

Family Planning V2

Family Planning: A Global Interest

- In 2013, 160 out of 197 Governments (81%) provided direct support for family planning.¹
- During the 2015 United Nations World Summit² world leaders adopted the Sustainable Development Goals aimed at achieving health equity and eradicating poverty worldwide.
- Family Planning 2020³ aims to expand access to family planning information, services, and supplies to an additional 120 million women and girls in 69 of the world's poorest countries by 2020.
- The U.S. Healthy People 2020⁴ consists of national objectives for improving health care for all Americans and includes 16 family planning objectives.

¹ World Population Policies 2013. United Nations.

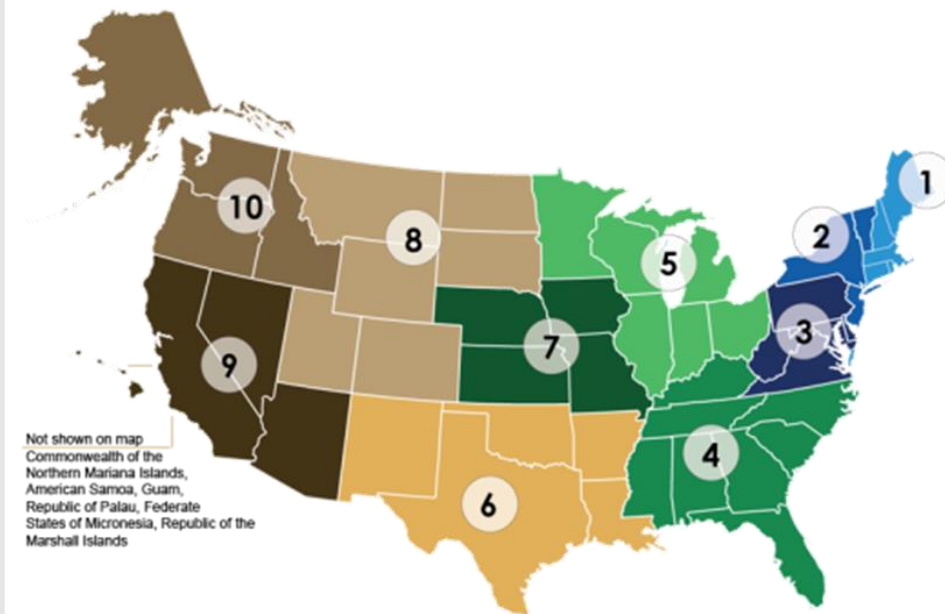

² The Sustainable Development Agenda. United Nations.

³ Family Planning 2020

⁴ Health People 2020. Office of Disease Prevention and Health Promotion.

U.S. Title X Family Planning Program Overview

- Title X of the U.S. Public Health Service Act of **1970** authorized the National Family Planning Program.
- Administered by the U.S. Department of Health and Human Services' Office of Population Affairs (OPA).
- Provides grants to approximately **90** agencies (health departments, community health agencies).
- Supports delivery of comprehensive family planning and preventive health services in approximately **4,000** clinical service sites.
- Provides care to over **4 million** people annually.
- OPA collects annual data from all Title X grantees through a report called the Family Planning Annual Report (FPAR).

Family Planning Annual Report

- Only source of annual, uniform reporting by all U.S. Title X family planning services grantees.
- Provides consistent data on the U.S. Title X Family Planning Program and its users.
- Data is used for monitoring and reporting program performance.
- Reported annually in Title X Family Planning Annual Report (FPAR) National Summary.

Family Planning Annual Report Current Submission Process

- Currently, data is submitted through an electronic, web-based data system.
- Requires burdensome dual data entry.
- Purpose of IHE profiling is to:
 - ✓ Standardize the data that is submitted to OPA.
 - ✓ Alleviate reporting burden for Title X grantees through pre-population of data directly from the EHR, where possible.

