not specialized</i>
	<i>ParticipantObjectQuery</i>	U	<i>not specialized</i>
	<i>ParticipantObjectDetail</i>	M	Type=MSH-10 (the literal string), Value=the value of MSH-10 (from the message content, base64 encoded)

### 3.Y.5.2 Security Audit Considerations – Retrieve Form [ITI-34] audit message

- 1570 When the Retrieve Form Transaction in the Birth and Fetal Death Reporting Profile is supporting a PHI-Export event, as defined in ITI TF-2a: Table 3.20.6-1, the actors involved in the transaction SHALL create audit log data in conformance with Retrieve Form ([ITI-34]) audit messages as defined in QRPH 5.Z.3.1 Retrieve Form ([ITI-34]) audit messages where such PHI Audit required by Jurisdictional Law.

### 3.Y.5.3 Security Audit Considerations – Submit Form ([ITI-35]) audit messages

The Submit Form Transaction MAY be a PHI-Export event, as defined in ITI TF-2a: Table 3.20.6-1. The actors involved in the transaction SHALL create audit data in conformance with Retrieve Form ([ITI-34]) audit messages as defined in QRPH 5.Z.3.2 Submit Form ([ITI-35]) audit messages where such PHI Audit is required by Jurisdictional Law.

1580 **3.Y.5.4 Security Audit Considerations –Archive Form ([ITI-36]) audit messages audit messages**

The Archive Form Transaction MAY be a PHI-Export event, as defined in ITI TF-2a: Table 3.20.6-1. The actors involved in the transaction SHALL create audit data in conformance with Retrieve Form ([ITI-34]) audit messages as defined in QRPH 5.Z.3.3 Archive Form ([ITI-35]) audit messages where such PHI Audit is required by Jurisdictional Law.

**6.3.1.D1.4 Data Element Mapping to CDA**

Refer to Volume 4, 6.6.2 for mapping from BFDR Form data elements to the output the BFDR Birth CDA Document or the BFDR Fetal Death CDA Document.

**6.3.1.D1.5 Content Module Specifications**

1625 This section specifies the header and body content modules which comprise the document-level Content Module. Templates constraining the information are listed by id.

1630

Sections that are used according to the definitions in other specifications are identified with the relevant specification document. Additional constraints on vocabulary value sets, not specifically constrained within the section template, are also identified. Header constraints to the parent HL7 CDA document for Reporting Birth Information from a Clinical Setting to Vital Records are identified. Only the constrained sections and clinical statements are listed here, but there are additional requirements in the HL7 CDA Implementation Guide.

### 6.3.1.D1.5.1 Document Constraints

1635 **6.3.1.D1.5.2 Header Constraints - Further Vocabulary or Conditional Constraints**

**6.3.1.D1.5.2.1 Mother's Information: birthtime**

The Mother's birthtime SHOULD be included in the document header if known.

**6.3.1.D1.5.2.2 Mother's Information: ethnicity**

1640 The Mother's ethnicity MAY be included in the document header if known. The value for ethnicity/ code SHALL be drawn from value set 2.16.840.1.114222.4.11.6066 PHVS\_EthnicGroup\_HL7\_2x.

**6.3.1.D1.5.2.3 Mother's Information: race**

The Mother's race MAY be included in the document header if known. The value for race/ code SHALL be drawn from value set PHINVADS link for HL7 V3 Race

1645 2.16.840.1.113883.1.11.14914 unless further extended by national extension.

**6.3.1.D1.5.2.4 Mother's Information: gender**

The Mother's gender MAY be included in the document header if known. The value for gender/ code SHALL be drawn from value set 2.16.840.1.113883.1.11.1 HVS\_AdministrativeGender\_HL7\_V3.

1650 **6.3.1.D1.5.2.5 realmCode**

The realmCode SHALL be included and SHALL indicate the country for the jurisdiction of the implementation. The value for realmCode SHALL be drawn from CodeSystem: 1.0.3166.1

Country (ISO 3166-1). NOTE: this is an extension of the underlying HL7 Implementation Guide for CDA Release 2: Birth and Fetal Death Report, Release 1.

1655 **6.3.1.D1.5.3 Body Constraints – Further Vocabulary or Conditional Constraints**

There are no body constraints to the underlying HL7 Reporting Birth Information from a Clinical Setting to Vital Records.

**6.3.1.D1.6 Document Example**

1660 A complete example of the Birth Reporting CDA document (BFDR-Birth) Document Content Module is available on the IHE ftp server at:  
[ftp://ftp.ihe.net/TF\\_Implementation\\_Material/QRPH/packages/](ftp://ftp.ihe.net/TF_Implementation_Material/QRPH/packages/). Note that this is an example and

is meant to be informative and not normative. This example shows the 1.3.6.1.4.1.19376.1.7.3.1.1.19.2 elements for all of the specified templates.

**6.3.1.D2 Fetal Death Reporting (BFDR-FDeath) Document  
(1.3.6.1.4.1.19376.1.7.3.1.1.19.3)**

**6.3.1.D2.1 Format Code**

The XDSDocumentEntry format code for this content is urn:ihe:qrph:BFDR-FDeath:2014

**6.3.1.D2.2 Parent Template(s)**

This document is a specialization of the HL7 Birth and Fetal Death Reporting Document: Reporting Fetal Death Information from a clinical setting to vital records (ClinicalDocument: templateId 2.16.840.1.113883.10.20.26.2).

**6.3.1.D2.3 Referenced Standards**

All standards which are reference in this document are listed below with their common abbreviation, full title, and link to the standard.

1675

**Table 6.3.1.D2.3-1: Fetal Death Reporting (BFDR-FDeath) - Referenced Standards**

**6.3.1.D2.4 Data Element Mapping to CDA**

Refer to Volume 4, 6.6.1.2.1 for mapping from BFDR Form data elements to the output the BFDR Birth CDA Document or the BFDR Fetal Death CDA Document. Table 6.6.2-1 defines the form data element mapping to the output content document modules for Birth. Table 6.6.2-2 defines the form data element mapping to the output content document modules for Fetal Death.

1680

### 6.3.1.D2.5 Content Module Specifications

This section specifies the header and body content modules which comprise the document-level Content Module. Templates constraining the information are listed by id.

Sections that are used according to the definitions in other specifications are identified with the relevant specification document. Additional constraints on vocabulary value sets, not specifically constrained within the section template, are also identified. Header constraints are inherited through the Medical Documents Specification parent template (1.3.6.1.4.1.19376.1.5.3.1.1.1).

Only the constrained sections and clinical statements are listed here, but there are additional requirements in the HL7 CDA Implementation Guide.

#### 6.3.1.D2.5.1 Document Constraints

### **6.3.1.D2.5.2 Header Constraints - Further Vocabulary or Conditional Constraints**

1695 **6.3.1.D2.5.2.1 Mother's Information: birthtime**

The Mother's birthtime SHOULD be included in the document header if known.

#### **6.3.1.D2.5.2.2 Mother's Information: ethnicity**

The Mother's ethnicity MAY be included in the document header if known. The value for ethnicity/ code SHALL be drawn from value set 2.16.840.1.114222.4.11.6066

1700 PHVS\_EthnicGroup\_HL7\_2x.

#### **6.3.1.D2.5.2.3 Mother's Information: race**

The Mother's race MAY be included in the document header if known. The value for race/ code SHALL be drawn from value set 2.16.840.1.114222.4.11.6066 PHVS\_Race\_HL7\_2x.

#### **6.3.1.D2.5.2.4 Mother's Information: gender**

1705 The Mother's gender MAY be included in the document header if known. The value for gender/ code SHALL be drawn from value set 2.16.840.1.113883.1.11.1  
HVS\_AdministrativeGender\_HL7\_V3.

#### **6.3.1.D2.5.2.5 realmCode**

1710 The realmCode SHALL be included and SHALL indicate the country for the jurisdiction of the implementation. The value for realmCode SHALL be drawn from CodeSystem: 1.0.3166.1  
Country (ISO 3166-1).

### **6.3.1.D2.5.3 Body Constraints – Further Vocabulary or Conditional Constraints**

There are no body constraints to the underlying HL7 Reporting Fetal Death Information from a Clinical Setting to Vital Records.

1715 **6.3.1.D2.6 Document Example**

A complete example of the Fetal Death Reporting CDA document (BFDR-FDeath) Document Content Module is available on the IHE ftp server at:

[ftp://ftp.ihe.net/TF\\_Implementation\\_Material/QRPH/packages/](ftp://ftp.ihe.net/TF_Implementation_Material/QRPH/packages/). Note that this is an example and

1720 is meant to be informative and not normative. This example shows the 1.3.6.1.4.1.19376.1.7.3.1.1.19.3 elements for all of the specified templates.

### **6.3.1.D3 Labor and Delivery Summary for Vital Records (LDS-VR) Document**

#### **6.3.1.D3.1 Format Code**

The XDSDocumentEntry format code for this content is urn:ihe:qrph:ldsvr:2014

#### **6.3.1.D3.2 Parent Template(s)**

1725 This document template is also an adaptation of the IHE PCC Labor and Delivery Summary Document (templateId 1.3.6.1.4.1.19376.1.5.3.1.1.21.1.2).

#### **6.3.1.D3.3 Referenced Standards**

All standards which are reference in this document are listed below with their common abbreviation, full title, and link to the standard.

