Integrating the Healthcare Enterprise

IHE Pharmacy
Technical Framework Supplement

Pharmacy Pharmaceutical Advice (PADV)

Trial Implementation

Date: September 27, 2012
Author: Jürgen Brandstätter
Email: pharmacy@ihe.net
Foreword

This is a supplement to the forthcoming IHE Pharmacy Technical Framework. Each supplement undergoes a process of public comment and trial implementation before being incorporated into the volumes of the Technical Frameworks.

This supplement is submitted for Trial Implementation as of September 27, 2012 and will be available for testing at subsequent IHE Connectathons. The supplement may be amended based on the results of testing. Following successful testing it will be incorporated into the forthcoming Pharmacy Technical Framework. Comments are invited and may be submitted on the IHE forums at http://www.ihe.net/pharmacy/pharmacycomments.cfm or by email to pharmacy@ihe.net.

This supplement introduces a new forthcoming technical framework and where indicated amends text by addition (bold underline) or removal (bold strikethrough), as well as addition of large new sections introduced by editor’s instructions to “add new text” or similar, which for readability are not bolded or underlined. “Boxed” instructions like the sample below indicate to the Volume Editor how to integrate the relevant section(s) into the relevant Technical Framework volume:

Replace Section X.X by the following:

General information about IHE can be found at: www.ihe.net

Information about the IHE Pharmacy domain can be found at: http://www.ihe.net/Domains/index.cfm

Information about the structure of IHE Technical Frameworks and Supplements can be found at: http://www.ihe.net/About/process.cfm and http://www.ihe.net/profiles/index.cfm

The current version of the IHE Technical Framework can be found at: http://www.ihe.net/Technical_Framework/index.cfm

APPENDIX ................................................................................................................................................................ 34
Introduction

The Pharmacy Pharmaceutical Advice Document Profile (PADV)\(^1\) describes the content and format of a pharmaceutical advice document generated during the process in which a health care professional (in most cases, but not necessarily always, a pharmacist) validates a Prescription Item of a prescription against pharmaceutical knowledge and regulations. The validation can be with regard to conflicts with other Prescription Items or current medication of the patient or other reasons which affect the further processing of the Prescription Item (may be dispensed, dispensed with change, etc.).

Documents created according to this profile are intended to be used in the context of the “Community Prescription and Dispense” Integration Profile (CMPD). This supplement also references other documents\(^2\). The reader should have already read and understood these documents:

1. PHARM Common parts document
2. PHARM Community Prescription and Dispense Integration Profile (CMPD)
3. PCC Technical Framework Volume 1
4. PCC Technical Framework Volume 2
5. IT Infrastructure Technical Framework Volume 1
6. IT Infrastructure Technical Framework Volume 2
7. IT Infrastructure Technical Framework Volume 3
8. HL7 and other standards documents referenced in this document

Open Issues and Questions

- Shall the pharmaceutical advice document also be applicable to be related to Dispense Items (instead of Prescription Items) for e.g., cancelling already dispensed items.

Closed Issues

\(^1\) From the clinical work practice perspective, a prescription is reviewed by a clinical pharmacist. The review may or may not result in recommendation(s) or advice(s) to the prescribing clinician to modify the prescription. Hence semantically more accurate this profile could be referenced as Pharmacist Pharmaceutical Review Document Profile. However, given the pervasive use of this profile, it is agreed through the international review that this profile name remains unchanged.

\(^2\) The first seven documents can be located on the IHE Website at http://www.ihe.net/Technical_Framework/index.cfm. The remaining documents can be obtained from their respective publishers.
Add the following to section 1.n

1.n Copyright Permission

Health Level Seven, Inc., has granted permission to the IHE to reproduce tables from the HL7 standard. The HL7 tables in this document are copyrighted by Health Level Seven, Inc. All rights reserved. Material drawn from these documents is credited where used.

</table>

Add the following to section 2.7

2.7 History of Annual Changes

Add Section X
3 Pharmacy Pharmaceutical Advice Content Profile

The Pharmacy Pharmaceutical Advice Document Profile (PADV) describes the content and format of a pharmaceutical advice generated during the process in which a health care professional (in most cases, but not necessarily always, a pharmacist) validates a Prescription Item of a prescription against pharmaceutical knowledge and regulations. The validation can be with regard to conflicts with other Prescription Items or current medication of the patient or other reasons which affect the further processing of the Prescription Item (may be dispensed, dispensed with change, etc.).