The screenshot shows the homepage of the Family Planning Annual Report Data System. The header includes the U.S. Department of Health & Human Services logo and the URL www.hhs.gov. The main navigation bar has links for Home, Reports & Forms, and Training. The page content is divided into several sections:

- User Login:** A form with fields for User Name and Password, and a Login button.
- Register:** Links for Register, Forgot User Name?, and Forgot Password?
- User Support:** Contact information including email (FPARHelp@oasr.hhs.gov), phone (800) 575-5503, and hours (M-F, 9AM-5PM ET).
- Welcome Message:** A paragraph explaining the purpose of the system to collect and manage FPAR data.
- About Title X:** A paragraph describing the National Family Planning Program, created in 1970 and authorized under Title X of the Public Health Service Act.
- About FPAR:** A paragraph explaining that FPAR is the only source of uniform reporting by Title X service grantees, used for project monitoring and reporting.
- Uses of FPAR Data:** A list of uses for Title X administrators and grantees, including monitoring compliance, guiding strategic planning, responding to inquiries, and assessing program impact.
- Footer:** Information about the page's last review and update dates (11/11/2016) and the content source (Office of Population Affairs).

OPA's Previous Work With IHE

- Led work on development of the Family Planning technical framework supplement published for trial implementation in September 2014.
- Participated in the 2015 North American Connectathon.
- When Family Planning V2 supplement is published, the 2014 release will be deprecated.
- Not a revision 2.0 of the 2014 Family Planning supplement, Family Planning V2 is a brand new technical framework supplement.

What's New in Family Planning V2?