1730

**Table 6.3.1.D3.3-1: Referenced Standards**

#### **6.3.1.D3.4 Data Element Mapping to CDA**

Refer to Volume 4, 6.6.1 for mapping from BFDR Form data elements to the pre-pop LDS-VR CDA Document

1735

#### **6.3.1.D3.5 Content Module Specifications**

This section specifies the header, section, and entry content modules which comprise the LDS-VR Document Content Module, using the Template ID as the key identifier.

1740 Sections that are used according to the definitions in other specifications are identified with the relevant specification document. Additional constraints on vocabulary value sets, not specifically constrained within the section template, are also identified.

### 6.3.1.D3.5.1 Document Constraints

The following table describes the header, sections, subsections, and entries that compose the LDS-VR document. Subsections are indicated by '+' and '++' for sub-sub-sections.

1745

**Table 6.3.1.D3.5.1-1: LDS-VR Document Template**

<b>Template Name</b> Labor and Delivery Summary – Vital Records					
<b>Template ID</b> 1.3.6.1.4.1.19376.1.7.3.1.1.19.1.1					
<b>Parent Template</b> Specialization of 1.3.6.1.4.1.19376.1.5.3.1.1.21.1.2 Labor and Delivery Summary Document Template, IHE PCC					
<b>General Description</b> The Labor and Delivery Summary (LDS-VR) CDA document template specifies a specialized version of the Labor and Delivery Summary Document. It is used to prepopulate an electronic form (worksheet) that collects the information needed for submission to vital records. Use of the LDS-VR pre-population Option optimizes the initial Birth and Fetal Death Report form data population.

### 6.3.1.D3.5.2 Header – Further Vocabulary or Conditional Constraints

#### 6.3.1.D3.5.2.1 documentationOf/encompassingEncounter

**Admission Source** SHALL indicate whether the mother was transferred from another organization using the following value set:

In:

ClinicalDocument/componentOf/encompassingEncounter/sdtc:admissionSourceCode

- 1755     ***Facility name of the source of admission*** SHALL indicate the name of the organization the mother was transferred IF KNOWN

In:

The name of the organization that was the source of the transfer SHALL be recorded in:  
/encompassingEncouter/encounterParticipant[@typeCode='REF']/assignedEntity/representedOrganization

- 1760     ***Facility name where the Birth Occurred*** SHALL be included in:

ClinicalDocument/componentOf/encompassingEncounter/location/healthCareFacility/location/a  
ddr

***Facility ID (Jurisdiction Provider ID e.g. US NPI)*** SHALL be included in:

- 1765     ClinicalDocument/componentOf/encompassingEncouter  
/location/healthCareFacility/serviceProviderOrganization/id

***Facility Town/City*** SHALL be included in:

ClinicalDocument/componentOf/encompassingEncouter  
/location/healthCareFacility/serviceProviderOrganization/addr/city

- 1770

***Facility County/Region*** SHALL be included in:

ClinicalDocument/componentOf/encompassingEncouter  
/location/healthCareFacility/serviceProviderOrganization/addr/county

- 1775     **6.3.1.D3.5.3 Body - Further Vocabulary or Conditional Constraints**

#### **6.3.1.D3.5.3.1 Admission Medication History**

##### ***Medication Coded Product***

This is implementer guidance regarding appropriate coding to use for specific concepts.

The value set shall not be limited or constrained in this implementation guide.

- 1780     IF the case has any of the following THEN they SHALL be included.

Where these medications have been administered and resulted in this pregnancy, the information about the use of these medications SHALL be recorded using the following value set:

Fertility Enhancing Drugs Medications (NCHS) [1.3.6.1.4.1.19376.1.7.3.1.1.13.8.144](#)

SHALL be included in:

1785 ClinicalDocument//structuredBody

/component/section[templateId[@root='1.3.6.1.4.1.19376.1.5.3.1.3.20']]

/entry/substanceAdministration/ consumable/manufacturedProduct/labeledDrug/code

***Medication Administration Date and Time***

The substance administration date SHALL be included to represent the date or range of dates when these medications were administered.:

ClinicalDocument/structuredBody

/component/section[templateId[@root='1.3.6.1.4.1.19376.1.5.3.1.3.20']]

/entry/substanceAdministration/effectiveDate

**6.3.1.D3.5.3.2 Coded History of Infection**

1795 This is implementer guidance regarding appropriate coding to use for specific concepts.

The value set shall not be limited or constrained in this implementation guide.

IF the case has any of the following THEN they SHALL be included.

Where these conditions exist,

***Infection History Problem*** SHALL be specified using codes from the following value sets:

1800

Chlamydia (NCHS) [1.3.6.1.4.1.19376.1.7.3.1.1.13.8.93](#)

Gonorrhea (NCHS) [2.16.840.1.114222.4.11.6071](#)

### **6.3.1.D3.5.3.19 Newborn Delivery Information.Coded Results**

Coded results,

2520    **Karyotype Results** SHALL use the simple observation template to represent the following value set for the 'code' element.

      Karyotype Result (NCHS) [1.3.6.1.4.1.19376.1.7.3.1.1.13.8.59](#)

In: ClinicalDocument/component/structuredBody

2525    /component/section[templateId[@root='1.3.6.1.4.1.19376.1.5.3.1.3.28']]  
           /subject/relatedSubject/code[@code='NCHILD' AND id=idOfTheChild]  
           /entry[templateID[@root='1.3.6.1.4.1.19376.1.5.3.1.4.13']]  
           / observation/code

The ‘value’ element not constrained

2530 **6.3.1.D3.5.3.20 Payers**

Payer (NOTE: payers is inherited from Medical Summary as an Optional Section)

SHOULD include payer information in:

2535    ClinicalDocument/component/structuredBody  
           /component/section[templateId[@root='1.3.6.1.4.1.19376.1.5.3.1.1.5.3.7']]  
           /entry/act[code@code='48768-6']  
           /entryRelationship/act[templateId[@root="1.3.6.1.4.1.19376.1.5.3.1.4.18"]]/code

2540    The <code> element should be present, and represents the type of coverage provided by the payer. Potential vocabularies to use include:

**Table 6.3.1.D3.5.3.20-1: Payer Type Vocabularies**

Vocabulary	Description	OID
HL7 ActCoverageType	The HL7 ActCoverageType vocabulary describes payers and programs. Note that HL7 does not have a specific code to identify an individual payer, e.g., in the role of a guarantor or patient.	2.16.840.1.113883.5.4
X12 Data Element 1336	The X12N 271 implementation guide includes various types of payers. This code set does include a code to identify individual payers.	2.16.840.1.113883.6.255.1336

**6.3.1.D3.6 Document Example**

2545    CDA Release 2.0 documents that conform to the requirements of this document content module shall indicate their conformance by the inclusion of the 1.3.6.1.4.1.19376.1.7.3.1.1.19.1.1 XML elements in the header of the document.

2550    A CDA Document may conform to more than one template. This content module inherits from the PCC TF Medical Document, 1.3.6.1.4.1.19376.1.5.3.1.1.1, content module and the PCC TF Labor and Delivery Summary Document Template, 1.3.6.1.4.1.19376.1.5.3.1.1.21.1.2, and so

must conform to the requirements of those templates as well this document specification, Labor and Delivery Summary – Vital Records 1.3.6.1.4.1.19376.1.7.3.1.1.19.1.1

- A complete example of the Labor and Delivery Summary – Vital Records (LDS-VR) Document Content Module is available on the IHE ftp server at:  
2555 [ftp://ftp.ihe.net/TF\\_Implementation\\_Material/QRPH/packages/](ftp://ftp.ihe.net/TF_Implementation_Material/QRPH/packages/). Note that this is an example and is meant to be informative and not normative. This example shows the 1.3.6.1.4.1.19376.1.7.3.1.1.19.1.1 elements for all of the specified templates.

### **6.3.2 CDA Header Templates**

- 2560 *Add to section 6.3.2 Header Content Module Templates*

### **6.3.3 CDA Section Templates**

- Add to section 6.3.3.10 Section Content Module Templates*

None

- 2565 **6.3.4 CDA Entry Content Module Templates**

- Add to section 6.3.4.E Entry Content Modules*

None

### **6.4 Section not applicable**

This heading is not currently used in a CDA document.