Documents created according to this profile are intended to be used in the context of the “Community Prescription and Dispense” Integration Profile (CMPD).

3.1 Purpose and Scope

The Community Pharmacy Prescription and Dispense workflow includes the stage of validation of a prescription by a health care professional, usually different from the prescriber, possibly also supported by expert systems.

A pharmaceutical advice document is the outcome of the validation of one Prescription Item. It contains the details, Intolerances, Contra-indications and Allergies (ICAs) and all other information which was discovered during validation and the overall result of it which affects the further processing.

This profile defines the content and format of such a pharmaceutical advice document.

For a detailed overview on the whole Pharmacy domain business processes, please refer to the “Common parts” document, which is accompanying this profile.
3.2 Process Flow

3.2.1 Use Case 1: Validating a prescribed item

A patient enters the community pharmacy and requests a Prescription Item to be dispensed. The requested Prescription Item has not yet been validated by the Pharmaceutical Adviser.

Usually the pharmacist uses the pharmacy information system for validating the Prescription Item. After the process the result of the validation is stated in a Pharmaceutical Advice document. If the result was successful, the prescription is allowed to be dispensed by a Medication Dispenser.

Refer to the Community Pharmacy Prescription and Dispense Integration Profile (CMPD) for detailed use case information.

3.3 Actors/Transactions

There are two actors in this profile, the Content Creator and the Content Consumer. Content is created by a Content Creator and is to be consumed by a Content Consumer. The sharing or transmission of content from one actor to the other is addressed by the appropriate use of IHE profiles described below, and is out of scope of this profile. A Document Source or a Portable Media Creator may embody the Content Creator Actor. A Document Consumer, a Document Recipient or a Portable Media Importer may embody the Content Consumer Actor. The sharing or transmission of content or updates from one actor to the other is addressed by the use of appropriate IHE profiles described in the section on Content Bindings with XDS, XDM and XDR in PCC TF_2:4.1

Figure 3.3-1: Actor Diagram
3.4 Options

Options that may be selected for this Content Profile are listed in Table 3.4-1 along with the Actors to which they apply. Dependencies between options when applicable are specified in notes.

<table>
<thead>
<tr>
<th>Actor</th>
<th>Option</th>
<th>Section</th>
</tr>
</thead>
<tbody>
<tr>
<td>Content Consumer</td>
<td>View Option (See Note 1)</td>

</tr>
<tr>
<td></td>
<td>Document Import Option (See Note 1)</td>
<td>PCC TF-2: 3.1.2</td>
</tr>
<tr>
<td></td>
<td>Section Import Option (See Note 1)</td>
<td>PCC TF-2: 3.1.3</td>
</tr>
<tr>
<td></td>
<td>Discrete Data Import Option (See Note 1)</td>
<td>PCC TF-2: 3.1.4</td>
</tr>
<tr>
<td>Content Creator</td>
<td>No options defined</td>
<td></td>
</tr>
</tbody>
</table>

Note 1: The Actor shall support at least one of these options.

3.5 Groupings

Content profiles may impose additional requirements on the transactions used when grouped with actors from other IHE Profiles.

3.5.1 Community Pharmacy Prescription and Dispense

Actors from the Pharmacy CMPD profile embody the Content Creator and Content Consumer sharing function of this profile. A Content Creator or Content Consumer may be grouped with appropriate actors from the XDS, XDM or XDR profiles to exchange the content described therein. The metadata sent in the document sharing or interchange messages has specific relationships or dependencies (which we call bindings) to the content of the clinical document described in the content profile.

The Patient Care Coordination Technical Framework defines the bindings to use when grouping the Content Creator of this Profile with actors from the Pharmacy CMPD Integration Profiles.

3.6 Security Considerations

The PADV Integration Profile assumes that a minimum security and privacy environment has been established across all participants. Security policies must exist regarding the use of training, agreements, risk management, business continuity and network security that need to be already in place prior to the implementation of PADV.