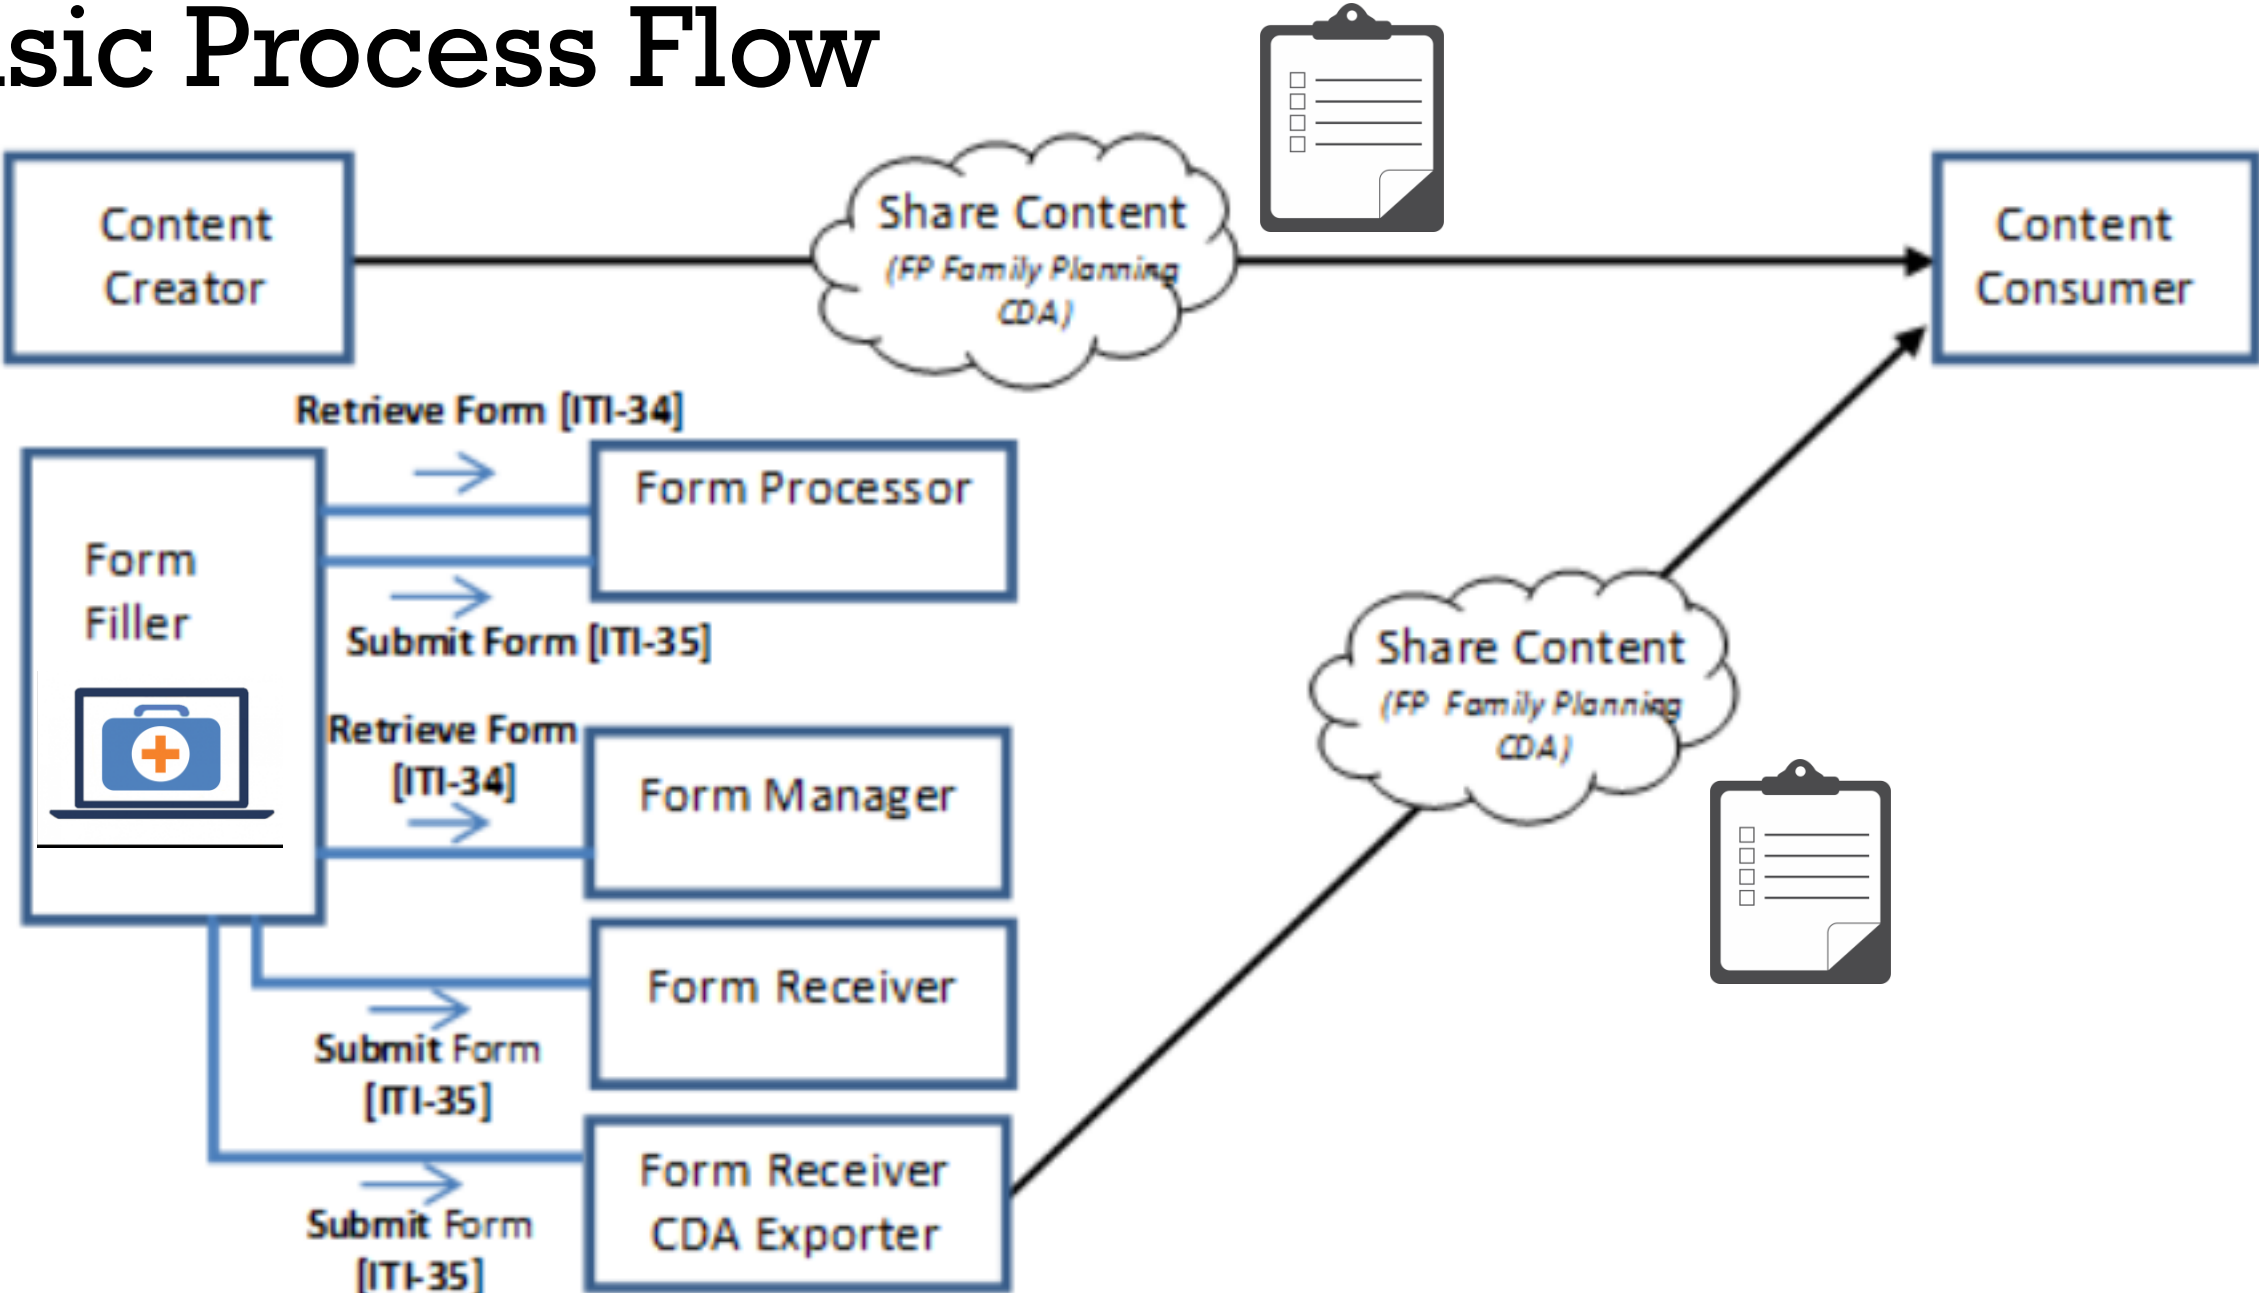

- Incorporates feedback received from participants of the 2015 IHE North American Connectathon and 2016 Privacy and Security Public Comment.
- Incorporates new data elements designed to facilitate a more enriched understanding of family planning and related preventive health issues in the U.S.
 - Added many new LOINC and SNOMED-CT codes to facilitate electronic exchange of family planning data.

Some of The New Data Elements in Family Planning V2

- Clinical Provider Role
- Parity + Gravidity
- Insurance Coverage Type
- Sexual Activity (Ever, Last 3 months, Last 12 months)
- Testing + Lab Results for Chlamydia, Gonorrhea, HIV, HPV
- Reason for no contraceptive method at intake/exit
- How contraceptive method was provided at exit

Basic Process Flow

Applicability

A globe of the Earth is positioned in the upper right quadrant, showing continents in various colors and oceans in blue. A black stethoscope is draped over the globe, with its chest piece resting on the right side and its earpieces extending towards the bottom right. The background is white.

- Broadly applicable to all health professionals delivering family planning & related preventive health services.
- Applies to many settings including, health departments, independent clinics, and health centers.
- New SNOMED and LOINC codes can be utilized broadly to support future projects worldwide.