- 2570 **6.5 Value Sets**

The following table describes each of the value sets used to support the BFDR Profile. These are all published by and available from the PHIN Vocabulary Access and Distribution System (PHIN VADS). Each of the value sets below are established as extensional with the discrete values available at the PHIN-VADS URL provided. Version status may change from time-to-time as these value sets are maintained by NCHS, so version number should not be referenced when using these value sets in support of the BFDR Profile. Similarly, associated date related metadata attributes will changed as a result of value set maintenance activities, and can be obtained at the PHIN-VADS URL provided. BFDR-E Vocabulary has dynamic binding of value sets. In dynamic binding the most current version of the value set in the terminology server is used.  
2575  
2580

#### **6.5.1 Value Sets used by this profile**

**Table 6.5.1-1: LDS-VR Document Template Specification**

Name	Identifier	Purpose	Source	PHIN VADS URL	Groups
10 Min Apgar Score (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.13	To reflect the 10 Min Apgar Score	LOINC	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.13">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.13</a>	IHE BFDR
5 Min Apgar Score (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.12	To reflect the 5 Min Apgar Score	LOINC	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.12">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.12</a>	IHE BFDR
Anencephaly of the Newborn (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.53	To reflect Anencephaly of the Newborn as an anomaly of the newborn	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.53">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.53</a>	IHE BFDR
Antibiotic Administration Procedure (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.178	To reflect Antibiotic Administration Procedure during labor and delivery	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.178">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.178</a>	IHE BFDR
Antibiotics (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.3	To reflect that antibiotics were received by the mother during delivery and by the newborn for suspected neonatal sepsis	RxNorm	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.3">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.3</a>	IHE BFDR
Artificial or Intrauterine Insemination (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.145	To reflect the Artificial or Intrauterine Insemination as a Risk Factor in Pregnancy	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.145">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.145</a>	IHE BFDR
Assisted Ventilation (NCHS)	2.16.840.1.11 4222.4.11.7156	To reflect that the newborn was provided assisted ventilation reflecting an abnormal condition of the newborn	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=2.16.840.1.114222.4.11.7156">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=2.16.840.1.114222.4.11.7156</a>	IHE BFDR
Assistive Reproductive Technology (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.146	To reflect the Assistive Reproductive Technology as a Risk Factor in Pregnancy	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.146">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.146</a>	IHE BFDR
Augmentation of Labor - Medication (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.23	To reflect a medication used for the augmentation of Labor	RxNorm	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.23">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.23</a>	IHE BFDR

IHE Quality, Research and Public Health Technical Framework Supplement – Birth and Fetal Death Reporting-Enhanced (BFDR-E)

Name	Identifier	Purpose	Source	PHIN VADS URL	Groups
Augmentation of Labor - Procedure (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.22	To reflect a procedure of Augmentation of Labor	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.22">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.22</a>	IHE BFDR
Autopsy Planned (NCHS)	2.16.840.1.11 4222.4.11.7140	To reflect that an autopsy was planned	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=2.16.840.1.14222.4.11.7140">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=2.16.840.1.14222.4.11.7140</a>	IHE BFDR
Birth Plurality of Delivery (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.132	To reflect the Plurality, which is the number of fetuses delivered live or dead at any time in the pregnancy regardless of gestational age or if the fetuses were delivered at different dates in the pregnancy. (“Reabsorbed” fetuses, those which are not “delivered” (expulsed or extracted from the mother) should not be counted.)	LOINC	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.132">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.132</a>	IHE BFDR
Birth Weight (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.20	To reflect the Birth Weight	LOINC	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.20">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.20</a>	IHE BFDR
Birthplace Clinic Office (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.197	To reflect the birth occurred in the at clinic or office	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.197">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.197</a>	IHE BFDR
Birth Place Freestanding Birthing Center (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.196	To reflect the birth occurred at a freestanding birthing center	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.196">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.196</a>	IHE BFDR
Birth Place Home Intended (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.193	To reflect the birth occurred in the at home as intended	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.193">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.193</a>	IHE BFDR
Birth Place Home Unintended (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.194	To reflect the birth occurred in the at home as unintended	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.194">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.194</a>	IHE BFDR

IHE Quality, Research and Public Health Technical Framework Supplement – Birth and Fetal Death Reporting-Enhanced (BFDR-E)

Name	Identifier	Purpose	Source	PHIN VADS URL	Groups
Birth Place Home Unknown Intention (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.195	To reflect the birth occurred in the at home with intention unknown	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.195">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.195</a>	IHE BFDR
Birthplace Hospital (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.192	To reflect the birth occurred in the hospital	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.192">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.192</a>	IHE BFDR
Birthplace Setting (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.184	To reflect the birthplace of the newborn (setting)	LOINC	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.184">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.184</a>	IHE BFDR
Body Weight (NCHS)	2.16.840.1.11 4222.4.11.7421	To Reflect the question as to the body weight of the patient	LOINC	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=2.16.840.1.114222.4.11.7421">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=2.16.840.1.114222.4.11.7421</a>	IHE BFDR
Breastfed Infant (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.41	To reflect Breastfed Infant at discharge	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.41">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.41</a>	IHE BFDR
Certified Midwife (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.17	To reflect the Title of the Attendant responsible for the delivery Procedure as a Certified Midwife	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.17">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.17</a>	IHE BFDR
Cervical Cerclage (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.125	To reflect Obstetric Procedures as Cervical Cerclage	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.125">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.125</a>	IHE BFDR
Chlamydia (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.93	To reflect Chlamydia as Infections present and treated during this pregnancy	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.93">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.93</a>	IHE BFDR
Chorioamni onitis During Labor (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.24	To reflect a Chorioamnionitis During Labor	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.24">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.24</a>	IHE BFDR
Cleft Lip with or without Cleft Palate (NCHS)	1.3.6.1.4.1.19 376.1.7.3.1.1. 13.8.58	To reflect Cleft Lip with/without Cleft Palate as an anomaly of the newborn	SNOME D-CT	<a href="https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.58">https://phinvads.cdc.gov/vads/ViewValueSet.action?oid=1.3.6.1.4.1.19376.1.7.3.1.1.13.8.58</a>	IHE BFDR

### **6.5.2 Value Sets Defined by this profile**

2585    None

## 6.6 Data Mappings

This section defines mappings to and from the standard data elements defined in this profile.

### 6.6.1 Form Data Element Mappings from Pre-Pop Document

The data elements defined in this profile can be computed from data elements in the Labor and Delivery Summary (LDS) of the electronic health record that is used as the pre-pop document. 2590 The LDS mapping rules described below overlays these data elements typically presented to the birth registrar in a form. The Derivation Rule includes a specification defining the source section and entry along with the rules for examining the LDS content to determine whether or not the data element is satisfied. These rules may specify examination of one or more LDS locations to 2595 make a determination of the data element result. While any LDS document may be used to populate the form, the IHE PCC Labor and Delivery Summary Document as constrained by the LDS-VR will result in the maximum number of pre-populated data elements.

Table 6.6.1-1 describes the pre-population rules to derive the data elements in this profile from the LDS or LDR-VR. The Derivation Rule references the section where the logic and xpath 2600 source data is defined. The Value Sets reference the Value Subsets which are published and available from the Public Health Information Network Vocabulary Access and Distribution System (PHIN-VADS).