The IHE ITI ATNA Integration Profile is required of the actors involved in the IHE transactions specified in this profile to protect node-to-node communication and to produce an audit trail of the PHI related actions when they exchange messages.
In addition, the IHE ITI DSG Integration Profiles can be applied to the actors involved in the transactions specified in this profile to securely identify individuals involved in transactions and verify document integrity and authorizations (DSG).

Interested parties should also read the detailed Security Considerations sections provided for each of the aforementioned profiles in the IHE ITI Technical Framework and its supplements. The PADV profile does have a few security considerations of its own.

Pharmacy systems should be thoughtfully designed so that providers are able to review and verify information before it is imported into their Pharmacy system, and that positive user acknowledgements are made before import, and audit trails are recorded when imports occur.

Imported information should be traceable both to the source Pharmacy system, and the receiver that accepted it into the Pharmacy system. XDS Affinity domain policies should support policies and procedures for tracing information flows between Pharmacy systems.

Because the information being transferred is in XML, it will be common that different Pharmacy systems utilize different transformations to render the contents into human readable form. A Content Creator should make available the transforms used by the sending provider to review the documents, and a Content Consumer must support rendering the information as seen by the sending provider, allowing both providers to see what was sent in its original rendered form.

### 3.7 Content Modules

Content modules describe the content of a payload found in an IHE transaction. Content profiles are transaction neutral. They do not have dependencies upon the transaction that they appear in. These dependencies are reflected in the Bindings listed above.

All Pharmacy Pharmaceutical Advices shall be structured and coded as required by the Pharmacy Pharmaceutical Advice Document Content Module described in this profile. The inclusion of the specific coded attributes explicitly defined as optional, may be supported by specific implementations of Document Sources using an IHE identified coded terminology of their choice. The requirements and manner in which implementations support such capabilities is beyond the scope of this Integration Profile.
3.7.1 Structure of a Pharmacy Pharmaceutical Advice Document
Glossary

The glossary of the Pharmacy Prescription is applicable to this supplement and described in the “Pharmacy Prescription (PRE)” supplement.

### 6.3.1.2.6 Conformance

CDA Release 2.0 documents that conform to the requirements of this content module shall indicate their conformance by the inclusion of the appropriate `<templateId>` elements in the
header of the document. This is shown in the sample document below. A CDA Document may conform to more than one template. This content module inherits from the Medical Summary content module, and so must conform to the requirements of that template as well, thus all <templateId> elements shown in the example below shall be included.

```xml
<ClinicalDocument xmlns='urn:hl7-org:v3'>
  <typeId extension="POCD_HD000040" root="2.16.840.1.113883.1.3"/>
  <templateId root='1.3.6.1.4.1.19376.1.5.3.1.1.1'/>
  <templateId root='1.3.6.1.4.1.19376.1.9.1.1.2'/>
  <id root=' ' extension=' '/>
  <code code='61356-2' displayName='Medication Pharmaceutical Advice'
    codeSystem='2.16.840.1.113883.6.1' codeSystemName='LOINC'/>

  <effectiveTime value='20100719012005'/>
  <confidentialityCode code='N' displayName='Normal'
    codeSystem='2.16.840.1.113883.5.25' codeSystemName='Confidentiality'/>
  <languageCode code='en-US'/>
  
  <component>
    <structuredBody>
    </structuredBody>
  </component>
</ClinicalDocument>
```
6.3.2 CDA Header Content Modules

6.3.3 CDA Section Content Modules

Add section 6.3.3.C

6.3.3.2 Pharmaceutical Advice Section Content Module (1.3.6.1.4.1.19376.1.9.1.2.2)

| Template ID | 1.3.6.1.4.1.19376.1.9.1.2.2 |
| Parent Template | None |
| General Description | The pharmaceutical advice section shall contain a pharmaceutical advice to a medication prescribed for the patient. It shall include exactly one pharmaceutical advice entry as described in the Pharmaceutical Advice Item Entry Content Module. |
| LOINC Code | Opt | Description |
| 61357-0 | R | MEDICATION PHARMACEUTICAL ADVICE.BRIEF |
| Entries | Opt | Description |
| 1.3.6.1.4.1.19376.1.9.1.3.3 | R | Pharmaceutical Advice Item Entry Content Module |

```xml
<component>
  <section>
    <templateId root='1.3.6.1.4.1.19376.1.9.1.2.2'/>
    <!-- The section ID is the Pharmaceutical Advice ID -->
    <id root='' extension='' />
    <code code='61357-0' displayName='MEDICATION PHARMACEUTICAL ADVICE.BRIEF'
      codeSystem='2.16.840.1.113883.6.1' codeSystemName='LOINC'/>
    <title>Pharmaceutical Advice</title>
    <text>
      Text as described above
    </text>
    <!-- Pharmaceutical Advice -->
    <entry>
      <!-- Required element indicating the Pharmaceutical Advice entry content module -->
      <observation>
        <templateId root='1.3.6.1.4.1.19376.1.9.1.3.3'/>
      </observation>
    </entry>
  </section>
</component>
```