**Table 6.6.1-1: Form Data Elements Data Mapped to Input Content Document Modules**

Attribute code	Definition	Derivation Rule	Value Sets
ANTI	Any antibacterial drug given systemically (intravenous or intramuscular.) For example, penicillin, ampicillin, gentamicin, cefotaxime, etc.)	<a href="#">6.6.1.1.1 ANTI Derivation Rule</a>	<a href="#">6.6.1.1.3 ANTI Value Sets</a>
AVEN1	Infant given manual breaths with bag and mask or bag and endotracheal tube within the first several minutes from birth for any duration. Excludes oxygen only and laryngoscopy for aspiration of meconium.	<a href="#">6.6.1.2.1 AVEN1 Derivation Rule</a>	<a href="#">6.6.1.2.3 AVEN1 Value Sets</a>
AVEN6	Infant given mechanical ventilation (breathing assistance) by any method for more than 6 hours. Includes conventional, high frequency and/or continuous positive pressure (CPAP).	<a href="#">6.6.1.3.1 AVEN6 Derivation Rule</a>	<a href="#">6.6.1.3.3 AVEN6 Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
BINJ	Significant birth injury: (skeletal fracture(s), peripheral nerve injury and/or soft tissue/solid organ hemorrhage which requires intervention). Defined as present immediately following delivery or manifesting following delivery. Includes any bony fracture or weakness or loss of sensation, but excludes fractured clavicles and transient facial nerve palsy. Soft tissue hemorrhage requiring evaluation and/or treatment includes sub-galeal (progressive extravasation within the scalp) hemorrhage, giant cephalohematoma, extensive truncal, facial and /or extremity ecchymosis accompanied by evidence of anemia and/or hypovolemia and or hypotension. Solid organ hemorrhage includes subcapsular hematoma of the liver, fractures of the spleen, or adrenal hematoma. All require confirmation by diagnostic imaging or exploratory laparotomy.	<a href="#">6.6.1.1.4.1 BINJ Derivation Rule</a>	<a href="#">6.6.1.1.3.3 AVEN6 Value Sets</a>
NICU	Admission into a facility or unit staffed and equipped to provide continuous mechanical ventilatory support for the newborn.	<a href="#">6.6.1.1.5.1 NICU Derivation Rule</a>	<a href="#">6.6.1.1.5.3 NICU Value Sets</a>
SEIZ	Seizure defined as any involuntary repetitive, convulsive movement or behavior. Serious neurologic dysfunction defined as severe alteration of alertness such as obtundation, stupor, or coma, i.e., hypoxicischemic encephalopathy. Excludes lethargy or hypotonia in the absence of other neurologic findings. Exclude symptoms associated with CNS congenital anomalies.	<a href="#">6.6.1.1.6.1 SEIZ Derivation Rule</a>	<a href="#">6.6.1.1.6.3 SEIZ Value Sets</a>
SURF	Newborn given surfactant replacement therapy: Endotracheal instillation of a surface active suspension for the treatment of surfactant deficiency either due to preterm birth or pulmonary injury resulting in decreased lung compliance (respiratory distress). Includes both artificial and extracted natural surfactant.	<a href="#">6.6.1.1.7.1 SURF Derivation Rule</a>	<a href="#">6.6.1.1.7.1 SURF Derivation Rule</a>
NOA54	None of the listed abnormal conditions of the newborn.	<a href="#">6.6.1.1.8.1 NOA54 Derivation Rule</a>	<a href="#">6.6.1.1.8.3 NOA54 Value Sets</a>
DNA54	If the data are not available when the abnormal conditions of the newborn are provided, the pending flag is set. The item will appear on the final review screen for entry before information is sent to vital records.	<a href="#">6.6.1.1.9.1 DNA54 Derivation Rule</a>	<a href="#">6.6.1.1.9.3 DNA54 Value Sets</a>
APGAR5	A systematic measure for evaluating the physical condition of the infant at specific intervals following birth. Enter the infant's Apgar score at 5 minutes.	<a href="#">6.6.1.1.10.1 APGAR5 Derivation Rule</a>	<a href="#">6.6.1.1.10.3 APGAR5 Value Sets</a>
APGAR10	A systematic measure for evaluating the physical condition of the infant at specific intervals following birth. If the score at 5 minutes is less than 6, enter the infant's Apgar score at 10 minutes	<a href="#">6.6.1.1.11.1 APGAR10 Derivation Rule</a>	<a href="#">6.6.1.1.10.3 APGAR10 Value Sets</a>
ATTENDN	The name of the attendant (the person responsible for delivering the child), their title, and their National Provider Identification (NPI) Number.	<a href="#">6.6.1.1.12.1 ATTENDN Derivation Rule</a>	<a href="#">6.6.1.1.12.3 ATTENDN Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
ATTEND	The title of the person (attendant) responsible for delivering the child. The attendant at birth is defined as the individual physically present at the delivery who is responsible for the delivery. Titles include: M.D. (doctor of medicine); D.O. (doctor of osteopathy); CNM/CM (certified nurse midwife/certified midwife); Other midwife (midwife other than a CNM/CM); and Other (specify)	<a href="#">6.6.1.1.13.1 ATTEND Derivation Rule</a>	<a href="#">6.6.1.1.13.3 ATTEND Value Sets</a>
ATTENDS	The specific title of the person (attendant) responsible for delivering the child if not included in the list of provided titles. Examples include nurse, father, police officer, and EMS technician. The attendant at birth is defined as the individual physically present at the delivery who is responsible for the delivery.	<a href="#">6.6.1.1.14.1 ATTENDS Derivation Rule</a>	<a href="#">6.6.1.1.14.3 ATTENDS Value Sets</a>
NPI	The National Provider Identification Number (NPI) of the person (attendant) responsible for delivering the child.	<a href="#">6.6.1.1.15.1 NPI Derivation Rule</a>	<a href="#">6.6.1.1.15.3 NPI Value Sets</a>
BWG	Infant's birthweight in grams.	<a href="#">6.6.1.1.16.1 BWG Derivation Rule</a>	<a href="#">6.6.1.1.16.3 BWG Value Sets</a>
BWO	Infant's birthweight in ounces.	<a href="#">6.6.1.1.17.1 BWO Derivation Rule</a>	<a href="#">6.6.1.1.17.3 BWO Value Sets</a>
BWP	Infant's birthweight in pounds.	<a href="#">6.6.1.1.18.1 BWP Derivation Rule</a>	<a href="#">6.6.1.1.18.3 BWP Value Sets</a>
ANTB	Antibiotics received by the mother during labor. Includes antibacterial medications given systemically (intravenous or intramuscular) to the mother in the interval between the onset of labor and the actual delivery. Includes: Ampicillin, Penicillin, Clindamycin, Erythromycin, Gentamicin, Cefataxine, and Ceftriaxone. Information about the course of labor and delivery.	<a href="#">6.6.1.1.19.1 ANTB Derivation Rule</a>	<a href="#">6.6.1.1.19.3 ANTB Value Sets</a>
AUGL	Augmentation of labor: Stimulation of uterine contractions by drug or manipulative technique with the intent to reduce the time of delivery (i.e., after labor has begun). Information about the course of labor and delivery.	<a href="#">6.6.1.1.20.1 AUGL Derivation Rule</a>	<a href="#">6.6.1.1.20.3 AUGL Value Sets</a>
CHOR	Any recorded maternal temperature at or above 38oC (100.4oF) or clinical diagnosis of chorioamnionitis during labor made by the delivery attendant (usually includes more than one of the following: fever, uterine tenderness and/or irritability, leukocytosis, or fetal tachycardia). Information about the course of labor and delivery.	<a href="#">6.6.1.1.21.1 CHOR Derivation Rule</a>	<a href="#">6.6.1.1.21.3 CHOR Value Sets</a>
ESAN	Administration to the mother of a regional anesthetic to control the pain of labor. Delivery of the agent into a limited space with the distribution of the analgesic effect limited to the lower body. Information about the course of labor and delivery.	<a href="#">6.6.1.1.22.1 ESAN Derivation Rule</a>	<a href="#">6.6.1.1.22.3 ESAN Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
INDL	Induction of labor: Initiation of uterine contractions by medical and/or surgical means for the purpose of delivery before the spontaneous onset of labor (i.e., before labor has begun). Information about the course of labor and delivery.	<a href="#">6.6.1.1.23.1 INDL Derivation Rule</a>	<a href="#">6.6.1.1.23.3 INDL Value Sets</a>
STER	Steroids (glucocorticoids): For fetal lung maturation received by the mother before delivery. Includes: Betamethasone dexamethasone, or hydrocortisone specifically given to accelerate fetal lung maturation in anticipation of preterm delivery. Does not include: Steroid medication given to the mother as an anti-inflammatory treatment before or after delivery. Information about the course of labor and delivery.	<a href="#">6.6.1.1.24.1 STER Derivation Rule</a>	<a href="#">6.6.1.1.24.3 STER Value Sets</a>
NOA04	None of the listed characteristics of labor and delivery that provide information about the course of labor and delivery.	<a href="#">6.6.1.1.25.1 NOA04 Derivation Rule</a>	<a href="#">6.6.1.1.25.3 NOA04 Value Sets</a>
DNA04	If the data are not available when the characteristics of labor and delivery are provided, the pending flag is set. The item will appear on the final review screen for entry before information is sent to vital records.	<a href="#">6.6.1.1.26.1 DNA04 Derivation Rule</a>	<a href="#">6.6.1.1.26.3 DNA04 Value Sets</a>
IDOB_YR	The infant's date (year) of birth.	<a href="#">6.6.1.1.27.1 IDOB_YR Derivation Rule</a>	<a href="#">6.6.1.1.27.3 IDOB_YR Value Sets</a>
IDOB_MO	The infant's date (month) of birth.	<a href="#">6.6.1.1.28.1 IDOB_MO Derivation Rule</a>	<a href="#">6.6.1.1.28.3 IDOB_MO Value Sets</a>
IDOB_DY	The infant's date (day) of birth.	<a href="#">6.6.1.1.29.1 IDOB_DY Derivation Rule</a>	<a href="#">6.6.1.1.29.3 IDOB_DY Value Sets</a>
KIDFNAM	The legal name (first) of the child as provided by the parents.	<a href="#">6.6.1.1.30.1 KIDFNAM Derivation Rule</a>	<a href="#">6.6.1.1.30.3 KIDFNAM Value Sets</a>
KIDMNAM_E	The legal name (middle) of the child as provided by the parents.	<a href="#">6.6.1.1.31.1 KIDMNAM_E Derivation Rule</a>	<a href="#">6.6.1.1.31.3 KIDMNAM_E Value Sets</a>
KIDLNAME	The legal name (last) of the child as provided by the parents.	<a href="#">6.6.1.1.32.1 KIDLNAME Derivation Rule</a>	<a href="#">6.6.1.1.32.3 KIDLNAME Value Sets</a>