6.3.3.2.1 Parent Templates

This section content module has no parent structure.
6.3.3.2.2 Pharmaceutical Advice ID

<id root=' ' extension=' '/>

A Pharmaceutical Advice identifier SHALL be represented in the section <id> Element. The data type of the ID is II. Although HL7 allows for multiple identifiers, one and only one shall be used.

If this section is used in a Pharmaceutical Advice document, this identifier shall be set equal to the document ID (ClinicalDocument/id).

</observation>
```

6.3.4.3.3.1 Pharmaceutical Advice Item Entry General Specification

The `<observation>` element SHALL be present and represents the actual pharmaceutical advice. The moodCode attribute shall be EVN to reflect that the pharmaceutical advice as already taken place.

The organizer contains the overall status code of the pharmaceutical advice, the reason for decision as well as every conflicting prescription or Dispense Item.

6.3.4.3.3.2 Pharmaceutical Advice Item Entry TemplateID

```
<templateId root='1.3.6.1.4.1.19376.1.9.1.3.3'/>  <!-- PHARM -->
```

6.3.4.3.3 Observation ID (Pharmaceutical Advice Item ID)

```
{id root=' ' extension=' '}/>
```

This ID represents the Pharmaceutical Advice Item ID and SHALL be present.

6.3.4.3.4 Observation Code