KIDSUFFIX	The legal name (suffix) of the child as provided by the parents.	<a href="#">6.6.1.1.33.1 KIDSUFFIX Derivation Rule</a>	<a href="#">6.6.1.1.33.3 KIDSUFFIX Value Sets</a>
BFED	Information on whether the infant was being breast-fed during the period between birth and discharge from the hospital.	<a href="#">6.6.1.1.34.1 BFED Derivation Rule</a>	<a href="#">6.6.1.1.34.3 BFED Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
ILIV	Information on the infant's survival. Check "Yes" if the infant is living. Check "Yes" if the infant has already been discharged to home care. Check "No" if it is known that the infant has died. If the infant was transferred but the status is known, indicate the known status.	<a href="#">6.6.1.1.35.1 ILIV Derivation Rule</a>	<a href="#">6.6.1.1.35.3 ILIV Value Sets</a>
IRECNUM	The medical record number assigned to the newborn.	<a href="#">6.6.1.1.36.1 IRECNUM Derivation Rule</a>	<a href="#">6.6.1.1.36.3 IRECNUM Value Sets</a>
ISEX	The sex of the infant.	<a href="#">6.6.1.1.37.1 ISEX Derivation Rule</a>	<a href="#">6.6.1.1.37.3 ISEX Value Sets</a>
ITRAN	Transfer status of the infant within 24 hours after delivery.	<a href="#">6.6.1.1.38.1 ITRAN Derivation Rule</a>	<a href="#">6.6.1.1.38.3 ITRAN Value Sets</a>
FTRAN	NA	<a href="#">6.6.1.1.39.1 FTRAN Derivation Rule</a>	<a href="#">6.6.1.1.39.3 FTRAN Value Sets</a>
TB	The infant's time of birth.	<a href="#">6.6.1.1.40.1 TB Derivation Rule</a>	<a href="#">6.6.1.1.40.3 TB Value Sets</a>
ANEN	Partial or complete absence of the brain and skull. Also called anencephalus, acrania, or absent brain .Also includes infants with craniorachischisis (anencephaly with a contiguous spine defect).	<a href="#">6.6.1.1.41.1 ANEN Derivation Rule</a>	<a href="#">6.6.1.1.41.3 ANTI Value Sets</a>
CCHD	Congenital heart defects that cause cyanosis.	<a href="#">6.6.1.1.42.1 CCHD Derivation Rule</a>	<a href="#">6.6.1.1.42.3 CCHD Value Sets</a>
CDH	Defect in the formation of the diaphragm allowing herniation of abdominal organs into the thoracic cavity.	<a href="#">6.6.1.1.43.1 CDH Derivation Rule</a>	<a href="#">6.6.1.1.43.3 CDH Value Sets</a>
CDIC	Suspected chromosomal disorder karyotype confirmed	<a href="#">6.6.1.1.44.1 CDIC Derivation Rule</a>	<a href="#">6.6.1.1.44.3 CDIC Value Sets</a>
CDIS	Suspected chromosomal disorder: Includes any constellation of congenital malformations resulting from or compatible with known syndromes caused by detectable defects in chromosome structure	<a href="#">6.6.1.1.45.1 CDIS Derivation Rule</a>	<a href="#">6.6.1.1.45.3 CDIS Value Sets</a>
*CDIP	Suspected chromosomal disorder karyotype pending.	<a href="#">6.6.1.1.46.1 CDIP Derivation Rule</a>	<a href="#">6.6.1.1.46.3 CDIP Value Sets</a>
CL	Cleft lip with or without cleft palate refers to incomplete closure of the lip. Cleft lip may be unilateral, bilateral or median; all should be included in this category.	<a href="#">6.6.1.1.47.1 CL Derivation Rule</a>	<a href="#">6.6.1.1.47.3 CL Value Sets</a>
CP	Cleft palate refers to incomplete fusion of the palatal shelves. This may be limited to the soft palate or may also extend into the hard palate. Cleft palate in the presence of cleft lip should be included in the "Cleft Lip with or without cleft Palate" category, rather than here.	<a href="#">6.6.1.1.48.1 CP Derivation Rule</a>	<a href="#">6.6.1.1.48.3 CP Value Sets</a>
DOWC	Down Karyotype confirmed	<a href="#">6.6.1.1.49.1 DOWC Derivation Rule</a>	<a href="#">6.6.1.1.49.3 DOWC Value Sets</a>
DOWN	Down Syndrome: Trisomy 21	<a href="#">6.6.1.1.50.1 DOWN Derivation Rule</a>	<a href="#">6.6.1.1.50.3 DOWN Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
DOWP	Down Karyotype pending	<a href="#">6.6.1.1.51.1 DOWP Derivation Rule</a>	<a href="#">6.6.1.1.51.3 DOWP Value Sets</a>
GAST	An abnormality of the anterior abdominal wall, lateral to the umbilicus, resulting in herniation of the abdominal contents directly into the amniotic cavity. Differentiated from omphalocele by the location of the defect and absence of a protective membrane.	<a href="#">6.6.1.1.52.1 GAST Derivation Rule</a>	<a href="#">6.6.1.1.52.3 GAST Value Sets</a>
HYPO	Hypospadias: Incomplete closure of the male urethra resulting in the urethral meatus opening on the ventral surface of the penis. Includes first degree – on the glans ventral to the tip, second degree – in the coronal sulcus, and third degree – on the penile shaft.	<a href="#">6.6.1.1.53.1 HYPO Derivation Rule</a>	<a href="#">6.6.1.1.53.3 HYPO Value Sets</a>
LIMB	Limb reduction defect: (excluding congenital amputation and dwarfing syndromes) Complete or partial absence of a portion of an extremity secondary to failure to develop.	<a href="#">6.6.1.1.54.1 LIMB Derivation Rule</a>	<a href="#">6.6.1.1.54.3 LIMB Value Sets</a>
MNSB	Spina bifida is herniation of the meninges and/or spinal cord tissue through a bony defect of spine closure. Meningomyelocele is herniation of meninges and spinal cord tissue. Meningocele (herniation of meninges without spinal cord tissue) should also be included in this category. Both open and closed (covered with skin) lesions should be included. Do not include Spina bifida occulta (a midline bony spinal defect without protrusion of the spinal cord or meninges).	<a href="#">6.6.1.1.55.1 MNSB Derivation Rule</a>	<a href="#">6.6.1.1.55.3 MNSB Value Sets</a>
OMPH	A defect in the anterior abdominal wall, accompanied by herniation of some abdominal organs through a widened umbilical ring into the umbilical stalk. The defect is covered by a membrane, (different from gastroschisis, see below), although this sac may rupture. Also called exomphalos. Umbilical hernia (completely covered by skin) should not be included in this category.	<a href="#">6.6.1.1.56.1 OMPH Derivation Rule</a>	<a href="#">6.6.1.1.56.3 OMPH Value Sets</a>
NOA55	None of the listed congenital anomalies of the newborn or fetus.	<a href="#">6.6.1.1.57.1 NOA55 Derivation Rule</a>	<a href="#">6.6.1.1.57.3 NOA55 Value Sets</a>
DNA55	If the data are not available when the abnormal conditions of the newborn are provided, the pending flag is set. The item will appear on the final review screen for entry before information is sent to vital records.	<a href="#">6.6.1.1.58.1 DNA55 Derivation Rule</a>	<a href="#">6.6.1.1.58.3 DNA55 Value Sets</a>
YLLB	The year of birth of the last live-born infant.	<a href="#">6.6.1.1.59.1 YLLB Derivation Rule</a>	<a href="#">6.6.1.1.59.3 YLLB Value Sets</a>
MLLB	The month of birth of the last live-born infant.	<a href="#">6.6.1.1.60.1 MLLB Derivation Rule</a>	<a href="#">6.6.1.1.60.3 MLLB Value Sets</a>
DLMP_DY	The date the mother's last normal menstrual period began.	<a href="#">6.6.1.1.61.1 DLMP DY Derivation Rule</a>	<a href="#">6.6.1.1.61.3 DLMP DY Value Sets</a>
DLMP_MO	The date the mother's last normal menstrual period began.	<a href="#">6.6.1.1.62.1 DLMP MO Derivation Rule</a>	<a href="#">6.6.1.1.62.3 DLMP MO Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
DLMP_YR	The date the mother's last normal menstrual period began.	<a href="#">6.6.1.1.63.1 DLMP_YR Derivation Rule</a>	<a href="#">6.6.1.1.63.3 DLMP_YR Value Sets</a>
YPO	The date (year) that the last pregnancy that did not result in a live birth ended. Includes pregnancy losses at any gestation age. Examples: spontaneous or induced losses or ectopic pregnancy.	<a href="#">6.6.1.1.64.1 YPO Derivation Rule</a>	<a href="#">6.6.1.1.64.3 YPO Value Sets</a>
MOPO	The date (month) that the last pregnancy that did not result in a live birth ended. Includes pregnancy losses at any gestation age. Examples: spontaneous or induced losses or ectopic pregnancy.	<a href="#">6.6.1.1.65.1 MOPO Derivation Rule</a>	<a href="#">6.6.1.1.65.3 MOPO Value Sets</a>
ADDRESS_D	NA	<a href="#">6.6.1.1.66.1 ADDRESS_D Derivation Rule</a>	<a href="#">6.6.1.1.66.3 ADDRESS_D Value Sets</a>
FNAME	The name of the facility where the delivery took place.	<a href="#">6.6.1.1.67.1 FNAME Derivation Rule</a>	<a href="#">6.6.1.1.67.3 FNAME Value Sets</a>
FNPI	National Provider Identifier.	<a href="#">6.6.1.1.68.1 FNPI Derivation Rule</a>	<a href="#">6.6.1.1.68.3 FNPI Value Sets</a>
CHAM	Chlamydia: A positive test for Chlamydia trachomatis. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.	<a href="#">6.6.1.1.69.1 CHAM Derivation Rule</a>	<a href="#">6.6.1.1.69.3 CHAM Value Sets</a>
GON	Gonorrhea: A positive test/culture for Neisseria gonorrhea. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.	<a href="#">6.6.1.1.70.1 GON Derivation Rule</a>	<a href="#">6.6.1.1.70.3 GON Value Sets</a>
HEPB	Hepatitis B (HBV, serum hepatitis): A positive test for the hepatitis B virus. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.	<a href="#">6.6.1.1.71.1 HEPB Derivation Rule</a>	<a href="#">6.6.1.1.71.3 HEPB Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
HEPC	Hepatitis C (non-A, non-B hepatitis (HCV)): A positive test for the hepatitis C virus. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.	<a href="#">6.6.1.1.72.1 HEPC Derivation Rule</a>	<a href="#">6.6.1.1.72.3 HEPC Value Sets</a>
SYPH	Syphilis (also called lues) A positive test for Treponema pallidum. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.	<a href="#">6.6.1.1.73.1 SYPH Derivation Rule</a>	<a href="#">6.6.1.1.73.3 SYPH Value Sets</a>
NOA02	None of the listed infections were present and treated during this pregnancy.	<a href="#">6.6.1.1.74.1 NOA02 Derivation Rule</a>	<a href="#">6.6.1.1.74.3 NOA02 Value Sets</a>
AINT	Admission to intensive care unit: Any admission, planned or unplanned, of the mother to a facility/unit designated as providing intensive care. Serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.75.1 AINT Derivation Rule</a>	<a href="#">6.6.1.1.75.3 AINT Value Sets</a>