```
<code code=' ' displayName=' ' codeSystem=' ' codeSystemName=' '/>
```

The supply entry SHALL indicate the coded result of the validation out of the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>displayName</th>
</tr>
</thead>
<tbody>
<tr>
<td>OK</td>
<td>Dispense, no change expected but allowed if recommended medication given</td>
</tr>
<tr>
<td>CHANGE</td>
<td>Dispense with change expected</td>
</tr>
<tr>
<td>REFUSE</td>
<td>Refusal to dispense until further discussion with prescriber</td>
</tr>
<tr>
<td>CANCEL</td>
<td>Definite cancelation of the Prescription Item</td>
</tr>
</tbody>
</table>

codeSystem: 1.3.6.1.4.1.19376.1.9.2.1
codeSystemName: IHE Pharmaceutical Advice Status List
Detailed description of statuses

The following detailed description explains the meaning of the status codes.

**OK**

The status code OK shall be used, if the referred Prescription Item is allowed to be dispensed without any change. If additional information concerning alternative “recommended” medication is included in the document, according to the chapter 6.3.4.3.3.10 Changed or Recommended Prescription Items (as Organizer). The Medication Dispenser is allowed to either dispense the original prescribed item or the recommended item (or set of item).

Example: The Pharmaceutical Adviser may approve Paracetamol as the prescribed item, but adds two alternatives, as first a genericum of Paracetamol and as second a combination of two other medications. In this case the Medication Dispenser may either dispense the original medication, the genericum or the alternative combination of two medications other.

**CHANGE**

The status code CHANGE shall be used, if the referred Prescription Item is allowed to be dispensed with required changes stated according to the chapter 6.3.4.3.3.10 Changed or Recommended Prescription Items (as Organizer). The changes may concern all levels of information of the Prescription Item (the medication itself, intake pattern, patient instructions, etc.).

Example 1: The Pharmaceutical Adviser may disapprove Paracetamol as the prescribed item and requests a change to one of two alternatives, as first a genericum of Paracetamol and as second a combination of two other medications. In this case the Medication Dispenser may either dispense the genericum or the alternative combination of two medications other but not the original medication.

Example 2: The Pharmaceutical Adviser may disapprove just the prescribed dosage of Paracetamol and describes another dosage. In this case the Medication Dispenser may dispense original prescribed Paracetamol, but has to commend the other dosage to the patient.

**REFUSE**

The status code REFUSE shall be used, if the referred Prescription Item is not allowed to be dispensed by a Medication Dispenser and no allowed alternatives are available. The reasons leading to this statement are documented in the Pharmaceutical Advice. Subsequently the prescription has to be further discussed with the prescriber.

Example: The Pharmaceutical Adviser disapproves Paracetamol as prescribed item because there exists a contra-indication with another medication of the patient. Since no alternative can be found the therapy has to be modified by the prescriber.
CANCEL

The status code CANCEL shall be used to cancel a prescribed or already dispensed medication. In difference to status code “refuse” this means a total abandonment of the Prescription Item (prescribed or dispensed) without expecting it to be refined by the prescriber.

Example: A physician wants to replace a recently prescribed (and maybe already dispensed) medication of the patient by a new one. To keep the “current medication”-information of the patient up-to-date the physician first acts as a Pharmaceutical Adviser and cancels the current prescribed (and maybe already dispensed) Prescription Item. Then the physician tells the patient to abandon the recent medication and prescribes a new one.

6.3.4.3.3.5 Narrative comment

An optional narrative comment to the result of the validation MAY be referenced in the <text> element.

6.3.4.3.3.6 Status Code

<statusCode code='active | completed'/>

The status code of a Pharmaceutical Advice SHALL be set to either “active” or “completed”, indicating whether the Pharmaceutical Advice is just a pre-release of the validation (active) or the final validation result (completed).

<table>
<thead>
<tr>
<th>code</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>active</td>
<td>This Pharmaceutical Advice is a provisional result. It is considered as a pre-release advice (e.g., assembled by an automated ICA check function), intended to be a foundation for the final decision taken by another Pharmaceutical Adviser. The results stated in this Pharmaceutical Advice do NOT affect the further workflow.</td>
</tr>
<tr>
<td>completed</td>
<td>This Pharmaceutical Advice is a final result. The results stated in this Pharmaceutical Advice will possibly affect the further workflow.</td>
</tr>
</tbody>
</table>

6.3.4.3.3.7 Pharmaceutical Adviser

<performer typeCode='PRF'> … </performer>

In the case where the Pharmaceutical Adviser of a Prescription Item is different from the author of the pharmaceutical advice document, the Pharmaceutical Adviser MAY be represented by the <performer> element of the entry and the author SHALL be represented in the author Element of the document.
6.3.4.3.3.8 Reference to Prescription Item

```
<entryRelationship typeCode='REFR'>
   <substanceAdministration classCode='SBADM' moodCode='INT'>
      <templateId root='2.16.840.1.113883.10.20.1.27'/>
      <templateId root='1.3.6.1.4.1.19376.1.5.3.1.4.5.1'/>
      <templateId root='1.3.6.1.4.1.19376.1.9.1.3.2'/>
   </substanceAdministration>
</entryRelationship>
```

The reference to the Prescription Item by which this Pharmaceutical Advice was performed SHALL be present, containing a Prescription Item Entry described in the Pharmacy Prescription (PRE) Content Profile.

This Prescription Item Entry SHALL be a complete copy (including the <id> element) of the Prescription Item by which this Pharmaceutical Advice was performed, with the following exception:

In case the Prescription Item by which this Pharmaceutical Advice was performed contains a “reason for the use of the medication”\(^5\), according to the specification of an “Internal Reference” entry (1.3.6.1.4.1.19376.1.5.3.1.4.4.1) a complete copy of this element would result in a broken link to the internal information referenced, because such information is not allowed in the Pharmaceutical Advice document. In this case the complete copy shall be modified and all reason(s) set to nullFlavor=MSK (“masked”: masked, confidential, not published).

\(^5\) see chapter “Reason” of the Pharmacy Prescription (PRE) profile
nullFlavor reason of a Prescription Item Entry:

```xml
<entryRelationship typeCode="RSON">
  <act classCode="ACT" moodCode="EVN">
    <templateId root="1.3.6.1.4.1.19376.1.5.3.1.4.4.1"/>
    <id nullFlavor="MSK"/>
    <code nullFlavor="MSK|NA"/>
  </act>
</entryRelationship>
```

6.3.4.3.3.9 Reference to Pharmaceutical Advice Concerns