MTR	Maternal transfusion: Includes infusion of whole blood or packed red blood cells within the period specified. Serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.76.1 MTR Derivation Rule</a>	<a href="#">6.6.1.1.76.3 MTR Value Sets</a>
PLAC	Third or fourth degree perineal laceration: 3rd degree laceration extends completely through the perineal skin, vaginal mucosa, perineal body and anal sphincter. 4th degree laceration is all of the above with extension through the rectal mucosa. Serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.77.1 PLAC Derivation Rule</a>	<a href="#">6.6.1.1.77.3 PLAC Value Sets</a>
RUT	Ruptured Uterus: Tearing of the uterine wall. Serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.78.1 RUT Derivation Rule</a>	<a href="#">6.6.1.1.78.3 RUT Value Sets</a>
UHYS	Unplanned hysterectomy: Surgical removal of the uterus that was not planned prior to admission for delivery. Includes an anticipated or possible but not definitively planned procedure. Serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.79.1 UHYS Derivation Rule</a>	<a href="#">6.6.1.1.79.3 UHYS Value Sets</a>
UOPR	Unplanned operating room procedure following delivery: Any transfer of the mother back to a surgical area for an operative procedure that was not planned prior to the admission for delivery. Excludes postpartum tubal ligations. Serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.80.1 UOPR Derivation Rule</a>	<a href="#">6.6.1.1.80.3 UOPR Value Sets</a>
NOA05	None of the listed serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.81.1 NOA05 Derivation Rule</a>	<a href="#">6.6.1.1.81.3 NOA05 Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
PRES	The physical process by which the complete delivery of the fetus was affected. Fetal presentation at birth - Cephalic: Presenting part of the fetus listed as vertex, occiput anterior (OA), occiput posterior (OP); Breech: Presenting part of the fetus listed as breech, complete breech, frank breech, footling breech; Other: Any other presentation not listed above.	<a href="#">6.6.1.1.82.1 PRES Derivation Rule</a>	<a href="#">6.6.1.1.82.3 PRES Value Sets</a>
ROUT	Delivery of the fetal head through the vagina by the application of obstetrical forceps to the fetal head; Vaginal/vacuum Delivery of the fetal head through the vagina by the application of a vacuum cup or ventouse to the fetal head; or Cesarean: Extraction of the fetus, placenta, and membranes through an incision in the maternal abdominal and uterine walls.	<a href="#">6.6.1.1.83.1 ROUT Derivation Rule</a>	<a href="#">6.6.1.1.83.3 ROUT Value Sets</a>
TLAB	If cesarean, indicate if a trial of labor was attempted (labor was allowed, augmented, or induced with plans for a vaginal delivery).	<a href="#">6.6.1.1.84.1 TLAB Derivation Rule</a>	<a href="#">6.6.1.1.84.3 TLAB Value Sets</a>
MFNAME	The current legal first name of the mother.	<a href="#">6.6.1.1.85.1 MFNAME Derivation Rule</a>	<a href="#">6.6.1.1.85.3 MFNAME Value Sets</a>
MMNAME	The current legal middle name of the mother.	<a href="#">6.6.1.1.86.1 MMNAME Derivation Rule</a>	<a href="#">6.6.1.1.86.3 MMNAME Value Sets</a>
MLNAME	The current legal last name of the mother.	<a href="#">6.6.1.1.87.1 MLNAME Derivation Rule</a>	<a href="#">6.6.1.1.87.3 MLNAME Value Sets</a>
MSUFF	The current legal name suffix of the mother.	<a href="#">6.6.1.1.88.1 MSUFF Derivation Rule</a>	<a href="#">6.6.1.1.88.3 MSUFF Value Sets</a>
HFT	Mother's height feet	<a href="#">6.6.1.1.89.1 HFT Derivation Rule</a>	<a href="#">6.6.1.1.89.3 HFT Value Sets</a>
HIN	Mother's height inches	<a href="#">6.6.1.1.90.1 HINT Derivation Rule</a>	<a href="#">6.6.1.1.90.3 HIN Value Sets</a>
MRECNUM	The mother's medical record number for this facility admission	<a href="#">6.6.1.1.91.1 MRECNUM Derivation Rule</a>	<a href="#">6.6.1.1.91.3 MRECNUM Value Sets</a>
PWGT	The mother's prepregnancy weight	<a href="#">6.6.1.1.92.1 PWGT Derivation Rule</a>	<a href="#">6.6.1.1.92.3 PWGT Value Sets</a>
NFACL	Indicates the name of the facility the mother was transferred from if the mother was transferred from another facility. Transfers include hospital to hospital, birth facility to hospital, etc. Does not include home to hospital.	<a href="#">6.6.1.1.93.1 NFACL Derivation Rule</a>	<a href="#">6.6.1.1.93.3 NFACL Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
TRAN	Indicates if the mother was transferred from another facility. Transfers include hospital to hospital, birth facility to hospital, etc. Does not include home to hospital.	<a href="#">6.6.1.1.94.1 TRAN Derivation Rule</a>	<a href="#">6.6.1.1.94.3 TRAN Value Sets</a>
DWGT	The mother's weight at the time of delivery	<a href="#">6.6.1.1.95.1 DWGT Derivation Rule</a>	<a href="#">6.6.1.1.95.3 DWGT Value Sets</a>
POPO	Total number of other pregnancy outcomes that did not result in a live birth. Includes pregnancy losses of any gestation age. Examples: spontaneous or induced losses or ectopic pregnancy.	<a href="#">6.6.1.1.96.1 POPO Derivation Rule</a>	<a href="#">6.6.1.1.96.3 POPO Value Sets</a>
PLBD	The total number of previous live-born infants now dead.	<a href="#">6.6.1.1.97.1 PLBD Derivation Rule</a>	<a href="#">6.6.1.1.97.3 PLBD Value Sets</a>
PLBL	The total number of previous live-born infants now living.	<a href="#">6.6.1.1.98.1 PLBL Derivation Rule</a>	<a href="#">6.6.1.1.98.3 PLBL Value Sets</a>
OWGEST	The best obstetric estimate of the infant's gestation in completed weeks based on the birth attendant's final estimate of gestation. This estimate of gestation should be determined by all perinatal factors and assessments such as ultrasound, but not the neonatal exam. Ultrasound taken early in pregnancy is preferred.	<a href="#">6.6.1.1.99.1 OWGEST Derivation Rule</a>	<a href="#">6.6.1.1.99.3 OWGEST Value Sets</a>
CERV	Cervical cerclage: Circumferential banding or suture of the cervix to prevent or treat dilation. Includes: MacDonald's suture; Shirodkar procedure; and Abdominal cerclage via laparotomy. Obstetric procedures: Medical treatment or invasive/manipulative procedure performed during this pregnancy to treat the pregnancy or to manage labor and/or delivery.	<a href="#">6.6.1.1.100.1 CERV Derivation Rule</a>	<a href="#">6.6.1.1.100.3 CERV Value Sets</a>
ECVF	Failed External cephalic version: Failed attempt to convert a fetus from a nonvertex to a vertex presentation by external manipulation. Obstetric procedures: Medical treatment or invasive/manipulative procedure performed during this pregnancy to treat the pregnancy or to manage labor and/or delivery.	<a href="#">6.6.1.1.101.1 ECVF Derivation Rule</a>	<a href="#">6.6.1.1.101.3 ECVF Value Sets</a>
ECVS	Successful External cephalic version: Successful conversion of a fetus from a nonvertex to a vertex presentation by external manipulation. Obstetric procedures: Medical treatment or invasive/manipulative procedure performed during this pregnancy to treat the pregnancy or to manage labor and/or delivery.	<a href="#">6.6.1.1.102.1 ECVS Derivation Rule</a>	<a href="#">6.6.1.1.102.3 ECVS Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
TOC	Tocolysis: Administration of any agent with the intent to inhibit preterm uterine contractions to extend the length of the pregnancy. Medications: Magnesium sulfate (for preterm labor); Terbutaline; Indocin (for preterm labor). Obstetric procedures: Medical treatment or invasive/manipulative procedure performed during this pregnancy to treat the pregnancy or to manage labor and/or delivery.	<a href="#">6.6.1.1.103.1 TOC Derivation Rule</a>	<a href="#">6.6.1.1.103.3 TOC Value Sets</a>
NOA03	None of the listed obstetric procedures were performed for medical treatment or invasive/manipulative procedures during this pregnancy to treat the pregnancy or to manage labor and/or delivery.	<a href="#">6.6.1.1.104.1 NOA03 Derivation Rule</a>	<a href="#">6.6.1.1.104.3 NOA03 Value Sets</a>
PROM	Premature Rupture of the Membranes (prolonged ≥12 hours): Spontaneous tearing of the amniotic sac, (natural breaking of the “bag of waters”), 12 hours or more before labor begins. Serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.105.1 PROM Derivation Rule</a>	<a href="#">6.6.1.1.105.3 PROM Value Sets</a>
PRIC	Precipitous labor (<3hours): Labor that progresses rapidly and lasts for less than 3 hours. Serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.106.1 PRIC Derivation Rule</a>	<a href="#">6.6.1.1.106.3 PRIC Value Sets</a>
PROL	Prolonged labor (≥ 20 hours): Labor that progresses slowly and lasts for 20 hours or more. Serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.107.1 PROL Derivation Rule</a>	<a href="#">6.6.1.1.107.3 PROL Value Sets</a>
NOA05	None of the listed serious complications experienced by the mother associated with labor and delivery.	<a href="#">6.6.1.1.108.1 NOA05 Derivation Rule</a>	<a href="#">6.6.1.1.108.3 NOA05 Value Sets</a>
SFN	NA	<a href="#">6.6.1.1.109.1 SFN Derivation Rule</a>	<a href="#">6.6.1.1.109.3 SFN Value Sets</a>
FLOC	NA	<a href="#">6.6.1.1.110.1 FLOC Derivation Rule</a>	<a href="#">6.6.1.1.110.3 FLOC Value Sets</a>
CNAME	NA	<a href="#">6.6.1.1.111.1 CNAME Derivation Rule</a>	<a href="#">6.6.1.1.111.3 CNAME Value Sets</a>
CNTYO	NA	<a href="#">6.6.1.1.112.1 CNTYO Derivation Rule</a>	<a href="#">6.6.1.1.112.3 CNTYO Value Sets</a>
BPLACE	NA	<a href="#">6.6.1.1.113.1 BPLACE Derivation Rule</a>	<a href="#">6.6.1.1.113.3 BPLACE Value Sets</a>
PLUR	The number of fetuses delivered live or dead at any time in the pregnancy regardless of gestational age or if the fetuses were delivered at different dates in the pregnancy. (“Reabsorbed” fetuses, those which are not “delivered” (expulsed or extracted from the mother) should not be counted.)	<a href="#">6.6.1.1.114.1 PLUR Derivation Rule</a>	<a href="#">6.6.1.1.114.3 PLUR Value Sets</a>

IHE Quality, Research and Public Health Technical Framework Supplement – Birth and Fetal Death Reporting-Enhanced (BFDR-E)

---

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
DOFP_MO	The month a physician or other health care professional first examined and/or counseled the pregnant woman for the pregnancy.	<a href="#">6.6.1.1.115.1 DOFP_MO Derivation Rule</a>	<a href="#">6.6.1.1.115.3 DOFP_MO Value Sets</a>
DOFP_DY	The day a physician or other health care professional first examined and/or counseled the pregnant woman for the pregnancy.	<a href="#">6.6.1.1.116.1 DOFP_DY Derivation Rule</a>	<a href="#">6.6.1.1.116.3 DOFP_DY Value Sets</a>
DOFP_YR	The year a physician or other health care professional first examined and/or counseled the pregnant woman for the pregnancy.	<a href="#">6.6.1.1.117.1 DOFP_YR Derivation Rule</a>	<a href="#">6.6.1.1.117.3 DOFP_YR Value Sets</a>
NPREV	The total number of visits recorded in the record.	<a href="#">6.6.1.1.118.1 NPREV Derivation Rule</a>	<a href="#">6.6.1.1.118.3 NPREV Value Sets</a>
PAY	The principal source of payment at the time of delivery: Includes: Private insurance (Blue Cross/Blue Shield, Aetna, etc.); Medicaid (or a comparable State program); Self-pay (no third party identified); Other (Indian Health Service, CHAMPUS/ TRICARE, other government [Federal, State, local]); Unknown	<a href="#">6.6.1.1.119.1 PAY Derivation Rule</a>	<a href="#">6.6.1.1.119.3 PAY Value Sets</a>
PDIAB	Prepregnancy Diabetes (diagnosis of glucose intolerance requiring treatment before this pregnancy).	<a href="#">6.6.1.1.120.1 PDIAB Derivation Rule</a>	<a href="#">6.6.1.1.120.3 PDIAB Value Sets</a>
GDIAB	Gestational Diabetes (diagnosis of glucose intolerance requiring treatment during this pregnancy).	<a href="#">6.6.1.1.121.1 GDIAB Derivation Rule</a>	<a href="#">6.6.1.1.121.3 GDIAB Value Sets</a>
PHYPE	Prepregnancy (Chronic) Hypertension (Elevation of blood pressure above normal for age, gender, and physiological condition with diagnosis prior to the onset of this pregnancy. Does not include gestational (pregnancy induced) hypertension (PIH).)	<a href="#">6.6.1.1.122.1 PHYPE Derivation Rule</a>	<a href="#">6.6.1.1.122.3 PHYPE Value Sets</a>
GHYPE	Gestational Hypertension (Elevation of blood pressure above normal for age, gender, and physiological condition with diagnosis in this pregnancy (pregnancy-induced hypertension or preeclampsia).	<a href="#">6.6.1.1.123.1 GHYPE Derivation Rule</a>	<a href="#">6.6.1.1.123.3 GHYPE Value Sets</a>
EHYPE	Eclampsia Hypertension (Elevation of blood pressure above normal for age, gender, and physiological condition with proteinuria with generalized seizures or coma. May include pathologic edema.	<a href="#">6.6.1.1.124.1 EHYPE Derivation Rule</a>	<a href="#">6.6.1.1.124.3 EHYPE Value Sets</a>
PPB	History of pregnancy(ies) terminating in a live birth of less than 37 completed weeks of gestation.	<a href="#">6.6.1.1.125.1 PPB Derivation Rule</a>	<a href="#">6.6.1.1.126.3 PPB Value Sets</a>
INFT	Any assisted reproductive treatment used to initiate the pregnancy. Includes: Drugs (such as Clomid, Pergonal); Artificial insemination; Technical procedures (such as in-vitro fertilization).	<a href="#">6.6.1.1.126.1 INFT Derivation Rule</a>	<a href="#">6.6.1.1.126.3 INFT Value Sets</a>

IHE Quality, Research and Public Health Technical Framework Supplement – Birth and Fetal Death Reporting-Enhanced (BFDR-E)

---

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
INFT_DRG	Fertility-enhancing drugs, artificial insemination or intrauterine insemination Any fertility enhancing drugs (e.g., Clomid, Pergonal), artificial insemination or intrauterine insemination used to initiate the pregnancy	<a href="#">6.6.1.1.127.1 INFT DRG Derivation Rule</a>	<a href="#">6.6.1.1.127.3 INFT DRG Value Sets</a>
INFT_ART	Assisted reproductive technology (e.g., in vitro fertilization (IVF), gamete intrafallopian transfer GIFT)) Any assisted reproductive technology (ART/technical procedures (e.g., IVF, GIFT, ZIFT)) used to initiate the pregnancy.	<a href="#">6.6.1.1.128.1 INFT ART Derivation Rule</a>	<a href="#">6.6.1.1.128.3 INFT ART Value Sets</a>
PCES	Previous delivery by extracting the fetus, placenta, and membranes through an incision in the mother's abdominal and uterine walls.	<a href="#">6.6.1.1.129.1 PCES Derivation Rule</a>	<a href="#">6.6.1.1.129.3 PCES Value Sets</a>
NPCES	Number of previous deliveries extracting the fetus, placenta, and membranes through an incision in the mother's abdominal and uterine walls.	<a href="#">6.6.1.1.130.1 NPCES Derivation Rule</a>	<a href="#">6.6.1.1.130.3 NPCES Value Sets</a>
NOA01	The patient had none of the listed risk factors in this pregnancy.	<a href="#">6.6.1.1.131.1 NOA01 Derivation Rule</a>	<a href="#">6.6.1.1.131.3 NOA01 Value Sets</a>
SORD	Order this infant was delivered in the set.	<a href="#">6.6.1.1.132.1 SORD Derivation Rule</a>	<a href="#">6.6.1.1.132.3 SORD Value Sets</a>
FSEX	The sex of the infant.	<a href="#">6.6.1.1.133.1 FSEX Derivation Rule</a>	<a href="#">6.6.1.1.133.3 FSEX Value Sets</a>
FDOD_YR	Date of Delivery (Fetus) Year	<a href="#">6.6.1.1.134.1 FDOD YR Derivation Rule</a>	<a href="#">6.6.1.1.134.3 FDOD YR Value Sets</a>
FDOD_MO	Date of Delivery (Fetus) Month	<a href="#">6.6.1.1.135 FDOD MO Derivation Rule</a>	<a href="#">6.6.1.1.135.3 FDOD MO Value Sets</a>
FDOD_DY	Date of Delivery (Fetus) Day	<a href="#">6.6.1.1.136.1 FDOD DY Derivation Rule</a>	<a href="#">6.6.1.1.136.3 FDOD DY Value Sets</a>
ETIME	Item to indicate when the fetus died with respect to labor and assessment.	<a href="#">6.6.1.1.137.1 ETIME Derivation Rule</a>	<a href="#">6.6.1.1.137.3 ETIME Value Sets</a>
LIVEB	Specify the number of infants in this delivery born alive	<a href="#">6.6.1.1.138.1 LIVEB Derivation Rule</a>	<a href="#">6.6.1.1.138.3 LIVEB Value Sets</a>
FDTH	Specify the number of fetal deaths in this delivery	<a href="#">6.6.1.1.139.1 FDTH Derivation Rule</a>	<a href="#">6.6.1.1.139.3 FDTH Value Sets</a>
HYST	Hysterotomy/Hysterectomy was the physical process by which the complete delivery of the fetus was affected.  Hysterotomy: Incision into the uterus extending into the uterine cavity. May be performed vaginally or transabdominally.  Hysterectomy: Surgical removal of the uterus. May be performed abdominally or vaginally.	<a href="#">6.6.1.1.140.1 HYST Derivation Rule</a>	<a href="#">6.6.1.1.140.3 HYST Value Sets</a>
TD	Hour and minute fetus was delivered.	<a href="#">6.6.1.1.141.1 TD Derivation Rule</a>	<a href="#">6.6.1.1.141.3 TD Value Sets</a>