```xml
<entryRelationship typeCode='REFR' inversionInd='false'>

</entryRelationship>
```

Optional one or more Pharmaceutical Advice Concern entries (representing ICAs to other prescription or Dispense Items) SHOULD be present in case of validation issues with the objective Prescription Item. They SHALL conform to the Pharmaceutical Advice Concern Entry Content Module template (1.3.6.1.4.1.19376.1.9.1.3.5).

Each Pharmaceutical Advice Concern represents the general concern regarding one specific foreign prescription or Dispense Item, containing one or more problems caused by it.

6.3.4.3.3.10 Changed or Recommended Prescription Items (as Organizer)

```xml
<entryRelationship typeCode='REFR' inversionInd='false'>
  <organizer classCode='CLUSTER' moodCode='EVN'>
    <statusCode code='completed'>
      <component>
        <seperatableInd value='false'>
          <!-- First Prescription Item -->
        </component>
      </statusCode>
    </organizer>
  <templateId root='2.16.840.1.113883.10.20.1.27'/>
  <templateId root='1.3.6.1.4.1.19376.1.9.1.3.2'/>
```

```xml
<templateId root='1.3.6.1.4.1.19376.1.5.3.1.4.5.1'/>
<templateId root='1.3.6.1.4.1.19376.1.9.1.3.2'/>
```
This element SHALL be present, if the status of the Pharmaceutical Advice (<code> Element) is set to “Dispense with change expected”. In this case it shall indicate the changed Prescription Item(s), which are allowed to be dispensed instead of the original prescribed item.

More than one Prescription Items within the organizer indicate that the original Prescription Item has to be changed with the combination of Prescription Items as a whole.

This element MAY also be present, if the status of the Pharmaceutical Advice (<code> Element) is set to “Dispense, no change expected”. In this case it may recommend an alternative (drug, dosage, form, etc.) to the original Prescription Item.

More than one Prescription Items within the organizer indicate that the original Prescription Item can be changed with the combination of Prescription Items as a whole.

In all other cases it shall not be present.

Notes:

All Prescription Items shall be given as a whole according to the specification of the Prescription Item Entry Content Module (1.3.6.1.4.1.19376.1.9.1.3.2).

In both cases more than one <entryRelationship> elements indicate a choice of change or recommendation.
6.3.4.4 Pharmaceutical Advice Concern Entry Content Module
(1.3.6.1.4.1.19376.1.9.1.3.5)

This section corresponds to Entry Content Module Specification D of the IHE Technical Framework. This section may or may not be present depending on the issues the profile addresses.

6.3.4.4.1 Standards
This part describes the general structure for a Pharmaceutical Advice Item. It is based on the following standards:

<table>
<thead>
<tr>
<th>Standard</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HL7V3 NE2009</td>
<td>HL7 V3 2009 Normative Edition</td>
</tr>
<tr>
<td>CDAR2</td>
<td>HL7 CDA Release 2.0</td>
</tr>
<tr>
<td>CCD</td>
<td>ASTM/HL7 Continuity of Care Document</td>
</tr>
<tr>
<td>IHE PCC</td>
<td>Concern Entry (1.3.6.1.4.1.19376.1.5.3.1.4.5.1)</td>
</tr>
</tbody>
</table>

6.3.4.4.2 Parent Template
This entry content module inherits the structure of the Concern Entry Content Module, 1.3.6.1.4.1.19376.1.5.3.1.4.5.1.

6.3.4.4.3 Specification
This section makes use of the concern entry content modules.

This specification relies on the PCC Concern Entry Content Module (1.3.6.1.4.1.19376.1.5.3.1.4.5.1) specification and only describes additional constraints.

The chapters below identify and describe these fields, and indicate the constraints on whether or not they are required to be sent. The fields are listed in the order that they appear in the CDA XML content.
6.3.4.4.3.1 Pharmaceutical Advice Concern Entry General Specification

See PCC TF2, Concern Entry Module (1.3.6.1.4.1.19376.1.5.3.1.4.5.1) specification.

6.3.4.4.3.2 Prescription Item Entry TemplateID

See PCC TF2, Concern Entry Module (1.3.6.1.4.1.19376.1.5.3.1.4.5.1) specification.
6.3.4.4.3.3 Pharmaceutical Advice Concern ID

This ID represents the Pharmaceutical Advice Concern ID and SHALL be present.
See PCC TF2, Concern Entry Module (1.3.6.1.4.1.19376.1.5.3.1.4.5.1) specification.

6.3.4.4.3.4 Pharmaceutical Advice Concern Code

The code is not applicable to a concern act, and so shall be recorded as shown above.
See PCC TF2, Concern Entry Module (1.3.6.1.4.1.19376.1.5.3.1.4.5.1) specification.

6.3.4.4.3.5 Narrative description of the ICA

An optional narrative description of the ICA caused by the prescription or Dispense Item MAY be referenced in the <text> element.

6.3.4.4.3.6 Pharmaceutical Advice Concern Status Code

The status of the <act> element SHALL be present and must be set to "completed". The concern has occurred and has been placed.

6.3.4.4.3.7 Effective Time

The <effectiveTime> element records the starting and ending times during which the concern was active.
See PCC TF2, Concern Entry Module (1.3.6.1.4.1.19376.1.5.3.1.4.5.1) specification.

6.3.4.4.3.8 Problems caused by the referenced prescription or Dispense Item

The <entryRelationship typeCode='SUBJ' inversionInd='false'>:  
</entryRelationship>
Zero to many entry relationships MAY be present identifying each problem or allergy caused by the prescription or Dispense Item referenced below. These entries SHALL conform to the specification of the IHE PCC Problem Entry or Allergies and Intolerances. See PCC TF2, Concern Entry Module (1.3.6.1.4.1.19376.1.5.3.1.4.5.1) specification.

6.3.4.4.3.9 Referenced prescription or Dispense Item