<b>Attribute code</b>	<b>Definition</b>	<b>Derivation Rule</b>	<b>Value Sets</b>
AUTOP	Information on whether or not an autopsy was performed	<a href="#">6.6.1.1.142.1 AUTOP Derivation Rule</a>	<a href="#">6.6.1.1.142.3 AUTOP Value Sets</a>
FWO	Fetus' weight in ounces.	<a href="#">6.6.1.1.143.1 FWO Derivation Rule</a>	<a href="#">6.6.1.1.143.3 FWO Value Sets</a>
FWG	Fetus' weight in grams.	<a href="#">6.6.1.1.144.1 FWG Derivation Rule</a>	<a href="#">6.6.1.1.144.3 FWG Value Sets</a>
FWP	Fetus' weight in pounds.	<a href="#">6.6.1.1.145.1 FWP Derivation Rule</a>	<a href="#">6.6.1.1.145.3 FWP Value Sets</a>
LM	Listeria: A diagnosis of or positive test for Listeria monocytogenes. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.	<a href="#">6.6.1.1.146.1 LM Derivation Rule</a>	<a href="#">6.6.1.1.146.3 LM Value Sets</a>
GBS	Group B Streptococcus: A diagnosis of or positive test for Streptococcus agalactiae or group B streptococcus. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.	<a href="#">6.6.1.1.147.1 GBS Derivation Rule</a>	<a href="#">6.6.1.1.147.3 GBS Value Sets</a>
CMV	Cytomegalovirus (CMV): A diagnosis of or positive test for Cytomegalovirus. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record.	<a href="#">6.6.1.1.148.1 CMV Derivation Rule</a>	<a href="#">6.6.1.1.148.3 CMV Value Sets</a>
B19	Parvovirus: A diagnosis of or positive test for Parvovirus B19. Infections present at the time of the pregnancy diagnosis or a confirmed diagnosis during the pregnancy with or without documentation of treatment. Documentation of treatment during this pregnancy is adequate if a definitive diagnosis is not present in the available record	<a href="#">6.6.1.1.149.1 B19 Derivation Rule</a>	<a href="#">6.6.1.1.149.3 B19 Value Sets</a>

## Appendix A – BFDR Birth CDA Document Quick Reference

This table provides a reference showing the section structure of the BFDR Birth CDA Document and the BFDR Fetal Death CDA Documents, the templateId's which each sections conforms to, and the LOINC code used to identify the data in that section. The reference also show the types of entry templates used to encode data found in each section.

## Volume 3 Namespace Additions

*Add the following terms to the IHE Namespace:*

5595

*Add to section 5 Namespaces and Vocabularies*

codeSystem	codeSystemName	Description
1.3.6.1.4.1.19376.1.5.3.1	IHE PCC Template Identifiers	This is the root OID for all IHE PCC Templates. A list of PCC templates can be found below in CDA Release 2.0 Content Modules.
1.3.6.1.4.1.19376.1.7.3.1.1	IHE BFDR Template Identifiers	This is the root OID for all the IHE BFDR Templates.
1.3.6.1.4.1.19376.1.5.3.2	IHEActCode	See IHEActCode Vocabulary below
1.3.6.1.4.1.19376.1.5.3.3	IHE PCC RoleCode	See IHERoleCode Vocabulary below
1.3.6.1.4.1.19376.1.5.3.4		Namespace OID used for IHE Extensions to CDA Release 2.0
2.16.840.1.113883.10.20.1	CCD Root OID	Root OID used for by ASTM/HL7 Continuity of Care Document
2.16.840.1.113883.5.112	RouteOfAdministration	See the HL7 RouteOfAdministration Vocabulary
2.16.840.1.113883.5.1063	SeverityObservation	See the HL7 SeverityObservation Vocabulary
2.16.840.1.113883.1.11.12212	MaritalStatus	See the HL7 MaritalStatus Vocabulary
2.16.840.1.113883	ServiceDeliveryLocation	See the HL7 ServiceDeliveryLocation Vocabulary
2.16.840.1.113883.12.1	AdministrativeGender	See the HL7 AdministrativeGender Vocabulary
2.16.840.1.113883.5.111	Role	See the HL7 Role Vocabulary
2.16.840.1.113883.5.1077	EducationLevel	See the HL7 EducationLevel Vocabulary
2.16.840.1.113883.6.1	LOINC	Logical Observation Identifier Names and Codes
2.16.840.1.113883.6.96	SNOMED-CT	SNOMED Clinical Terms
2.16.840.1.113883.6.103	ICD-9CM (diagnosis codes)	International Classification of Diseases, Clinical Modifiers, Version 9
2.16.840.1.113883.6.104	ICD-9CM (procedure codes)	International Classification of Diseases, Clinical Modifiers, Version 9
2.16.840.1.113883.6.3	ICD10	International Classification of Diseases Revision 10 (ICD 10) Note this does NOT have the CM changes, and is specifically for international use.
2.16.840.1.113883.6.4	ICD-10-PCS	International Classification of Diseases, 10th Revision, Procedure Coding System
2.16.840.1.113883.6.90	ICD-10-CM	International Classification of Diseases, 10th Revision, Clinical Modification
2.16.840.1.113883.6.26	MEDCIN	A classification system from MEDICOMP Systems.
2.16.840.1.113883.6.88	RxNorm	RxNorm
2.16.840.1.113883.6.63	FDDC	First DataBank Drug Codes

codeSystem	codeSystemName	Description
2.16.840.1.113883.6.12	C4	Current Procedure Terminology 4 (CPT-4) codes.
2.16.840.1.113883.6.257	Minimum Data Set for Long Term Care	The root OID for Minimum Data Set Answer Lists
2.16.840.1.113883.2.8.1.1	CCAM	Classification Commune des Actes Médicaux
2.16.840.1.113883.6.21	NUBC	National Uniform Billing Codes (US)

*Add to section 5.1.1 IHE Format Codes*

Profile	Format Code	Media Type	Template ID
Labor and Delivery Summary for Vital Records (VR) for Birth and Fetal Death Reporting (BFDR)	urn:ihe:qrph:BFDR:2011	Text/XML	1.3.6.1.4.1.19376.1.7.3.1.1.19.1.1
BFDR Birth CDA document	urn:ihe:qrph:BFDR-Birth:2014	Text/xml	1.3.6.1.4.1.19376.1.7.3.1.1.19.2
BFDR Fetal Death CDA document	urn:ihe:qrph:BFDR-FDeath:2014	Text/xml	1.3.6.1.4.1.19376.1.7.3.1.1.19.3

*Add to section 5.1.2 IHE ActCode Vocabulary*

No new ActCode Vocabulary

*Add to section 5.1.3 IHE RoleCode Vocabulary*

No new RoleCode Vocabulary

5605

## Volume 4 – National Extensions

*Add appropriate Country section*

## 4 National Extensions

### 4.I National Extensions for IHE USA

#### 4.I.1 Comment Submission

5610 This national extension document was authored under the sponsorship and supervision of IHE QRPH with collaboration from the CDC/National Center for Health Statistics, who welcome comments on this document and the IHE USA initiative. Comments should be directed to:

[http://www.ihe.net/QRPH\\_Public\\_Comments](http://www.ihe.net/QRPH_Public_Comments)

#### 4.I.2 Birth and Fetal Death Reporting – Extended (BFDR-E)

##### 4.I.2.1 BFDR US Forms Pre-population

The U.S. Standard Certificate of Live Birth and the U.S. Standard Report of Fetal Death SHALL use derived elements to populate the processing variables as indicated in Table 6.6.1-1: Form Data Elements Data Mapped to Input Content Document Modules and as specified in the Birth Edit Specifications and the Fetal Death Edit Specifications for the 2003 Revisions of the U.S.

5620 Standard Certificate of Live Birth and the U.S. Standard Report of Fetal Death.

Standard worksheets are used in the U.S. to enhance the collection of quality, reliable data for birth and fetal death events. A common, standard form, entitled “Mother’s Worksheet for Child’s Birth Certificate”, has been established to identify information to be collected directly from the mother. The “Facility Worksheet for the Live Birth Certificate” was developed to identify information for which the best sources are the mother’s and infant’s medical records.

5625 The U.S. currently limits the data that may be pre-populated from an EHR for birth and fetal death events to a subset of vital records’ medical/health data requirements, that is, primarily those items included in the U.S. Standard Facility Worksheet for the Live Birth Certificate and the U.S. Standard Facility Worksheet for the Report of Fetal Death. The initial goal will be to monitor and assess the quality of the data that will be exchanged between electronic health record and vital records systems and the quality of the process of information exchange. This profile will not describe the data items on the U.S. Standard Mothers Worksheet for the Child’s Birth Certificate (excepting the two items “Mother’s prepregnancy weight” and “Mother’s height”) or the Patient’s Worksheet for the Report of Fetal Death. Additionally, these items will not be included for pre-population since these data elements are not collected from an EHR for vital records.