```xml
<entryRelationship typeCode='REFR'>
  <substanceAdministration classCode='SBADM' moodCode='INT'>
    ...
  </substanceAdministration>
  <!-- or -->
  <supply classCode='SBADM' moodCode='INT'>
    ...
  </supply>
</entryRelationship>
```

Exactly one entry relationship SHALL be present identifying the referenced prescription or Dispense Item, which causes the concern. This entry SHALL conform to either the Prescription Item Entry Content Module (1.3.6.1.4.1.19376.1.9.1.3.2) or the Dispense Item Entry Content Module (1.3.6.1.4.1.19376.1.9.1.3.4) template.

These Prescription or Dispense Item Entries SHOULD be a complete copy (including the <id> element) of the one referenced to, with the following exception:

In case the referenced Prescription Item contains a “reason for the use of the medication” according to the specification of an “Internal Reference” entry (1.3.6.1.4.1.19376.1.5.3.1.4.4.1) a complete copy of this element would result in a broken link to the internal information referenced, because such information is not allowed in the Pharmaceutical Advice document. In this case the complete copy shall be modified and all reason(s) set to nullFlavor=MSK (“masked”: masked, confidential, not published).

nullFlavored reason of a Prescription Item Entry:

```xml
<entryRelationship typeCode="RSON">
  <act classCode="ACT" moodCode="EVN">
    <templateId root="1.3.6.1.4.1.19376.1.5.3.1.4.4.1"/>
    <id nullFlavor="MSK"/>
  </act>
</entryRelationship>
```

6 see chapter “Reason” of the Pharmacy Prescription (PRE) profile
6.3.4.4.3.10 Severity of the concern

Exactly one optional Severity Observation MAY be present. This element SHALL conform to the IHE PCC Severity Entry Content Module (1.3.6.1.4.1.19376.1.5.3.1.4.1) specification.
6.5 PHARM Value Sets

6.5.1 IHE Pharmaceutical Advice Status List

The Pharmaceutical Advice Status List is used in the Pharmaceutical Advice Item Entry Content Module (1.3.6.1.4.1.19376.1.9.1.3.3) for coding the overall outcome of the validation process.

codeSystem: 1.3.6.1.4.1.19376.1.9.2.1
codeSystemName: IHE Pharmaceutical Advice Status List

<table>
<thead>
<tr>
<th>Code</th>
<th>displayName</th>
</tr>
</thead>
<tbody>
<tr>
